or thoughtless persons have lain their heads. These unsightly spots may be removed by making a paste of cold water and pipe ciay or fulier's earth, and laying it on the surface without ruobing it on, else the pattern of the paper will then likely be inpured.

Leave the paste on all night. In the morning it can be brushed off and the spot will have disappeared, but s renewal of the operation may be necessary if R. E. SELLERS & CO., Prop's, the oil mark is old.

A man during a life time of 50 years, according to a paper recently read be-fore the Academy of Sciences, Paris, sleeps away an aggregate of 6,000 days, works away the same period, eats away 2,000 days, walks away 800 days, is ill during 500 days, and amuses himself with the remainder of his half-century on earth. An electric railroad will soon proba-

bly be finished, uniting the Hotel des Alps, at Territet Chillon, and the Hotel William S. Baker, of Lewis, Vego county, de Mont Fleury, which is situated on Ind., writes as follows: "My son was taken with scrofula in the hip when only two above Chillon. It is intended to drive the dynamo-electric machines, as the supply of available water is abundant

So satisfactory the trial of the electric light in the portion of the British House whiten them surprisingly. Found the borsx so it will dissolve easily. This is especially good to remove the yellow that time gives to white garments that ence of members and others, that there ities to extend the new system of illumination to the whole of the building.

> Only the Goulard-Gibbs system for transmitting electrical energy to a great distance from the generating source was profanity?" "Oh, no," replied the ered by the Italian Government in con-editor, nonchalantly; "that is only a nection with the exhibition heid at Tulist of adjectives to be applied to my rin. Too little was proferred for the magnitude of the performance deman

> > Messre, Ramsay and Young find that the decomposition of ammonia by heat commences at about 500 degrees and that it is nearly in extent with porcelain, glass, iron and asbestos, but at 700 degrees ammonia is almost completely decomposed by passing through an iron tube. Copper when heated, is not so active.

According to Professor Loomis, of Yale College, the average diameter of violent storms in the United States is 1587 miles, and in the Atlantic Ocean 2022 miles. Severe storms in the interiors of Europe have nearly the same geographical extent as those which occur on the Atlantic.

Cherry stain for fine wood is thus prepared: Boil until dissolved four onnces of annatta in three quarts of water in a copper kettle; put in a piece of potash of the size of a walnut; keep the whole on the fire half an hour longer,

and then the stain is ready for use. The Hope of the Nation

Children, slow in development, puny, scrawny and deiloate, use "Wells' Health Ronewer." An International Industrial Congress will be held in Brussels on the occasion of the celebration of the fiftieth anniversary of the commencement of the Belgian railroads
