most of its foreign population.

rocky hills are covered with little fragrant of silver taken out of the mines.

narrow and steep. The men are small but lands of the Chihushea and Sacramento boo pole, the ends of which rest on the time for piccies and family parties. shoulders of the cooles, and they murch have seen in one party twenty pretty girls a long body; some pull and others push the day, the senoritas bringing their guiand lift, with a weird kind of song, which tars and singing all day long. on their heads. They all seem happy and ears. There is no riot or drunkenness on carrying passengers and others freight.

them over the coals. They certainly know kind to their servants. how to cook fish, for when you have tasted, you are sure to call for more.

The mechanics and artisans are ingenious; doing excellent work with a very few overlaying of wood, silver and steel rival the best work done in Paris or Berlin. Their bronze work is very beautiful. They cast birds and insects so perfectly that and make no pretens ons of the kind, but in drawing birds, insects and flowers they hus an could never surpess them. The ivory carving and ornamentation that has and beauty of workmanship.

Agriculture is an art here, and there is ted. If the hills are steen, they are terraced and made into beds and cultivated in a perfect manner. Everything that will enrich the land is collected with the greatest care and applied in the manner that brings the best result. Rice is the most important crop raised, but wheat, barley, fuses the inner layers and the rest falls to peas, beans and rve are cuitivated in large quantities. They cultivate all the vegetables that we raise,—potatoes, turnips, strikes the sir. The height at which mecarrots, beets, radishes, tettuce, melons, teors usually begin to be visible has been cucumbers, squashes, pumpkins, and many

A Voice from the Press.

I take this opportunity to bear testimo ny to the efficacy of your "Hop Bitters." Expecting to find them nauseous and bitter and composed of bad whiskey, we were agreeably surprised at their mild taste just like a cup of tea. A Mrs. Cresswel and a Mrs. Cornor, friends, have likewise tried, and pronounce them the best me dicines they have ever taken for building up strength and toning up the system. was troubled with costiveness, headache

WHEN two gentlemen fell out with this is the case no time should be lost in putting in the mower or seythe. By cutting early, lodging will be prevented and and fill in water. When the borax is next day, when they met by accident, and fill in water. When the borax is next day, when they met by accident, the grass or clover a second time, but it is much easier to harvest two crops that stand upright than one that is stretched out on the bottle. It is very cleansing and very healthy. By its use the hands will be kept in excelle t condition, smooth, where the surface of the ground. With the present means for harvesting the have crop the SPRING AND SUMMER MEDICINE. this morning when I came out of the house I saw your name written on my door.

Asthma and Hay Fever.

The L. A. Knight Company, 697 Broadway, New York city, advertise to send free on application Knight's new treatise on "Asthma and Hay Fever-their Cause and Cure." It is ably written and contains a great many valuable suggestions to those who suffer from these distressing diseases. See testunoura's of Knight's Asthma Cure in another column.

A TIMID Bostonian has married a lady "My dear," said he to her, "shall I help you over the fence?" "No, says she to him, "help the fence."

Well Once More. 541 EAST ARCH STREET POTTSVILLE, Pa., Sept. 22, 1881. }
H. H. Warner & Co.: Sirs-I have suffered for many years with inflamma-tion of the kidneys and bladder, and have never found anything that would give me any relief except your safe Kidney and Liver Cure, Mrs. Mary Stager.

Liver Cure, A good idea: An Irish gentleman hearing of a friend having a stone coffin made for himself, exclaimed: "Be me sowl, an' that's a good idea! Shure an' a stone coffin 'nd last a man his lifetime.

to the air is due to sulphurened hydrogen, the metal having a strong attraction for The mineral tantalite, which some ser

entific journals are reporting as having een recently, and for the first time found in the United States, and which is known technically as tantalum, and Columbium was long since discovered near New London, Conn. One of the very names by which the mineral is called, clearly incicates, as was intend d, its American origin.

Vegetable ivory, now so extensively imployed in the manufacture of buttons s made from a hard, fine-grained nut, grown on the Isthmus of Darien. These nuts, which are about the size of a hen's egg, are sawed into several pieces, from each of which different sized buttons are turned. The nuts cost \$100 per ton.

Rice vs. Maize in Browing -Accord-

ing to published analyses, perfectly dry maize contains 671 per cent. of starch and 4 per cent of intermediate carbohydrates, or a total of 714 per cent of sugar producing constituents; but dry rice contains 89 per cent. of starch and I per cent. of in termediate bodies, making a total of 90 per cent. For the purpose of our present argument we may ignore the other consti tuents of the two materials, for they have either to be removed prior to mashing or they are insoluble, or have to be rendere insoluble during the mashing proces; incidentally we may mention that the existence of large percentages of fatty and albuminoid substances in maize co mstrut an objection to this material for brewing purposes, for these constituents having to be removed there is a danger of some por tion remaining, and thus deteriorating the wort. Now, taking the present market price of maize at 6s. 61. per cental, a rice at 7s. 6d. per cwt., excluding the moisture, maize now costs 7s. 41, per pounds, and rice Sa. 5d.per cwt., or 7s.6d. per 100 pounds; we then find by simple calculation that every pound of available soccharine extract from maize costs 1.23 of a penny, or about 1-d., while a pound of available extract from rice costs one penuy, that is 20 per cent less. The co t of working the two materials is as nearly as possible the same, for the expense sec arating the fatty and albuminous constituents of maize is just about covered by the value of these constituents for other pur-poses. Our calculations are, of course, based upon the present relative prices of the two meterials, and the tendency of the market is toward a still further increase in the price of maize. As to the quality of the extract, we consider there is nothin to choose between rice and maize, provided the latter is submitted to the necessary

A NOTED BUT UNTITLED WOMAN. [From the Boston Gleck.]

The best of reasons: A story is told of an old gentleman who always took notes of his minister's sermon and on one occasion read there to the minister himself.

"Stop, stop!" said he, at the occurrence of a certain sentence, "I didn't say that."

"I know you didn't," was the reply, "I put that in myself to make sense,"

"Men must work and women weep, So runs the world away!"

But they need not weep so much if they use Dr. Pierce's "Favorite Prescription," which cures all the painful maladies peculiar to women. Sold by druggists.
