The trees strip of wood about three mehes high is must be sh litered from cold winds and gen rally nailed across the bottom of protected from the frost. This last can the opening, so that the dog shall not be done by a liberal mulch of coal ashes. drag his bedding with him whenever he The quince is easily propagated by comes out. In order to keep the kennel planting cuttings six inches to a foot dry both above and below, it should be long, set in good gardens il. The trees raised two inches above the ground, and must be well cultivated to be of special the roof should be covered with canvas value. It is impossible to get a good well costed ontside with tar.

No dog should require any other coat than that with which nature has provided him, but it is his owner's duty to keep the coat in good condition. Indoor pets of the fancy order may be washed as often as their doting mistresses may choose, and dogs that have frequent swims in clear running water. and plenty of exercise, may go without their "subbing" the whole summer long. But as a rule a dog should be washed once a month, and a warm bath, with plenty of soap and a thorcugh rinsing with clean water afterward ending with a drenching with cold water (to keep him from taking cold), is the proper treatment.

As the dog strongly objects to this process, and especially to having his head washed—in which, perhaps, he lightness of draft, strength, and stappiwill be like his master-it is well to tie city of construction. As between equally him unless you want a chase, and to good machines, it is best to buy the begin with his head before you get him one made nearest home, for convenience wet all over; a struggling wet mass of in making repairs. It is safer to have haur is not a comfortable thing to the cutting bar ahead, and to one side handle. After washing him rub him of the driver. The tedder is a valuable well with a rough towel, and then put adjunct of the hay field, greatly facilitahim in a clean place to dry. Of course he must have a perfectly clean bed to go to on "tub" night.

If a dog is regularly and well washed, brushed and combed, and his house day may be put up in large cocks. kept clean, he ought not to suffer from where it will keep well for a week if when necessary, if protected from rain and dow by cops. These caps are easily yeamin, but it is an easy thing for him to ratch theas from other dogs. this is the case he must be treated with made from common sheeting, and freoil we i rubbed in, from the tip of his nose to the end of the tail. Atter a few, quently pay for themselves the first hours the oil may be washed off.
