### The Ideal Sexton

### AGRICULTURE.

an undemable fact, but clover is much bet-

"First .- You have not yet learned how to make the church hot and cool ter for feeding to cattie than to horses, and even a mixture of timothy does not help at the same time. You must learn how the case, as the two do not ripen together. to have one pew mark 75 degrees Fahrenheit, while the next one to it is down to a point where it would be comfortable for an Eskimo, "Second.-You do not seem to know

how to have a free circulation, a plenty of fresh air, and yet not have any draught anywhere. You must invent some way to make all the draughts skip the pews where rheumatic and baldheaded people sit.

"Third .- You have not yet acquired the art of having the church flooded with light while all the blinds are shut at the same time. This should be at- is a httle moist, a crop of red top or herd's tended to at once, and you should not grass would add to the variety of the hay offer any such poor excuse as that is it crop. This grass, by its running roots, impossible. To a sexton nothing should soon forms a thick sod, and is permanent. Blue grass is best adapted to limestone soils. It should not be grazest close, but be impossible.

way of giving everybody the best seat, right in the centre of the house, no matter whether the pews are already filled or not. "Fifth, —You must learn how to fill all the pews with strangers without making anybody 'mad' about it, and at

making anybody 'mad' about it, and at of manure, but it is just as easy to grow the same time have plenty of room left crop of mixed hay as it is to grow a crop of a single kind. There are grasses that for regular pew-holders.

"Sixth. —And finally, you will spend your leisure time in inventing a patent church that shall be just warm enough. and not too warm; not too light, but sown is different localities and mixed in just light enough; not too draughty, the cutting-box. It is the possession of but just with draught enough; where mixed hay that enables the farmer to feed all the people, whatever their mental, moral, or physical condition, will be perfectly comfortable, and-erowning achievement of all that shall have all the seats in the middle.

"What is the sexton for, snyhow, if he can't please everybody at the same way can the most satisfactory results be

Zylepite,

for that reason; but we are enabled to use less grain when the hay consists of several kinds. Animals are induced to eat with One of the most remarkable uses to which paper has been put of late years is the manufacture of zylonite, a sub- keener relish when given a variety, and their health and general condition are prostance which, at the will of the manufacmoted thereby. Again, it must not be overlooked that much larger average crops turer, may be made in imitation of horn, rubber, ivory, tortoise shell, amber and can be obtained from a variety, as the The uses to which zylonite are adaptable ars almost infinite, but danger from drought is somewhat lessened all grasses not being affected alike. perhaps the most extraordinary is

the manufacturer of cathedral windows. The discovery was made by an Englishman name Spills, about fifteen believe in the forced growth of trees on years ago, but it was only about five lands which are not ready for it. If the years ago that a company was formed farmer plants trees on sed lands he robs basis of zylonite is a plain white tissue paper, made from cotton or cotton and inen rags. The paper being treated this for the reason that the subsoil of sod in this for the reason that the subsoil of sod it is a plain white tissue acking in vitality, the wood loose and spongy, or hard and non-compustible, and this for the reason that the subsoil of sod if tiked; boil and mash some potatoes, in London for its manufacture. The the soil and yet only produces a growth first with a bath of sulphuric and land is not in a state to feed a heav-other acids, undergoes a chemical ier growth than that of weed and sage-and roll out, dredging with flour; cut change. The acid is then carefully brush. There is a course following nature round with a saucer; put some of the washed out and the paper treated with to be pursued in this matter of broducing another preparation of alcohol and camchange the order of conditions. The soil fry a light brown. phor. After this it assumes an appearance very much like parchiment. It which produces timber must be able to is then capable of being worked up into throw off acids in a constant and healthy is then capable of being worked up into plates of any thickness, rendered almost perfectly transparent or given any of the brilliant colors that silk will take, these reasons sumac attracts moisture and these reasons sumac attracts moisture than any these traction degree than any

tins and bake them.

oakes raised with yeast.

DOMESTIC.

Josiah H Haywood, sexton at the Church of the Unity, Boston, has re-cently celebrated his silver welding. Among the incidents of the festive contait with clover and timothy for bay to from the Rev. M. J. Savage, his Pastor, in which he said: "I propose, therefore—entirely for your own good—to suggest a few faults. If you can command asalary of \$10,000 a year, or perhaps earn more than that by travelling with Barnum as the great est curiosity of the age. The faulta1 allade to are such as these: "First.—You have not yet learned

soup to it to heat up. When served cut up half a lemon in very thin slices and lay in the bottom of the tureen, pouring Blivens to his son; "don't tell me that the soup, boiling over them. yeu don't care anything about what Orchard grass, which comes into blossom with clover, will grow on light dry soils, and has the merit of furnishing successive with half a pint of mulk. Beat up well with clover will grow on light dry soils, and has the merit of furnishing successive with half a pint of mulk. Beat up well must remember that they were my anwith clover, will grow on light dry sons, and has the merit of furnshing successive cuttings. It is not recommended here to discard timothy, for it is too valuable, but why should farmers deny themselves the advantage of sowing a more suitable grass

HUMOBOUS,

with their clover? Orchard grass is a more permanent grass than timothy; continues to give two crops each year for several seasons, and grows early, being among the first of our crops to start off in the spring, which makes it valuable for early pastur-age. On good, rich land, especially if it is a hitle meist, a crop of red top or herd's sufficiently cooked on the other side, his mother. "Oh, it's such tun?" he self)--"Well, and how did you like my turn it on to a hot dish and serve. exclaimed. "What's such fun?" gravely young curate's sermon?" Mrs. Robinson

These answering an advertisement will confer a favor upon the advertiser and the publisher by stating that they saw thead vertisement in this journel, canning pap

to accomplish. To regulate the liver, stomach, and bowels, all you need is "Sellers' Liver Pills." Take them and see. A caution to solar observers is given by Mr. J. F. Campbell, In the course of his own work, a first class sample of black glass was set with a bit of white paper be-hind it and exposed for an instant to the focus of a seven inch lens. The paper

was charred where an eye would be placed. A longer exposure of a few seconds caused the glass to burst asunder. It may easily be unagined what the fate of the human eye would be. Warner's Safe Kidney and Liver Cure.

easy it would be if vague suggestions could be at ouce realized! Notwithstanding all that, it is not outside of the line of probability that some time or other the front door of a house and the most attractive por ion of a habitation will be on the roof. Vegetine -By its use you will preven
