"Do you often get left by not drawing the rule too tight?"

"Oh, yes," the clerk replied, while another, who was standing near, laughed long and loudly. "Before I came here an old gentleman, or rather a d—d old seoundrel, took me in nicely. He looked so good, and venerable, and noble-like, you know. He registered his name, and then he told me that his son had left him at New York, expecting to be in St. Louis as soon as he was, that he expected him in that night, that he was unable to get along without Charlie's care, and all that kind of thing. After perfume strikes the door to enter, the perfume strikes the gain, and in some way he found out that I used the strictly fine cheese, the perfume of the pine, and in some way he found out that I used the strictly apparent; again, we that he expected him in that night, that he was unable to get along without Charlie's care, and all that kind of thing. After dimer the came down to inquire again, and in some way he found out that I used the late that the care and in some way he found out that I used the late that the care and the care and in cold weather a double as the care, the perfume of the pine, and in some way he found out that I used the late that the care and in cold weather a double as the care and all that kind of thing. After all the kind of thing. After all the care and all that kind of thing. After all the care and all that kind of thing. After all the care and all that kind of thing. After all the care and the care and all that kind of thing. After all the care and the c and in some way he found out that I used to live down East, and he soon knew all stuck on the old rooster. He remained three days without putting up anything, and the proprietor began to kick, but I said, "All right, I'll be responsible," and then he said, "All right," On the fifth day, the old gentleman, I mean the—well, never mind—showed me a telegram from his bon dated Chicago, and spice of the season is proposed for unless all other exterior signs of cleanliness and care correspond. It will not be found in connection with about me. Well, I guess I got kind of licately subtle exhalation of cheese cuds, signs of cleanliness and care correspond. It will not be found in connection with asking should be come on. The old cracked, leaky cheese, or in a room where whole thing. the floor is all spotted over whith whey which he immediately sent, telling him to come at once. That afternoon the old man thought he would take a walk, inquired about the Court-house and are said to be trying to cultivate and stimother public buildings here, sauntered ulate the growth of the plant known as down Fifth street leisurely and was never seen again. He cost me \$23 75."

Dominion. It grows annually from seed, and induce the presence of wild fowl in "Did you ever near from him?" and extensive beds of food. Sportsmen's "No. I never expected to, I teleclubs are also taking means to extend its graphed the house in Chicago where he growth, as it attracts game of all kinds. said his son was staying, and I found In some places, where it grows prolifically, that another fellow about his age had it has been cut before seed time by manufractures, who find its fibre, taken from been working the same racket there, been working the same racket there, waiting for his father and all that. They played it fine on both of us, but the under surface of the water to a depth of six or seven feet, to be very valuable. It affords, it is said the strongest they are dried; all the thin-leaved flowers it will be found best to use for this purpose.

shed his collar, and his shirt was by no means as clean as it ought to be. He be equivalent to 92 per cent. of dry hay registered, said nothing about a check, only 8 per cent. from the atmosphere and only 8 per cent. from the soil. and was sent up stairs. By and by I wrote him a short note and sent it up by the bell-boy, stating that it was customary with people who had no baggage to started on July 1 for an expedition of scien-pay their bills beforehand. He told the boy he would be down presently, ject of this expedition is to determine by and sure enough down he came. He excused himself, said he had forgotten about his checks and handed me over four of them. Then he asked me if I would keep a little property for him in direction. To attain its special object the the safe, and of course I said yes. He began to disgorge, and you bet I opened my eyes. First he hauled out a roll of 'centuries' in which there must have been at least one hundred bills. He followed this by raking out rolls from nearly every pocket he had, and then giving me nearly \$2,000 worth of diamonds belonging to his wife to put away for him. I was very much set back. He never even smiled, never remarked that he guessed he was good for his bill, never showed the least signs of being angry about my suspicions against him. If he had gone to the proprietor and made a kick, you see I would be in a 'd—l' of a fix."

zonia and Southern California. Two adjacent stations will be selected, respectively at heights of 8,000 and 14,000 feet, for purposes of comparsion through their thick nesses of atmosphere. Lass of experiments a curious conclusion which Professor Langeley has already arrived at, to the effect that the sun is not really a white, or yellow, of even a red object, but that sunlight is in reality a deep blue. The proof that we have a blue sun is, however, somewhat conclusive at present, but this expedition is likely to add to the strength of the proof. This is not merely a subject of curious inbeen at least one hundred bills. He zonia and Southern California. Two adja-

"Well, hotel proprietors are usually very queer in their ways. Anything those questions of scientific meteorology that goes well is all right, and vice which have a special bearing on climate, versa. The clerk must shoulder all the and hence upon agriculture and other pracresponsibility. If you let a man pass, deceived by his appearance, and he deceived by his appearance, and he bilks you, you are to blame. If on the other hand you draw the rein too close and some guest like the one I just told you about gets pinched and mad and squeals to the proprietor, then you also catch blazes. So you are on the tentions to cooperate in carrying out the scheme of simultaneous meteorological, magnetical, and other physical observations in the Arctic regions. These countries have already intimated their intention to cooperate in carrying out the scheme of simultaneous meteorological, magnetical, and other physical observations in the Arctic regions.

"Well, no, although every house gets a deal of this standard ruse now and Barrow and in Lady Franklin Bay. Should then. I am glad to say that it is dying other countries send in their adhesion to out to some extent."

"What is the usual racket now?"
"Oh, notes, drafts, etc., which they deposit as station in the Island of South Georgia, want cashed, or which they deposit as and France a station at Cape Horn. An collateral. We take all that kind of interesting feature in the scheme is that

"Excuse me, sir, but have you a check?"

"See, here it is," and the guest passed of "Yes, here it is," and the guest passed out his little brass ticke to the clerk to a reporter who was standing by. "It's middle of August to the Middle of August

GREATINS FOR WITTER BLOOM

WILD RICE. -The Canadian government

Is Sunlight Blue !- Professor S. 1

MANY housekeepers waste a great deal of bread by throwing away all the pieces; here are some of the ways to use them up: Bread pudding may be made much more palatable by putting the yolks of two or three eggs in the pudding, and reserving the whites; when baked, spread jelly or any kind of sauce over the top; beat the whites stiff, add a little sugar, set in the "wild rice" in all the inland waters of the ven and let brown.

To PRESS FLOWERS. - Gather the flowers to be pressed when the dew has quite dried off from them, and before the sun has betaken from between newspapers or any other porous water to a papers, and place them under a press; be very valu-

you not?"

Most farmers probably believe that the great bulk of the constituents of their starch rough.—For the benefit of our of the very latest and best modes of making starch polish: Spermacett, 1 part; gum arabic, water, 21; parts, and a sufficient part mistake. Take, for instance, a hay or pasture field. The carbon, hydrogen and oxygen of the plants are designed. About three teampoonfuls of this gen and oxygen of the plants are derived from the atmosphere, the nitrogen and mineral matter from the soil. This would muision are required for about one-quarter

of muslin large enough to cover the top of a tumbler and extend an inch over its side, like the paper cover to a preser re jar. The this securely round the tumbler with a bit of cord or string. Lay the ice upon the top of the muslin, even if it is a large lump and stands up quite high. Do not cover it

CUSTARD PIR.-Line a deep plate with pie crust and fill with custard made of one int of milk, three eggs, three tables fuls of white sugar and a pinch of salt; flavor with nutmeg; bake until firm in the enter; this you can tell by inserting the handle of a teaspoon; do not let the over get hot enough to boil it.

Boilers FROM FROTHING .- Put red or tan oak bark into the tank till it becomes colored, and when it becomes clear, renew A sure preventive. Gum gambria is the extract from red oak tan bark.

CUBE FOR EARACHE. -Take a tobe pipe, place a wad of cotton in a bowl, drop eight or ten drops of chloroform and cover with more cotton, place stem to afflicted

Some Throat.—Dissolve one drachm chlorate potash in half a pint of water, and gargle the throat therewith; a few applications will allay inflamation. AMERICAN BOILED OIL.—To one gallon

This is not merely a subject of curious in-quiry. If our atmosphere in reality has played the part of yelloy glasses, it follows that an enormous proportion of the sun's heat has never been taken into account in of linseed oil add eight ounces rosin, twelve ounces litharge, three ounces sulphate of zinc; boil three hours. To TEMPER A VERY FINE WATCH DRILL

After heating it in a spirit lamp, imme-diately stick the drill, or any fine article,

To REMOVE TAR.—Rub well with clean ard, afterwards wash with soap and warm water. Apply this either to hands or TOOTH-AGHE CURE,-Alcohol of thirty

three degrees, one ounce; opium in powder twenty grains; oil of cloves eighty drops. magnetical, and other physical observa-tions in the Arctic regions. These coun-tries, with the proposed stations, are Den-mark at Upernivik. Norway in Finmark, Austria-Hungary in Jan Mayen, or perhaps East Greenland, Russia in Nowaya Zemyla WASHING FLUID. -One pound of sal sods. one pound of potash, each dissolved in one gallon (separately,) then mix together and and at the mouth of the Lens, Sweden in

FRIED CAKES.—Two cups of butter-milk, two eggs, two cups of sugar, one teaspoon-ful of saleratus, a punch of ginger. Fry in

The Fireplace in Summer. The aching void of a black and empty replace in summer has proved a source of eollateral. We take all that kind of thing, as a usual rule, but before the guest has turned his back to go up-stairs we have begun to telegraph to find out all about him. In this manner we prevent him getting in on us very heavily."

"Is this item of loss a large one?"

"Yes, larger than you would think. In some of the Eastern houses it runs from set 000 to \$5,000 a year. To this interesting feature in the scheme is that two of the eight proposed Arctic stations annovance to many generations of sensitive housekeepers, and various ingenious contrivances have been evolved to render its yawning blackness less oppressive. It may be that practical unimaginative minds the station in Splitzbergen, by M. L. O. Smith, of Stockholm.

A most important discovery has been made to look picturesque or artistic. Yet an English writer enthusiastically describes such a cold fire apparently waiting the application of the match. Slightly protruding between the lower bars was a crumpled from \$4,000 to \$5,000 a year. To this ought to be added the couple of thousands of dollars paid to extra help to watch this class.

"How is class.
"Well, there are not so many slick ones traveling here as in the East. The houses here get pinched some, however, and often pretty bad. I should judge that the average for the larger houses in St. Louis would be about \$1,500 a year. Some of them, now employ special letectives, but it seams impossible to "Imiinate the 'dead-beat."

'it is seventy miles northwest of Madrid, the miners fo and an entrance into an immense cavern in which they found upon an argillacceus deposit, and in the midst of stalagmites 500 skeletons of men and women. Ten perfect and wellshaped and perfect skulls of a prehistoric type have been obtained for its shape and often pretty bad. I should judge that the average for the larger houses in St. Louis would be about \$1,500 a year. Some of them, now employ special letectives, but it seams impossible to 'Imiinate the 'dead-beat." ng between the lower bars was a crumpled piece of greenish tinted paper; over this ay a small faggot, with its binding loosed,

Vegetine

Has Not its Equal.

Lung Disease.

SRIMA, ALA., May 12, 1872.

H. R. STEVENS, Boston, Mass:

I take great pleasure in recommending your Vegetine. I have been suffering for a long time with the Lung Disease; trying every kind of medicine that I could get, but none seemed to do me any good, until Ittied your great Vegetine remedy. I had used it only a short time before I could discover a very great change in my health for the better. I don't consider that your medicine has its equal, for the disease which you propose to cure, especially the diseases that I have been afflicted with.

Buppalo, Dec. 27, 1878.

Mr. H. R. Struens:

Dear Sir—I reside at No. 745 Niagara Street, of this city. I am 69 years of age. For several years past i have been in feeble health. My compliant is what the doctors call General Debuttry of the system. At times I suffered severe pains in my side and back. I used a number of remedies without receiving any relief. My attention was called to your advertisement of Vederines in our paper. I made up my mind to try the Vederine, sent and bought some. It seemed to bein me from the first, and in a short time my health improved. I have used a number of bottles, and am now enjoying better health than I have for a number of years. I have recommended the Vegerine to my sister and also to several acquaintances, and they have used it with equally good results. It is the best medicine for Weakness and General Debility of the system that I know of, and I do with great confidence recommend it to all my friends as a good medicine. I would also state that for a great many years I have been a sufferer from Rheamatism, and since I commenced using the Vegerine, I have had but very little trouble from it.

Yours, respectfully, Mes. Samuel Greene. does." "Did she ever say so?" "Many a time, my son." "Did she marry you be-cause she loved you?""Certainly she did." The boy carefully scrutinized his parent, and, after a long pause, asked, "Well was she as near-sighted then as she is now?"

Expose yourself day and night, eat too much without exercise; work to hard without rest; doctor all the time; take all vile nostrums advertised; and then you will want to know How to get Well.

George I., on a journey to Hanover, stopped at a village in Holland, and while the horses were getting ready, he asked for two or three eggs, which were brought to him and charged 200 florins. "How is this!" said his Majesty. "Eggs must be very scarce at this place." Pardon me," said the host, "eggs are plentiful enough, but kings are scarce." but kings are scarce:"

One of the recent German inventions consists of a new kind of cloth, which is composed principally or entirely of sponge. In its manufacture the sponges are first thoroughly beaten with a heavy hammer, in order to crush all the mineral and vegetable impurities, so that they can be easily washed out; they are then pared with a sharp kufe, the paring being sewed together. The fabric which is thus obtained is described as being free from all the danger which sometimes arises from absorption of poisonous dyes into the system; it absorbs without checking the perspiration, to as to dimainsh the danger of taking cold; it is a conductor, and therefore helps to maintain a uniform surface temperature; it can be more readily cleansed than the ordinary woolen garments; its flexibility decreases the liability of chafing; and the case with which it can be employed in sheet, stockings, drawers, undershirts and other articles of clothing, will, it is thought, render the new material especially useful as a protection against rheumatic and pulmonary attacks.

YOU CAN BUY THE BLATCHLEY Unlined, or with Copper, Porcelain, or Irea Linkings. Each one stenciled with my name a manufacturer is warranted in material and con struction. For sale by the best houses in the trade. If you do not know where to get this pump, write to me as below, and I will sen-

CHAS. G. BLATCHLEY, Manufacturer, 308 Market St., Philadelphia, Pa. MUSIC TEACHERS

and cannot possibly find a better book for Choirs Conventions and Singing Classes, than L. O. EM-KRSON'S HERALD OF PRAISE (31.09), which is to be the leading book for 1881-1882. Success follows success in the successive issues of Emerson's books, and this is to be no exception to the rule. It is to press, and nearly ready. A less expensive book will be THE IDEAL (35 cts.), made expressly for Singing Classes, and except in size, is quite as good, and on the same plan as The Herald of Phaise.

SUNDAY SCHOOL MEN all search far and long before finding a better anday School Song Book than THE BEACON 4GHT, (30 cts) By TENNEY and HOPEAN. Or LIGHT AND LIFE. (35 cents. By R. M.
