thermometer, which in its simple form still adheres to the principle of the old Florentine pattern, have been the substitution of mercury for spirit and the graduating of the tube with reference to the freezing and boiling points of water. The advantages of mercury as a thermometric liquid are the great discovered with some perfectly dry material, it will condense so soon as it mests the carrents of colder air. tance between its freezing point and its boiling point, the uniform rate of its expansion over this range, and its high conductivity and sensitiveness to heart dianges.

The more modern scales for graduating thermometers are those of Fahrensell, Ecaumur and Celsius. In the centurade thermometer, Celsius's invention—now almost everywhere used in Europe—the distance between the freezing and boiling points of water is divided into 100 equal parts or degrees, the freezing point 100, while in Fahrensell's the same distance is divided into 100 equal parts or degrees, the freezing point 100, while in Fahrensell's the same distance is divided into 180 degrees, the freezing marked on the scale as the moisture.

The lack of this precautisn is the occasionally acent in the lack of this precautisn is the occasion of heavy losses both in hay and chicken into joints and stew or fry it. In either case make a cream gravy. Boil a large handful of macaroni in salted boiling water until it begins to swell, then pour off the water, cover the macaroni with milk. Season nicely with pepper and beling marked 0 degrees, the freezing point being marked 0 degrees, the freezing point 100, while in Fahrensell's the same distance is divided into 180 degrees, the freezing point to 180 degrees, the freezing point water being marked on the scale as the currents of colder air. The lack of this precaution is the occasionally acent changes.

Macaboni a L'Italienne.—Cut a chicken into joints and stew or fry it. In either case make a cream gravy. Boil a large handful of macaroni in salted boiling water until it begins to swell, then pour off the water, cover the macaroni with milk. Season nicely with pepper and salt and throw in a large onion, peeled have the obline of the ided of hay not fully dried, and the looking point so freezing point being marked 0 degrees, the freezing point water of the field of hay not fully dried, and the course of the water, cover the macaroni with milk. Season nicely with pepper and built being marked 0 degrees, the fr tance between its freezing point and its as it meets the currents of colder air.

DR. RADWAY'S

Sarsaparillian Resolvent.

THE GREAT BLOOD PURIFIER.

Pure blood makes sound fiesh, strong bone and a clear skin. If you would have your flesh firm your bones sound without caries, and your com-plexion fair, use

Radway's Sarsaparillian Resolvent.

A remedy composed of ingredients of extraordinary medical properties, essential to parity
heal, repsir and invigorate the broken-down and
wasted body—QUICK, PLEASANT, SAFE and PRIMANENT in its treatment and cure.

No matter by what name the complaint may be
designated, whether it be scrofula, consumption,
syphilis, ulcers, sores, tamors, bods, erysapeias, or
sait rheum, diseases of the lungs, kidneys, bladder, womb, skin, liver, stomach or bowels, either
chronic or constitutional, the virus is in the Blood
which supplies the waste and bullis and repairs,
these organs and wasted tissues of the system.
If the blood is unhealthy, the process of repair
must be unbound.

The Sarsaparillian Resolvent

Not only is a compensating remedy, but secures the harmonious action of each of the organs. It establishes throughout the entire system functional harmony and supplies the blood vessels with a pure and healthy current of new life. The Sain, after a few days use of the Saraparillian, becomes clear and beautiful. Pimples, blotches, black spots and skin eruntions are removed; sores and afters ason curred. Persons suffering from scrothia, eruptive diseases of the eyes, mouth, ears, legs, throat and glands, that have accumulated and spread, either from uncured diseases or mercury, or from the use of corrosive sublimate, may rely upon a curre if the Sarasparillian is continued a smillient time to make its impression on the system.

One bottle contains more of the active principles of Medicines than any other Preparation. Taken in teaspoonful doses, while others require five or six times as much.

One Dollar a Bottle.

R. R.
