ney rather thin, after having stripped off the skin and removed the fat; season it CARE OF HORRES IN WINTER, -- In warm property-ventilated stables, it is doubiful with peoper, salt and grated nutmeg and they were ten years ago, and the main cause of this falling off seems to be the over-haste shown in despatching tea from the fields to the market. The principal object with both the Chinese they were ten years ago, and the main whether horses ought to be blanketed, byt principal object with both the Chinese and the Euglish merchants in China appears to be not to send the best tea so much like human beings, they take cold white wine; bring the sauce to the point much as the earliest tea on to the market. If persisted in this must prove a suicidal policy. There are, no doubt, several to stand long in cold weather in a sweaved policy is a suicidal to stand long in cold weather in a sweaved pour the whole into a hot dish garnered other reasons. It must also be borne in condi ion without being blanketed. Masy with fried bread.

horses are ruined by exposure and drink-INDIAN LIGHT BISCUIT .- One quart of sifted Indian meal, a pint of sifted wheat flour, a very small teaspoonful of salt, three pints of milk, four eggs. Butter They left without pavin', miss." persons have to derive a profit before it The average farmer is slow to learn the flour, a very small teaspoonful of salt, And when I think the matter over I am reaches the cup of the consumer. The value of carrots for horses, and still slower three pints of milk, four eggs. Butter rather inclined to be of the same opinion. Chinese Government derives by the export duty about 3¹/₂d, from each so nutritious that livery men and sometimes tins; nearly fill them with the batter. tins; nearly fill them with the batter.

others feed considerable quantities regu-iarly to their horses tastead of grain. Many and bake them fast. Turn them out of consider that 4 quarts of osts and the same the cups, and send them warm to the of carrots, are as good a feed for a horse table, pull them open and eat with butas 8 quarts of cats, and hor es that are ter. They will puff up finely if, at the worked nittle more than for mere exercise, last, you stir in a level teaspoonful of will keep in good condition and look sleek soda, melted in a little warm water.

and smooth on hay and carrots alone. An BROILED QUAIL .- Pick them carefully occasional feed of raw potatoes is also good so as not to break the skin; split each one down the back and baste with melted butter; then broil over a bed of live coals and baste twice while cooking. As

soon as done lay each bird on a thin shee of buttered toast, sprinkle with GOOSEBERETES delight in a Leavy soil, rich and well drained. When grown in pepper and sait, put a little more butter the single bush form the berries become and a tesspoonfal of currant jelly on each dish and serve immediately. TAPIOCA CREAM. -Fourta blespoons of of shoots from the root by removing the tapioca, one-half pint of water; put the

old wood as often as necessary, and larger crops and much finer frunt will invariably be the result, whether in garden or in field tapioca in the water, then put it in the dish in hot water, and set it over the fire, sturring occasionally till_it is soft. Put in a quart of milk, let it scald, then add the yorks of three eggs, and one-WHEN a farmer finds some new kind of half cup sugar; flayor; when cold, spread insect, beetle or worm with whose habits over the whites of the eggs, beaten stiff,
