On these benches you all sleep, Yakuts and from the fact that the deaths in New floor, and you sleep comfortably enough | numbered 5280. in the blaze and warmth of the fire. There is an inner apartment to the yourte, a kind of annex or dependence. This is not given up to the family, or even to the ladies of the house, but is the unrestricted domain of the cows, which, however, have to pass through the living department to get to their

Then there are the belles of the family. These are nothing if not ugly. In one yourte there were three Yakut damsels, their ages ranging from 12 to 20. They possessed but a single pipe, which they passed around from one to the other. If their brothers, the yemschiks, are just going out on a courney they allow each to take a few energetic whiffs before their departure, and then go at the work themselves again, chatting and looking after the boiling of the sour milk at the same time. The pipe is kept going almost incessantly from morning till night. The girls are not, as I said before, handsome. Their faces have too much cheekbone, their noses are too flat, their eyes too straight slit, and their babits Ind., reports the following test of his and add two well-beaten eggs and a in general too peculiar for appreciation. young cow, Mable Crocket 18,719, 2 years pint of milk. Fill muffin-cups about Such a Yakut maiden is not long fancy and 5 months old; Began saving milk free. She is betrothed by her parents at a very early age, say 6 or 7, when all the contracts for her future life are churned twice—on Wednesday during settled and sealed. Ten or a dozen | week of test, and Tuesday the following years later the betrothed pair pil-grimage together to the nearest Greek daily average 43 lb: 14 oz.; making 14 hundred miles away, and are married. | weeks after calving. But neither horsehair nor rags were of any avail as regards speed.

A teacher of mathematics named William Lawson, who died at Edinburgh in November 1757, on one occasion, to win a wager made by his patron, undertook to multiply regularly in succession the numbers from one to forty, without other aid than his memory. He began the task at seven o'clock in the morning and finished at six in the evening, when he reported the product, which was tested on paper and found to be correct. It made a line of fortyeight figures, and a fair copy of it long occupied a place on the wall of his patron's dining-room, for which it was framed and glazed. It may be added, that in the course of the day on which the mental calculation was made Mr. Lawson received his pupils as usual

AGRICULTURE.

A HEN over two years old is not profit-Arctic Ocean. I found some difficulty | able to keep and will be less so every in first cramming myself into my deer- day she is kept over that time. All sied, and a few hours afterward quite such old birds should be weeded out as great in getting out of it. The now, and disposed of or at the latest be deer-sled is a long, narrow affair, prepared for sale later when the demand placed on high wooden runners; it is may be a little better. But it is a good made extremely light, of a framework | maxim to follow that when one is losing, of slender birch, and is covered with a the losses should be cut short at once; hood in order to protect the head and and when one is gaining the profit face of the occupant from the biting should run on. Money is saved and blasts. It is, in fact, in appearance a made in this way in keeping poultry, as lengthened-out cradle, and, I think, all other farm stock. But it should be about as cotafortable. At night one figured up whether the cost of feeding sleeps in it very comfortably. I re for three months longer will be made member the first night we were in the up by the increased price obtained then, forest, the moon shone bright, the road Sometimes a thing may be sold chesply was good, and Yakut horses are trained at one time, and more profit made from to follow one another faithfully, and it than by keeping it longer and getting only the leading driver has any serious more for it. This is a point upon which work to do. When I was awake, how-ever, I found the Journey strangely may do a good deal of useful figuring wired and interesting. You see before at times. This plan of weeting out the you nothing but a mass of trees and flock; getting rid of all the old fowls slender underwood-no opening in and younger ones too that are not prof-which you can imagine that a road ex-itable, such as surplus cocks and hens ists. about 6,000 species of birds, of which five-sixths are known. The Cones list of North American birds now embraces 888 species, 120 new species having been added during the last eight years. Piso's Remedy for Catarrh is a certain cure for that very obnoxious disease.

Mr. N. B. Clark proposes, in the for ships of war, furnaces into which petroleum is sprayed along with super-heated steam and hot air.

The present Emperor of Russia is said to be one of the strongest men in

before a camera. The time thus re- by carrying 700 pounds with ease, liftquired would be 6,483th part of a sec- ing an ox and performing other wonond. Mr. Muybridge found by actual derful feats. A celebrated physician experiment that in order to secure an who examined Gregorie describes him accurate photography of a galloping as an exaggerated study by Hayden. horse the exposure of the camera must His shoulders were prodigious and his be less than one five thousandth part of biceps almost incredible. Gregorie's a second. He accordingly devised a strength, rather than a source of pride

> in dread that he should be provoked to use his strength against a fellowbeing. He was afraid to nurse his own child lest he should give it a fatal Nearly all the individuals of uncomnon strength make up in bulk what they are deficient in height. Stanley,

the African explorer, describes a strong man who was six feet five inches, and D. C. rather disproportionately slender. He ould toss an ordinary man ten feet in the air and catch him in his descent. He would take one of the large white Muscat donkeys by the ears, and with a sudden movement of his right foot lay the surprised animal en his back. He could carry a 3-year-old builock naif way around his master's plantation. Once he actually bore twelve men on of three hundred feet, Middle-aged people who remember the dawn of interest in muscular exercises recall Dr. Winship, the originator of the idea which was subsequently embodied in lifting machines. The astonishment that the doctor's performance created was equal to that of the Berliners a few years ago at Jorgnery's feats. The most wonderful of these was known as Hops on the white label. Shun all the vile, pot the trapeze feat. The Frenchman hung sonous stuff with "Hop" or "Hops" in their

heavy horse and its rider off the stage, suspending them several minutes, and then letting them down gradually and evenly as he raised them. Merwin Thompson's achievement at Rochester, N. Y., last year was, however, in the opinion of competent judges, more surprising than this. Thompson laid face downward on a firmly fixed ladder and

bar, and by sheer strength lifted i

of stones was driven over it. Pospi-
