"No, sir," replied the old man, who of course had no idea that he was speakto the king; "I am not so rich as that, I plow for wages.'

"How much do you earn a day! asked the king. "Eight grocshen," returned the man

(That would be about twenty cents of our money.)

groschen a day to pay it. Two more I spend on my children's schooling. If they are living when their mother and I are old, they will keep us and pay back what I lend. Then with my last two groschen I support my two sisters, who cannot work for themselves. Of course

"Well done, old man," cried the king ever seen me before?"

"No." said the farmer.

Protection of the Household.

Farm houses are rarely constructed with a view to convenience in Acing They are cold in winter and warm in summer. They are not supplied with water as they might be at small expense, have no means of drainage, no provisions for storing ice, and no method of ventilation except through open doors and windows. The kitchen is generally so located that the fire kept in it will warm the whole house. As three hot meals work or to comfort during warm weather. engaged in field work, and as the amount very quickly learn to eat heartily. as well as day. The odors of the sides skim milk, and suggests the use of from the city to the the country during stand until cold enough for the calf to find either in an ordinary farmhouse. but a desirable change in feeding. The air is impure not, it is true, from the odors rising from sewers and filthy alleys, but from vapors coming from cow-yards and the kitchen that forms a the in-door laborers on a farm suffer more from the heat during the summer than the out-door labors do. Various ways have been contrived to protect field laborers from the heat of the summer sun, but no invention has been per fected to ward off the heat of cooking stoves. The kitchens of most farm-houses are places of torment during the season

A Horse with a Future.

a young lady and had invited her out for tilized with barnyard manure, growing in of our smooth roads near the city, when small-sized tubers. the fair one observed to the youth that he drove a nice horse.

"Well, I think he ought to be a good 'un. I paid enough for him, and he's got a record down in the twenties. Oh, he's a flyer, and that's the only objection I have—he stays too long in the air when he gets started. I wouldn't take a farm for him, although I was recently offered an interest in a bank and a corner lot for

"Any child can drive him on the road, but when on the track we have to have the lines worked on the block and tackle system so great is his speed and desire to come under the wire ahead. But look at his shape. Don't he show his pedigree in his very eye?"

"How old is he?" "He will be five on the fifteenth of next month, and I've never let one of his birthdays go by without celebrating the event. I tell you that hose has got a future before him.

"Oh, yes," replied Julia, "if he only lives long enough, that will be the case I have no doubt; for he has been our family horse for eleven years and we would never have sold him to a Third or left. street livery stables if he hadn't such a severe case of botts and glanders, which finally ran into the lifts and we parted with him."

The young man didn't ask Julia to ride with him again.

Ay old gentleman who always took notes of his minister's sermons, on one occasion read them to the minister. "Stop, stop!" said the minister at the occurrence of of a certain sentence; "I didn't say that." "I know you didn't," was the reply; "I put that in myself to make

When a telegram comes from the far the lady he entered the West and states that a fire "destroyed my arms around her." every business house save one in the " we feel sorry for the town. when, next day, we learn that the business houses of the town consisted of a beer saloon and a grocery, and the latter was thing." saved, our sorrow is mitigated upward of "Why !" saved, our sorrow is mitigated upward of

AGRICULTURE. was out riding one day, saw an old farmer who was plowing a field and singing cheerfully over his work.

"You must be well off, old man, "cried the king. "Does this land belong to you on which you so industriously labor?"

"No, sir," replied the old man, who of it protected by a wall or some other arrangement by which the escape of liquid manure may be prevented. It is almost equally important to have a spout to convey rain water from the roof of the barn in some other direction than directly through the barn yard. It is bad enough that the heap should be exposed to the rains which fall directly upon it without adding to it the directly upon it without adding to it the droppings from the roof of the barn. If such improvedent farmers were to behold the actual value of the fertilizing materials it count for more than in ours, dear, dear than the such improvement of the fertilizing materials. thus lost, rolling from their purses in the housekeepers who read this. There is

cannot work for themselves. Of course I am not compelled to give them the money but I do it for the Lord's sake."

Arts the result of some experiments made by him on clumbing vines—the hop, the Lima bean and the morning glory. He finds that they will climb around a transparent glass pipe just as well as anything else, and they will climb around a transparent glass pipe just as well as anything else, and they was a transparent glass pipe just as well as anything else, and they was a transparent glass pipe just as well as anything else, and they was a transparent glass lite and death was upon the discharge of what appear to b simple and even unimmedicines known to me are useless when compared with the Oid German "Well done, old man," cried the king pole is warmer that the surrounding air, as he finished. When the Southern Ocean was first opened to British enterprise by the discoveries of Capt. Cook it teemed with animal life. Fur-seals and hair-seals abounded or the coasts of Australia and New Zealand a drive. They were gliding along one the same field, yielded many scabby and and on the outlying islands. They were at once set upon and killed, the slaughte being conducted without regard to sex or season. The result was a total extirpation of several species. "One might as soon expect to meet a sea-lion on London bridge naturalist to the inquiry about the seal-life that early voyagers had observed. The same result has happened at the Falkland islands, at Cape Horn, and on the Pacific seaboard of South America. A vessel called the Betsey took 1,000,000 skins from the island of Masafuera at the beginning of the century, an exploit which left no survivors for future adventurers; and the island of Juan Fernandez, where, is Ans m's time, there were seals in abunance, has now only a few stragglers to show. The same thing bappened at he took away 320,000 skins for the two years, killing males and females indiscriminately and leaving the young to die. The fate of the sperm whale might furnish a useful lesson in the same direction. It was once abundant in the southern ocean, but is now all but extinct, from the very same cause that we have pointed out above in the case of the seals. The American whalers observed its maternal affection, and found it easier to kill a mother and her cub together than a mother alone. A-few years of this policy, added to the use of steamers armed And the man whistled to his dog and with projectiles of cunning contrivance, walked out, without looking to the right and the fishing had to be given up as no longer profitable.

The Desolate Moon. essive than the utter desolation and death that reign on the chalk-like surface of this diseases. dead planet. There are no clouds to diversify the sky, no twilight to prolong the day, no sound to break the eternal silence Immense craters, deep fissures, rounded hillocks, and the scars of mighty commo tions, are all that remain of regions that were probably inhabited like the earth in times gone by. The view on the Termina-tor was the most interesting. Instead of the unbroken line of light that marks its cover it. Let it stand until cold and then appearance to the naked eye, the moon's bathe the face with it, only patting the rough edge was formed of branching horns of radiant light, like the antlers of a stag or huge formations of corai. These were the summits of lunar mountains, lighted up by the sun, which was just rising to this bart of the moon. The bright mountain peaks were weird and wonderful, as well as beautiful, though their only admirers were observed two hundred and forty thou-

HUMOROUS.

A New England woman was the muc disappointed wife of a Harvard University geologist. She was all poetry and imagin ation; he was all poetry and imagin-ation; he was all paleontology and geo-logical research. Upon a certain occasion, when his scientific accomplishments were being praised in the presence of a stranger, the latter turned to her and said:

"May I ask, madame, what your hus-"Certainly," she answered frankly, "he band is?" is a relic of the stone age."

COL McSPIKINS came home late from he lodge the other night and raised a mis-

chief of a row.

An elderly gentleman says to a little miss of seven:

"Say, sissy, wll you marry me?" The child, taking the proposition grave-"Come, sissy, says her mother,

you marry the gentleman?" "Yes'm, but—(aside)—ma, 1'd like newer husband."

[Quincy, (III.) Daily Herald.]

Speaking "by the Card" C. H. Wood, Esq., of the C. & T. Ry., Port Huron, Mich., favors our correspondent with the following: After suffering for nearly a year with rheumatism, receiving treatment from most of the best physicians of Michigan and the West, I happened to try a bottle of St. Jacob's Oil. Upon the first application I used fully half a first application I used fully half a bottle, and its effect was almost instantaneous. I immediately dropped all other treatment, and confined myself to its use alone. After the use of three bottles, instead of being driven to my business, or moving about on crutches, I walked from one to three miles daily about business, and have been free from this horrible disease for medicines known to me are useless when compared with the Old German remedy. Use this statement when and where it suits.

A New night attendant is on duty at the telephone exchange whose voice has been speiled by too much fertilization. It is as usical as a buzz saw. And then, worse than all, he puts his mouth so close to the transmitter that one gets and awful dose of double distilled cigarette fetor, which is most devilish unpleasant. The day operator seems to be a much nicer young man, has a tenor voice and a sweet breath.

A Missouri baby has been named Mazin Grace. A neighbor asked the mother how she happened to give the child such a name, "Why I got it out of the hymn book." The neighbor said she never saw the name in any hymn book she had used. "You haven't," said the mother of Mazin Grace, "why don't you recollect that familiar old hymn, commencing, Mazin Grace how sweet the sound?"

WHEN we stop to gaze upon the trees, cabbage plants and everything else which is green at present, something calls to memory the little trip we took not many years ago, when we thought we were "some pumpkins." We walked fifteen and one-eighth miles into the country to see our girl, and, after arriving at her house, the girl's mother gave us a piece of cheese and a cracker and said, "Now, run home, sonny, like a good boy." Fact is stranger than fiction.

TO REMOVE GREASE STAINS FROM WOOD. Spread some starch powder over the hot flat-iron till you have drawn the grease; then scrape with a glass or Mirrors should not be hung where the sun proper scraper, and repeat the starch powder and hot iron. Ammonia liquor may

He must have a big spoon that will estice cream with a young lady.

Microscopic Structure of Metals .- Notwithstanding the great opacity of metals, it is quite possible to procure, by chemical means, metallic leaves iently thin to examine beneath silver leaf may also be conveniently and suggested that the examined by converting it into a tranobtained in leaf form. An examination of such metallic sections, says Mr. Elsden, will show two principal types of structure, one being essentially granular and the other fibrous. The granular metals (of which tin may be taken as an example) present the appearance of exceedingly minute grains, each being perfectly isolated from its neighbor by still smaller interspaces. The cohesion of such leaves is very small. The fibrous metals on the mall. The fibrous metals, on other hand, such as silver and gold, have a very marked structure. Silver, especially, has the appearance of a mass of fine elongated fibers, which are matted and interlaced in a manner which much resembles harr. In gold, this fibrous structure, though present, is far less marked. The influence of extreme pressure upon gold and silver seems to be, therefore, to develop a seems to be, therefore, to develop a definite internal structure. Gold and silver, in fact, appear to have in some respects like plastic bedies. When forced to spread out in the direction of least resistance their molecules do not move uniformly, but neighboring molecules, having different velocities.

The curse selected by Br. Flower within the last week are truly miranilous. Discuse has been brought to a stand-still by this wonderful man.

The Philadelphia Mercary of Nov. 21, 1886, says—
Over two hundred and fifty naticals were turned away last week by Dr. Flower.

Dr. Gurard, of New York, once opposed to Dr. Flower's system, after investigating the same for himself, declared through the trees—that in the work of healing—the work which I am compelled to believe, Dr. Flower has been called to and seems to be more than man in this work. He must be the wonder of wonders. I have seen him cure the dying instantly, and bring them from the throse of dath in a few minutes.

Br. Flower can be consulted at either of the above places, either through correspondence or by personal application. If a personal interview is desired, arrangements should be made in advance.

The demand of the people for an easier method of preparing Ridney-Wort has induced the proprietors, the well-known wholesale druggiats, Wells, Richardson & Co., of Burlington, Vt., to prepare it for sale in liquid form as well as in dry form. It saves all the labor of preparing, and as it is equally efficient it is preferred by many persons. Ridney-Wort always and everywhere proves itself a perfect remedy.—Burralo Naws.
