### The Pyraunds. AGRICULTURE, In visiting the pyramids the questions TO KEEP VERY SHADED PLACES to be determined were, in many cases, almost hopeless of solution. Strange as it GREEN. - Especially in the front yards may seem, no two estimates of the exact of dwellings, both in town and country, most hopeless of solution. Strange with may seem, no two estimates of the exact size of the Great Pyramid agreed with each other. In spite of the immense mass of wratten and printed observatione, it was still a question how many Pharaohs were sti engaged on the building. The compara-tive antiquity of this pyramid and the other fifty or sixty that have been exam-way worthless, that ought to be cut ined was unknown. The absolute age of away. This would give room for the inconvenience. the pyramid building dynasties is still, and must long be undetermined. The methods able view had been propounded as to the tools with which such stupendous results were obtained. The object to be reached by mering such as to the such as to the such as the s able view had been propounded as to the tools with which such stupendous results were obtained. The object to be reached by rearing such masses of almost solid ma-sonry, was a matter of keen controversy. No intelligent survey of the whole pyramid platform, no correct plan and section, no distinct enunciation of the problems evol-ved were sccessible. We had only the opinons of prejudiced observers, sing pet hobbies of their own, or carciess exag-doubt, in themseives, but presented in such s fashion as to complicate risk that the difficulty. The Council the forsal Society appears to have satisfied used in the work or and low add then, however, are it deadly enomine. It can notifight them. Steadily they will encourse and the object on the state of the straightforward way, including neither to this opinion nor to that, until the whole of the facts which could be ascertained was before him, and the ven then he had proceeded in so cautious a manner that he sets fashion as to conding the protection of the society appears to have satisfied the facts which could be ascertained was before him, and the other set of the remains. The first work, while it remains a mouring to the swe statement itself. The soundness of the present is the first with ure fast which term maxims and the birth work, while it remains a mouring to the first of the first will hereafter be found rather the indigger swe statement itself. The soundness of the sound rather account with appearent to first which remewal. Exercise the sound rather and the source and the off and and the source and the off and manny and the off and the source and the off and manny and the off and the source and the off and mode and the off and the source an sable basis of future inquiry than a conclu-sive statement itself. The soundness of us last season from San Anglos, Cali-EXPERIENCE is a good teacher, and perseverance will bring success. The "Dinner Table" introduced sauces last the great mass of calculations which he has brought nome can only be proved by years of investigation; but it may safely be received, and though it grew vigorously "Dinner Table" introduced sauces last week, but was interrupted, and the is kept exceedingly busy, but somehow he years of investigation; but it may safety be sud that nine-tenths of them will be found wholly new, and that the very soberness and moderation of his conclusions, while they place him immeasurably above mere they place him immeasurable himmeasurable h theorists, will at the same time in all prob. of its use for bread. It is a cereal re- tive art that improves plain dishes, and ability be pushed by others far beyond anything he has ventured to assert. This is as it should be. Investigators are seldom s as it should be. Investigators are seldom somewhat larger. It would undoubtedly stock must always be ready as a basis content, as he is, to state facts only; but it constitute a good feed for stock the same for any sauce, is their province to provide facts for those

prejudiced or interested partisans. Mr. Petrie went the right way to work. Without extraneous assistance he took his baggage out to the pyramids in the autumn of 1880, and set up for himself in one of the numerous tombs between the edge of the pyramid pistform and the Arab village. There, with little but native society, and with rare visits to Cairo, he remained till May, 1881, and, returning in October of the same year, resumed his Detoier of the same year, restance winter, irogiodytic existence for another winter, with only the break of a run up the Nile for a couple of months. The tomb he those not absolutely fresh will never troglodytic existence for another winter, for a couple of months, The tomb he occupied had been forn el used by Mr. Wayaman Dixon, and had a deer and ters. Mr. Petrie strengthened them, and fitted up shelves and a hammock. He hired an Arab servant who had previously been employed by Mr. Smith, Mr. D xon and Mr. Gill, and who was too well accustomed to the ways of explorers to think anything strange. Mr. Petrie observed that the temperature of his dwelling-place which was cut in the solid limestone rock, air to 100dgs. His days' work often commeaced before daybreak. He rose, lighted eral months at least. Eggs will keep in his petroleum stove and boiled his kettle lime water, but it is difficult to turn or while he had his bath. During breakfast, be held literally a levee, as he left the door of the tomb open and received his Arab looks very chalky, and their sale is hurt.

Big Ingin Me"

\* BEHNARD "Hig rogin Me" Is the language of vigorous health and self-satis-faction, but when self-indigence, exposure and bad hatots have deranged the delicate functions of digestion, and the blood becomes impure, there is but one certain way to avoid disease. That is to purify the blood by "St. Bernard's Vegetable Fills" which stimulate the liver, kultureys and skin, promote digestion and restore sound, healthy ac-tion to the congested organs and disordered func-tions. They are the oldest known health restora-tive in the world. P VEGETABLEPILLS

MARK. The pills are warranted to be PURELY vege-table, free from all mineral and other polsonous substances. They are a certain cure for Consti-pation, Sick Headache, Dyspensia, Bilousness, Torpid Liver, Loss of Appetite, and all diseases arising from the It has long been proposed to extend a chain of earthquake observatories over the volcanic districts of Italy, and Prof. de Rossi now urges the immediate completion of the series of such stations Liver, Stomach, Bowels or Earthquakes are often heralded days in advance by phenomena familiar to seis-They remove all obstructions from the channels of the system and purify the blood, thereby im-parting health, strength and vigor. Sold by drug-gists, or sent by mail for 25 cents in stamps by mologists, making it possible to issue

earthquake warnings in season to enable inhabitants of threatened districts to find places of safety. An observatory at Cassamicciola might have saved many And you will have no stekness or suffering or door 83 Mercer St., New York, lives.

#### Healthy People Sometimes Laugh

At the sufferings of dyspeptics, and say that their pains and distresses are imaginary. This is not meant for cruelty, but it is cruelty, all the same. A person who has a crooked foot, or a wounded hand, or a sightless eye, calls forth sympathy by the exhibition of the defective member. If the dyspeptics sufferer's stomach could be placed on exhibition, the cause of tress would be apparent.

The man with a troublesome stomach often suffers quite as much as e man with a broken leg, but is far less likely to receive sympathy. Sympathy is good for sufferers, as far as it goes. But Brown's Iron

Bitters is better, for it strikes at the root of these troubles, and cures disease. Disappointed dyspeptics, weary of having tried many experiments in seeking cure, will do well to make one fair trial of Brown's Iron Bitters, and report the result. That this well-tried family medicine will thus dimin-ish the quantity of human suffering is an established fact. 10
