# Population from Abroad.

# The population of the United States

was increased about one per cent. last year than one-third of the immigrants landing actly as possible on the corner; but these at Castle Garden were Germads, a very lots often obtain a value which makes large proportion of whom were industrious every mch a measure of considerable gain, and frugal agricultural laborers, seeking or loss, and there are many uncertain inches homes in the West. This class as a whole, contributes an orderly and law abiding element which is readily and rapidiy as-similated. The Irish come next in order is line, beguiled by a displaced mark. of numbers, but were only about one-third as numerous as the Germans. They furnish a valuable working force, though they are rather addicted to congregating curred already for surveys and legal pro-in the cities. The English come next to ceedings without any settlement being yet the Irish in numbers, and, not withstanding made. This has put other neighbors to their attachment to inherited ideas, they looking up and securing their "corners." almost invariably become good citizens of A good plan lately pursued is to sink in our free Republic. Those who come over the ground at (under) a corner a stone of for the purpose of establishing themselves some peculiar color, from a distant source, in colonies are, indeed, of a rather superior with the exact point or corner drilled or class, and the fact that they are of the chisaled. Another stone is set upon that same blood with the founders of the first one which reaches above the surface as an colonies on these shores gives promise of indicator or finder. If it is a fence corner, a ready assimilation with the descendants a post is set on each has three or four feet of their own ancestors. Sweden has con from the corner, and the rails extend to tributed more than 35,000 to the arrivals, a sham post which stands upon the indicaand Norway has added about 14,000. They ting or surface stone, and is firmly held by are for the most part an industrious and the rails. This leaves all tidy and perfectpeaceable people, and much the same may is safe and precise. The Winter season be said of the Scotch and Welsh. of the laboring population. This is due loose. 1 also ironed a buggy for my own of the laboring population. This is due in some measure to the fact that the immigration of criminals and paupers and worthless people generally from Italy has been rather encouraged of late. The hordes of Asia poured in upon our Eastern shore to the number of something less wheel is placed on a stick so as to hang in than 400, all told, but San Francisco and the oil. An hour is sufficient for a comthe Pacific coast are yet to be heard from. mon-sized feiloe, of which the timber

tion from abroad been valuable in itselt, but with it has come a moderate accession does not get hotter than the boiling heat, of accumulated capital. The amount of else the wood might be set on fire and be this cannot be ascertained, as the immi- burned. Timber filled with oil is not susgrants are under no obligation to tell how ceptible to water and is much more durauch they have, and most of them make ble. I was much amused some years ago their exchanges on the other side before when I told a blacksmith how to keep his embarking. It is estimated that they paid thres tight by his telling me that it was a \$5 000,000 last year for railroad transpor- profitable business to tighten tires; and tation after leaving Castle Garden, and the the wagonmaker will also say that it is a Superintendent believes that the total profitable business to him to repair wheels, amount of cash brought with them was not but what will the farmer, who helps supless than \$11,000,000. This is probably port the wheelwright and smith, say? a very low estmate. The destination of the immigrant is no less interesting than their origin. They still flock in large numbers to the Northwest, where many settle on farms and aid in developing the untouched resources of the land, thereby aiding in the most affective manner to mcrease the production of wealth as well as the population of our country. Others ning and manufacturing districts on account of the characters of their previous industrial experience. Those who sink to the bottom of the social strata in the cittes and become a source of trouble

Though unprecedented in absolute volume -it bears a constantly decreasing proportion to the entire population. According to ceding decade was about thirty per cent., in the increase to our population that comes from over the sea, -N Y. Times

### AGRICULTURE.

Hanging between two small windows, and catching the light from a larger one opposite, in one of the offices of Adams by immigration abroad. Statistics are not not at hand tor other ports than New York, but the total number of arrivals was prob-able something over half a million. About able something over half a million. About 440,000 immigrants arrived at this port, or nearly nine tenths of the whole num-ber. The general character of the ar-rivals is said to be better than the sverage of the previous years. On the whole there of the previous years On the whole there is no doubt that the addition to our popu-listion is of real value. Considerably more similar lots a fence post is usually set as exa little rustic temple set in the rugged side of the mountain which rises in stupeadous proportions in the background all covered with a rank luxuriant growth of foliage in brush and tree. In the open door of this little temple stands a half concealed figure, with an arm and hand extended, holdin forth a small, dunly defined package, while seated on the sward at the foot of the steps an aged pilgrim, barefooted, lame and de-creoid, bears a staff in one hand, and in the other holds before his dim eyes a small bottie, whose label he eagerly scans. This bears the words "St. Jacobs Oil, the label Great German Remedy." Simple as this little chromo appears in its unostentatious position, it has an influence which it would be difficult to estimate. "It is to that picture and the persuasions of Mr. Hail," suit Mr. Edward J. Douglass, a gentle-man connected with Mr. Hail's department "that I owe my present ability to perform my work. Some weeks ago I was violently attacked with sciatic rheumatism, and hour by hour I grew worse, and nothing my family or the doctor could do gave me any relief. I began to think in a few days that my case was hopeless and that I was
