SOME INSTANCES IN POINT—HOW PREDICTIONS MA Ten days before his death Lincoln dreamed that the President lay dead in the White House, 'skiled by the hand of an assassen.' When his wife heard of the tragedy site exclaimed, 'His dresm was prophelic!' The majority of dreams, however, are never fulfilled—they are too fantastic, or they are solved by contrary events. People are often possessed of the idea that they shall soon die. They find themselves the subject of strange feelings. They know they are not what they once were, and as ting approach certain ages they are quite sure they will not be leng of earth. These impressions as a rule are the result of an imagination disordered by disease, but they can be shaken off by prompt and thorough measures. We are told that very many diseases can be prevented; indeed, half the dea its are said to be prevented; indeed, half the dea its are said to be prevented; before the importance of always aciting promptly in every personal emergency.

Jestice William Monl, of West Sandlake, N. Y., very highly esteemed in Troy, was for years plagued by foreloodings that he was desured to an

gued by forebodings that he was doomed to an y deats. He had dull and fitting pains in va-se parts of the body, his complexion was bad, appetite was variable, he fell weary without his appetite was variable, he fell weary without known cause, was constantly constipated, his longue was heavily coated, and frequent feveries desorders appeared. Then followed extreme tenderness and pain in the back, great lassitude, gravely deposits in water, which was dark, frothy and odorous, all indicating liver and kidney disorders. These developments alarwed him, especially since physicians did him no good. About giving up in despair, he followed the counsel of one of the Sopreme Coort Justices to use Dr. David Kennedy's Favorite Remedy (of Rondout, N. Y...) as an experiment. It scattered his bad feelings, revived his appointe, restored his liver and kidneys, renewed his blood, increased his weight by twenty pounds, and to it alone he gives the credit of saving his life.

Dreams and warnings and forebodings of early death need not always be fulfilled if proper measures are promptly taken to defeat them.—Troy (N. Y.) Times.

Is the smoking car of a Michigan Central train the other day a Detroit man got to going on the political situation, and as a crowd gathered around him he kept his chin working away for full balf hour without a stop. Finally a stranger came up to him and whis pered in his ear:
'Cut it short, my friend-eut it short,'

The Detroit lanched forth with a new idea, but at the end of ten minutes the same man whispered again: "Say, friend, arn't you going to diride up? I want a chance at this crowd."

"Eh? Do you belong to the opposite party?" "No, sir-I'm a three card monte

man, and I want to work the crowd and get off at Jackson." He was given a chance."

Caus is of Nervousness, The maladies which above all others cause pervousness, are dyspepsia, biliousness and con-stipation. The great sympathetic nerve which

connects the epigastric region with the brain, is always injuriously affected if the stomach and bowels are disordered; a permanent derangement of the functions of those organs reacts by sympa-thy upon the entire nervous system. Hostetter's to the digestive apparatus, and overcoming con-stipation, permanently remedy the nervous com-plaints which originate in alimentary weakness or listurbances. They are the very best pervine that distinuances. They are the very one pervine una-can be used. By eradicating the exciting causes of nervous weakness, they permanently overcome the disability itself. But this is not all. By obecking the maladies which cause nervousness, they build up anew the system weakened and de-
