The Mysterious Widow.

During the summer of 1814 the British had laid claim to all that portion of the district of Maine lying east of the Penobscot. Shortly before the arrival of the English squadros, Commodore Samuel Tucker had been sent around to two points to the south'ard of your Penobscot Bay to protect the American course." coasters, and while the British sailed up

to Castine he lay at Thomaston. It was a schooner that the Commodor commanded, but she was a heavy one. well armed and mann-d; and she carried the true Yankee "grit" upon her decks, of which the enemy had received from them rather too many proofs. On the morning of the 28th of August a messenger was sent down from Belfast with the intelligence that a British frigate was coming from Castine to take him. Tucker knew that the British feared him, and also that Sir John Sherbrooke had offered a large amount for his capture.

When the Commodore received the intelligence his vessel was lying at one of the low wharves, where he would have to wait two hours for the tide, but to get her off as soon as possible.

The schooner's keel was just cleared from the mud, and one of the men had been sent upon the wharf to cast off the bowline, when a wagon, drawn by one horse, came rattling down to the spot. The driver, a rough looking countryman, got out upon the wharf, and then ddle aged woman from th
