There is really no end," said an amateur coin collector, "to the list of articles ican silver coins and I know that there is a whole world of absolutely unsuspected details about this branch of collecting. There, for instance, is the mystery about the coinage of 1804. A small number of dollars was struck, and of these coins not one has ever been found. There are two specimens in existence of the 1804 dollar. thing happened of a mysterious character in 1805. Then the coinage of silver doito its appearance.

with auction sales, but hunts for his game it gradually and safely. with an eye ever watchful for a chance. picks up the coin, and after a brief inspection he replaces it by one of the same denomination and departs with his prize perfectly heedless of the cutting way in which the toil gather insists that he will not have his money hardled by strangers. After a few skirmishes of this kind the ferrymen come to look upon him as an amiable lunatic, and whenever they receive an odd looking piece make a point of

giving it to him in change.

The great object of a collector is to complete a series, that is to say, to have one of every variety of any given denomination that has been coined. The most of the "dismes" and half-dismes menoned by Washington in his fourth annual address. The want of small coins was keenly felt, and the first President was so or socep that cannot tell when some because there were two localities in the lowance, land where ample preparations had been Union, which took from the States the right of coinsige. The two points where the "dismes" and half-dismes could have been coined were Annapolis, in Maryland, and Dedham, in Massachusetts. The work and Dedham, in Massachusetts. The work and Dismesserial probability done at the latter was in all probability done at the latter.

When the States the council treated as follows: Take boiled linseed oil and stir in pulmerized coal to the consistency of paint. Put a coat of this over the timber, and there is not a man that will grows cool.

Store potatoes in shallow bins in a

THE successful farmer and housekeeper are the reading ones in nine cases out of ten. It is only by reading that one can keep up with the times in which we live. It has been aptly said that an agricultural community without books and papers relating to farming and housekeeping are like a ship at sea without rudder or compass.

An Improved Nose-Piece. - An improved nose-piece for eye-glasses has been patented by Mr. William J. Suttie of New York city. The object of this invention is to provide a nose-piece which will be tess easily broken when being secured to the eye-glass or when dropped than the ordinary nose-piece. The invention consists in providing the eye-glass nose-piece with a covering layer of some non-conductor of heat, such as rubber, varnish, japan or other gums which material is applied to the nosepiece in a liquid or plastic state and then dried or bardened. This covering layer does not interfere with the elasti city of the rose-piece and protects the skin of the nose from being disfigured

the coinage of 1804. A small number of follars was struck, and of these coins not one has ever been found. There are two pecumens in existence of the 1804 dollar, but there is every reason to believe that the roots are easily handled, do not suffer from abrasion, can be easily of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper to make it hold the quantity of flock it does, and it is this body of the paper these were restrikes made in 1828 by some one in the mint at Philadelphia in a surreptitions and unlawful way for some collector who had influence. mais, taken as they are from the space outside the cage, necessarily show the bars, which spoil the effect, M. Planet the proprietor of the menagerie, accompanied the artist in his adventurous round, and the animals, as a rule be-haved very well. A splendid group, consisting of a lion, lioness and two cubs, was particularly successful, the "sitters" not moving a muscle during the operation. The leopard, too, proved an excellent subject. The tigress, however, exhibited a specimen of her temper in two vigorous dashes on the

photographic apparatus, in one of which M. Pettit received a savage blow of her paw on the leg. This, a French paper states, is the first time that wiid beasts have been photographed in their dens, and it is believed that the results of M. Pettit's dangerous experiment will be of considerable service to animal painters and sculptors.

A substitute for coffee is growing into an important article of commerce in London. The kola nut is largely used in tropical Africa to make an invigorating beverage and some months ago it was subjected to a careful analysis, the result of which was that it was found to be richer in caffeine than the best cof-fee, while it contains the same active principle as cocca, The negroes are said never to touch coffee when they can obtain kola nut. Dr. Damell, an authority on such matters, says that it will soon find its way into European commerce. Samples have been sent to gista, or sent by mail for 25 cents in stamps by authority on such matters, says that it will soon find its way into European edical men in London for experiment, and to farmers and planters for agricul-tural purposes. It is believed to aid di-gestion, and also to render people capable of withstanding the depression con-sequent upon prolonged labor. More enthusiastic advocates still say that it relieves melancholia, and not only sub-dues the craving for alcohol, but prevents its intoxicating effects.

A Musical Electrical Whee -An PLASTER experiment by Professor H. S. Carhart s as follows: A disk of sheet irou was holes concentric with the disk, the number of holes in the two circles being 32 and 64 respectively. On one side of the disk was placed a horseshoe magnet with its poles very near the rows of holes. On the other side were arranged two corresponding induction bobbins. The circuit was completed through a telephone and either bobbin at pleasure Upon rotating the disk rapidly, a clear musical sound was produced in the telethe contrary, the most thorough effort will leave some milk in the ducts, whence it is driven into the milk reservoirs by the metal nose-piece.

The old industry of glass making the newly-formed secretion pashing from behind, and which may be obtained after the lapse of an hour from the time the milking began.

skill of the hose from being disagned as cheaper and better than alkanet for coloring oils, pomades, cerates, etc. One part of saffranin is dissolved in a mixture of twenty parts of alcohol and eighty of water. The color is perminent, and is not destroyed by blowing a stream of air through the corresponding holes. phone, the pitch rising with the rapidity of rotation. Moreover, the bolbin opposite the circle of sixty-four holes gave the octave above the other, and each gave a note of the same pitch as

without a supporter. After considerable persuasion my wife induced her to try your "Favorite Prescription." After using one bottle she threw away the supporter and did a large washing, which she had not done in two years before.

JAMES MILLER,

4246 Jacob Street, Wheeling, W. Va.

EXPERIENCE : "Yes," said Mrs Brownsmith, "I want a good girl and possibly you might do, but have you had any experience?" "Ixparience, is it?" replied the damsel, resting her hands on her hips and tossing her head in the air. "Ixparience is it? Faith, and haven't Oi been in no less than twinty families during the last month?

Women and Her Diseases

is the title of a large illustreted treatise, by Dr. R. V. Pierce, Buffalo, N. Y., sent to any address for three stamps. It teaches successful self-treatment.

R. S., remarked that the whales of our time are the largest of known creatures, past or present. Instead of fiving in an age of degeneracy of physical growth we are, therefore, in an age of giants; but it may be at the end of that age for the whales—like other existing great animals—are fast approaching ex-

It is calculated that more than 50,000

soldiers fall victims to malaria in Italy every year, and great numbers of working people are attacked. A map pre-pared by the Italian minister of war shows that of the country's sixty-nine bly succumbs to the action of this peeriess correc-tive. Loss of fiesh and appetite, failure to sleep, and in twenty-four provinces its ravages are very severe.

The Blood Would Run .- For five years I was a great sufferer from Catarrh. nostrils were so sensitive I could not bear the least bit of dust; at times so bad the blood would ran, and at night I could hardly breathe. After trying many things without beneft: I used Ely's Cream Balm. I am a living witness of its efficacy. Peter BRUCE, Farmer, Ithaca, N. Y. (Easy to use, price 50 cents.)

Be sure and give the cellar a thorough cleaning out before you begin to store your fruits and vegetables in it. A good white-washing will do to finish

who was obliged to leave work, who has been cured, and is now able to again attend to his labors and support his family.

Mr. Henry Williams was recently spoken to about his general health. He replied by making a general statement, which is in sub-stance as follows: I was formerly employed in the sewing machine works at East Bridgeport, Conn., until I was taken sick and oblige to leave work. After a couple of months o hard battle I am about well and ready t

return.

I feel impelled, from a sense of duty, to make known my case, with the hope that it will be made known to every suffering man and woman with diseased kidneys, that there is a medicine called Hunt's Remedy capable, as I believe, of curing any case of the most extreme form, and when no other relief can be obtained. be obtained. I will give you some of the details of my case, observing at the same time that language could hardly describe my

sufferings.

About two months ago I caught a heavy cold which settled in my kidneys, and the pains in the small of my back were something fearful. I was unable to work, and suffered the most when walking or standing for any length of time; had two doctors, but received no benefit from either. I had a natural antipathy against patent medicines, but I tell you that is all gone. I saw Hunt's Remedy advertised, sent and got a bottle, and with the first dose I began to get well. I continued the use of it, and am now around
