Fiorida's Mystery Solved

AGRICULTURE.

An attempt has been made to explain the great smoke which has been puz- British agriculturists might make more Every once in a while there comes a zling observers for years, and which use of sugar for feeding and fattening time when the woman of small means cattle, Owing to the glut in the marcould be seen on any cloudless day asket, the coarser sorts can be obtained at cending from the vicinity of Ancilla an exceptionally cheap rate, refuse molasses being quoted at one cent per River, in Florida, Various efforts have been made to discover the supposed volcano, while on the other hand some have concluded that the smoke came from the camp fires of some remnant of the Seminole Indians. The recent er- more liberally with saccharine additions been a sort of revulsion and upheaval, the usual food. It has been ascerpedition threw no light upon the mystery, the tall grass, bogs and dense undergrowth impeding the progress of flavor and the quantity of their milk. It the curious. One Captain Asher is the also improves pigs, and sheep thrive hero who arrived in Apalachicola with the following information, which puts upon it when it is mixed with the ordimary provender. All animals are partial out the Florida volcano, and the romance is tost of the poor S camole lingof skin is thought to be produced by r ering in the land of his fathers. At saccharine dietary. the same time it adds to the attraction-

of the lovely land of fruit, flowers and wonders. Perhaps from these sulphin

rie pools came the healing virtues which laid the foundation for the legend that in Florida flowed the waters of eternal youth, Captain Asher was in search of feeding value of all green grass and fodpalmetto logs on the Ancilla River ders declines when the mercury drops when he descried the smoke or cloud below 320. Frost-bitten grass, clover m a point in the distance. Rementering the many reports he had heard ab at this smoke, he determined to unearth this mystery if possible; so, calling his crew together and packing up their traps, the party pursued their way in small to is up the Ancela R v er. They travelled up the river, o creek, for it hardly deserves the name of river, for miles. After ascending from its month about twenty-five or thi ty miles, i.e judges, he was brought o an ab upt halt by a rock barrier in future crop is immense, fr nt, Upon investigating he found

that the river ended and was lost un demeath the ground. Seeing that the smoke became more distinct at this point and second straight ahead, he ad the boat hanied to the bank and sprang ashore, determined, if possible, pursue his investigations or loot. As he sprang on shore he gave an exclamation of surprise. Scattered at various points were huge rocks, towerin many feet above his head-a thing unneard of in Florida. Mr. Asner describes some of these rocks as being as large as an ordinary dwelling and apparently bollow, containing much water. He describes them as being of a filthy appearonce, and when struck with a

iron or steel instrument to emit thou sai ds of aparks. A mile or two furthe: on were seen numerous rocks that were formed into round basins, their sidebeing smooth and beautifully polished Mr. Asher sprang upon the top of one of these basins. As his foot came i contact with the flinty substance a hollow sound was emitted from the rock Calling for a pole, and it being handed to him, he placed it in the centre of the basin. What was his surprise on drawing the pole to the top may be easily imagined when he discovered that the rock, being hollow, was tilled with a strong sulphurie water. Parsu

ing their way through the bog, some times up to their knees, again on hard ground some distance, then again eratched and bruised by the under brush and fighting mosquitoes that seemed to resent that intrusion of their ommion, the little party had a hard time of it. Presently they came to where the river issued from its under ground covert and pursued its way onward, to again dissapear in the bowelof the cartin. Mr. Asher states that every few hundred vards these poolwould make their appearance, and from them would issue white, misty cloud-

The London Lancet suggests that the How TO DEESS ON SMALL MEANS. and great love of pretty things has to retire in bitter anguish of spirit, and "wonder" how she can make herself presentable, not to say fashionable, on pound, and juggery a very little more. At these rates, therefore, the farmer could well afford to treat his beasts a transmigration of ideas, and an outtained that the sugar exercises a benefi-cial effect upon cows in regard to both confusing, to say the least, and awakens a sort of passion for spending, which most women have to fight from necessity. It will not do to say that they indulge it, for the mexorable logic of to it, and in the cases of horses, sleekness | facts and figures has proven that men spend more for clothes in America than

DOMESTIC

somen. It is not easy, however, to resist the influence of pretty things, and the In a latitude where the heavy frosts only way is not to pay much attention to mere novelties of dress and fashion, of October nip the leaves of the forest trees it is not wise to trust to fall pasture. but adhere to certain fixed and well-deof which clover is a large part. The dued rules. Buy good materials, avoid cheap trimmings, select always such colors as will go well together, and have them usually dark. Never wear your best on a secondary occasion, or when or pumpkins make sorry substitutes for nutritions food. But as farmers generit is likely to to be subject to severe wear and tear.
