The mail-carrier was not found, and Jones has changed his boarding-house.

(Troy. (N. Y.) Morning Telegram and Whig. Rusbing the Midnight Oil. In the Philadelphia Times of recent date, we notice an item referring to the miraculously quick cure of a promi-nent druggist of that city, Mr. J. M. Higgins, Germantown Road and Norras street, who had an awtul attack of rheumatism of the knee. He applied St. Jacob's Oil at night, and next morning was well and in his store as usual

THE Eel River Road shows up the atest smesh-up of railroad material. tween Auburn Junction and Cedar reek, smashing several cars badly and destroying a quantity of flour and grain. The most prominent sensation connected with the smash-up is as folows: A young man from Butler, iressed in a suit of black broadcloth and his "mug" adorned with a spring plug-hat, was on his way to see a girl. The conductor was on the engine when t jumped the track, and, walking ng to the rear end of the train, h spied some object crawling out of the mud and water that accumiated along the ditch. It arose, and there before him stood the would-be lover. "Hello, what's up?" asked the con

And emptying the water out of h plug, he remarked:
"I'm a nice looking to go and see girl, aln't 1?"

"HELLO," said a New Haven mar he other noon. "How came this window broken?" "Why," replied his wife, "I heard a crash and I thought somebody had fired a bullet at it."

"Nonsense. Some boy threw stone, more like." "Oh, no. It wasn't. I looked ou of the window and all around right

away, and I didn't see a sign of a boy anywhere." Singular, wasn't it. Jounny came home from school the other day very much excited. "What do you think, pa, Jee Stewart, one of

biggest boys, had an argumen with the teacher about a question in grammar!"
"What position did he take?" "His last position was across a chair with his face down."

RESOLUTIONS are great sticklers for

The Popular Demand.

So great has been the popular demand for he celebrated remedy Kidney-Wort that it is aving an immen-e sale from Maine to Cali ornia. Some have found it inconvenint to prepare it from the dry compound. For such the proprietors now prepare it in liquid form.

This can be procured at the druggists. It has precisely the same effect as the dry but is very concentrated so that the dose is much smaller.—Lowell Mail.

**VEGETINE** NERVOUS DEBILITY.

Nervous Debility and SleeplessIn almost all cases siceplessness is a symptom of some other disease, and can only be remedied by the removal of the latter. It frequently, however, forms so prominent a feature as to render it necessary to be treated as an original disease. Intense mental excitement continued up to the period of going to rest, sedentary habits, the habitual use of coffee, also weakness of the digestive organs, are frequent causes of this trouble. The best and simplest remedy is Yedetine; and any person who cannot sleep nights should make it a duty to keep a bottle of this King of remedies always in the house, and to take a good cose of it just before retiring for the night. It will be sure to prove Nature's sweet restorer, and to sive to the patient that refreshing sleep which every wearied frame stands so much in need of. For small children stands so much in need of. For small children stands so much in need of. For small children inching will be found safer or better than a few drops of Yearting. It will at once restore quiet to the nervous system, and give rise to a natural and easy slumber. Although Yearting contains not one particle of opium or other narcottle in any shape or form, it yet has a most soothing effect on the whole system, and works in conjunction with Nature to give relief. See testimontals.

NERVOUS DEBILITY. Rev. O. T. Walker says:

That branch of chemistry called perfumery is a new industry on this coas farmer who, not wishing to trust too but with the ample facilities here for nuch to one man, consigned three lots its manufacture it will become in time of a particular product to each of three of very great importance. The extendifferent commission houses in the sive flower farms in France, Turkey same city. It happened to be the only consignment of the kind offered. Unfortunately for him he proved to be his importance in the world. The planting of flowers by the acre for per fumery purposes is unknown in this country. The perfumery manufactured here is from produce of flowers imported from Europe, and comes here in thoroughly incorporated, it is the shape of a fat or tallow. There steeped in a solution of common salt is only one firm in San Francisco enand alum. It is then made into paper, gaged in its manufacture, and this es-which is finally coated with shellac tablishment produces an average of one tablishment produces an average of one hundred gross of bottles per week. It is entirely for home consumption, ceremony. They all have to be intrea small export trade with Mexico.

Flowers are not used here in their natural state, as they are not to be had. There is no reason why the cultivation of flowers, flower farming proper, could not be made an important industry here. Wherever the raw material is to be obtained profitably there manufactories spring up, and nowhere do flowers grow more luxuriantly than in California. To convey an idea of the manufacture of perfumery, it may be said that British India and Europe consume annually, at the very lowest estimate, 150,000 gallons of perfumed spirits. The large perfumes of Paris and Grasse employ annually in its manufacture 80,000 pounds of rose blossoms, 60,000 pounds cassia flowers, 20,000 pounds rose leaves, 30,000 jesaamine blossoms, 30,000 pounds violets, 20,000 tuberoses, 20,000 pounds lilacs, besides great quantities of resemary mint, lemon, citron, thyme and many other odorous plants. The quantity of odoriferous substances used in this way is certainly very great, and far beyond the conception of most people. Shrewdness and Ability.

Hop Bitters so freely advertised in ail the papers, secular and religious, are having a large sale, and are sup-planting all other medicines. There is n denying the virtues of the Hop p'ant, and the proprietors of these Bitters have shown great shrewdness and ability in compounding a Bitters, whose virtues are so palpable to every one's observation .- Fichange.

Under the supervision of Professor Baird, U. S. Fish Commissioner, a shipment of 40,000 eggs of the whinnish or landlocked salmon of Maine, was re-cently made to Germany, by Mr. Frederick Mather, of N. Y. Half the eggs were consigned to the Berlin Fishery Association, and the rest to the Socie d'Acclimatation, of Paris. Mr. Mather has recently adopted a mode of packing for shipment which differs materially With the coordising, spasmodic tortures of fever and ague and billous remittent, when Hustetter's stomach Buters, acknowledged to be a real curative of malarial fevers, will eradicate the cause of so much suffering. No less effective is this benignant alterative in cases of constipation, dy-p psia, liver complaint, rheumatism, and in general debility and nervous weakness. For sale by all Druggists and Dealers generally. in detail from that employed last year, in the course of which he shipped 700,-000 eggs with a loss of only 7 to 8 per cent. It was the earlier practice to place the ova in shallow trays composed of a wooden frame with a bottom canton flannel. The trays were placed one upon another in a vertical position in a compartment directly beeath an ice box, from which water a little above the freezing point and well charged with exygen constantly percolated. In the new method the trays are put into tin boxes one upon the other until each box is full. A well fitting cover is then placed over them, and the boxes, thus nearly hermet! cally sealed, are packed in ice. There is no percolation of water upon the eggs in this mode of packing. But as the box detains and condenses all moisture arising from the trays, and the supply of air is sufficient for a number of days, it is believed that it will save a larger percentage of the eggs than was possible under the old method, besides occupying somewhat

No poisonous drugs enter into the composition of Carboilne, a deodorized extract of petroleum, the natural hair restorer and dressing as now improved and perfected. It is the perfection of the chemist's art, and will, beyond a peradventure, restore the hair on bald

An ingenious method has been devised for producing a brilliant metallic deposit on glass. When altric acid is added to a concentrated aqueous solution of tartar emetic solution as long as a precipitate is produced, then filtered, and precipitate PIANOS ALPON-ISHING CO., Filliage pair, Pa.

process to parties who will purchase from us stirred into tresh water, the liquid formed is essentially a basic nitrate of antimony in suspension. On diluting portion of this milky fiquid and boiling, the precipitate dissolves in the hot and seid liquid. If, now, a little of this hot solution be poured into a hol-low glass vessel, and cooled as rapidly possible by shaking or holding under running water the liquid befilm of the antimony salt on the sides of the glass. On washing it out with cold water, and passing sulphuretted hy-drogen gas into it, or pouring in a solution of the gas, the glass appears of a uniform faint yellow color-the sulphide of antimony formed adhering ery firmly to the sides of the glass after washing and drying. By repeating this operation several times, the film can be increased very considerably, within certain limits. Such glass appears of a beautiful golden color, with a green reflection.

out. Hop Bitters, which are advertised in our columns, are a sure cure for ague, billionsness and kidney complaints Those who use them say they cannot be too tighly recommended. Those afflicted should give them a fair trial, and will become thereby enthusiastic in the praise of their curative qualities .-Portland Ad.

No branch of husbandry furnishes more agreeable occupation than forest culture. It affords pleasant diversion from the protracted labors of the field, and employment for long winters that without it might prove monotonous Intelligently and systemstically managed, our forests will yield profitable returns, not only to our own, but to all succeeding generations.

The Doctors Disagree The Doctors Disagree
as to the best methods and remedies, for the
cure of constipation and disordered liver and
kidneys. But those that have used KidneyWort agree that it is by far the best medicine
known. Its action is prompt, thortugh and
lasting. Don't take pills, and other mercurials
that poison the system, but by using KidneyWort restore the natural action of all the
