Thirsty People.

the great agony. There spears to be no init to their efforts to queach thirst while thus saffering Others have an appetite for dink, and togatisfy the ap-petite resort to all manner of means. Soldiers on the march, under a broiting sum and over a dusty road, suffer more, probably, than any other class. In our entry, on gala days during the heated term, how refreshing is a glass of lemon-ade to the sweltering soldier or ordinary pedietire. The sumplest and best restand heat term, how refreshing is a glass of lemon-ade to the sweltering soldier store, we have seen the soldier store. pedestran? On the march, in active service, we have seen the soldier stop by the roadside and moisten his parched his and throat from a slimy pool of water which was almost unfit for beasts. We have seen gallant lives sacrified during the late war in efforts to obtam water to quench the thirst of pickets. The springs were in range of the rifles of the rebel sharpshooters, and the sol-dier who escaped with his well-filled dier who escaped with his well-filled canteen was most fortunate. silver probe should be warmed before it is to a hot platter, lay the pork on it, and

Not long since a novel cane was in use among attendants at places of public introduced. a musement, from the side of which the holder could secure a drink for himself or friends at any time during the performance.

serve them until spring they must be kept of the theater, and could not get out for a drink. He saw a friend in the orches-tra whom he begged to relieve his thirst. narty who was hemmed in in the gallery tra whom he begged to relieve his thirst. The man in the gallery was not at a loss for means borhoods sometimes have a single store-ing the height at which his pictures are ing the height at which his pictures are me?" 'Yes; what made you goan so?" under such trying circumstances, and promptly met the emergency. He asked the crowd if any one had a string in their pocket. A youth who had been out fish-ing during the day produced his line. promptly met the emergency. He asked were the straw. The best factor perhaps, ing during the day produced his line, The man in the orchestra was notified, filing the spaces between them with sand and soon thereafter a bottle was seen or perfectly dry dirt. No potato must touch or perfectly dry dirt. No potato must touch circie. The man in the gallery had a

racket all to himself during the balance of the night.

But there are other methods even tous question that is said to be agitating But there are other methods even more ingenious than this to gratify the appetite and guard against thirst. The most novel device we have yet seen is the one of the owner o the opera-glass whisky flask. In its use two and one-eight pounds. The breeds It is no unusual sight to see a small the opera-glass whisky flask. In its use no one would believe it else than an opera glass, yet it helds a good half pint of whisky. For use in a crowded an dienee it is a very handy thing to have, as the holders are not obliged to go out-side for a drink between the acts. It can be used as an opera glass with or without taking a drink. If you want take a drink there is a spring that you touch with a finger, when a silver tube touch with a finger, when a silver tube drops into the month and the whisky flows easily. It works best when the by weight.

glass is pointed up at the gallery. The

glass is pointed up at the gallery. The other evening the opera glass whisky flask passed between two men and one woman at the theater who would alter-nate in looking up at some imaginary nate in looking up at some imaginary friend in the gallery. Before the per-formance was over the flask ran dry, and they were in a quandary. But they had drank sufficient to sharpen the ap-petite for more, and it was not long be-fore the flask was replenished by some of "Phil's" best. These people did not of "Phil's" best. These people did not cause much annoyance by running out from wase during the Winter by storing oven, while a tablespoonful of flour is A Risky Experiment.-A curious and boiled for two minutes in the gravy; httle-known experiment, showing the reout by decay in the following year." their corn-juice was to perceptible in their immidiate vicinity that some peo-

Mixed Farming.

Complete mixed farming comprises much more than most people imagine. Many mere theorists who never had any experience in tarming whatever, often men experience in tarming whatever, often men of the best kind of sense in regard to their own tusiness, think that a farmer that has never cultivated anything but cotton, corn, potatizes and field neas, can leap right into mixed farming in one season, without money, or credit, or provisions, or corn, or bay and he successful. All the secret season an mean reason are season, the secret season are season and here the successful are season are season. This is especially important it is to make a rice pudding to-day and is to make a rice pudding to-day and reserve half a cupful of the cooked rice for to-morrow's waffies. To this quan-tity add a pint of sweet milk, the yolks of three eggs, two ounces of butter (soll are into the secret meth a good-sized lump) add a hitle sait. Mix half a teaspoonful of soda with one hay, and be successful. Mixed farming ed with weeds, For this reason no manure may and labor to start with unless very fine should be spilled on the put of flour, beat these all together and ous injury to the thumb. While M. Colmore than most farmers can command. A surface to clover while young.
