In 1874 a pair of to foreign lands. these birds built their nest at Inverary, in a hole in the wall of a small tunnel constructed to carry a rivulet under the walks of a pleasure-ground. The season was one of great drought, and the rivulet, during the whole time of incubation and the growth of the young in the nest, was nearly entirely dry. One of the nestlings, when almost fully fledged, was taken out by the hand for examination, an operation which so alarmed the others that they darted out of the hole and ran and fluttered down the tunnel towards its mouth. At that point

a considerable pool of water had survived the drought, and lay in the path of the fugitives. They did not at all appear to seek it; on the contrary their flight seemed ment.
