## Old Neurspapers

AGRICULTURE.

It has been several times suggested by economists that newspapers can be made to take the place of blankets in guarding from cold, and it is a fac well worthy of notice that they have been proved very satisfactory in making light, convenient and warm bed-cov erings when others cannot be had. Travelers would do well to bear this in mind when far from the region of hotels

This has been confirmed to the writer by the testimony of an individual whose converting butter and milk producers in- a gill and a half of broth instead of wine at an early age and communed only svocations kept him constantly exposed to heavy beef animals. The Ayrshires, and water. to all weathers, night and day. He was a resident of a country village, a easily converted into beef animals, yet perfect type of a hearty, strong, vigor-it may be said that man changes the ous man, and he accounted for his ro-characteristics of animals almost at ducks or fowls with brownish meat, is the Christian theory and even in the bust health, notwithstanding his ex- will,

able to resist them through the one is considering the propriety of seed- nest and smallest pieces you can with- of impostors, so it did in Islam. The simple precaution of slways wearing a mg a wheat field to clover it is necessary out chopping it, wash it and drain it most famous of these in past ages was Colorado desert. The baskets are said pewspaper folded over his chest under to ask for what purpose is the clover to and fry it in fat; this may be part but- Abulcassem Mohammed Ben Abdallah, to be light and better than any tin, galhis coat.

As a preventive of cold feet, a piece ask if there is not some better hay crop son with salt and pepper. When it is Africa. Mohammed had prophested of newspaper folded in the sole is quite than clover. Clover is a very useful done, spread it on a platter, moisten that in 309 years the sun would rise in Mexicans and old settlers, and will last, equal to, if not so elegant or expensive grop in several ways. It makes excel- with vinegar and lay the pieces of fowl the west, and as Abulcassen's glory as, cork or lamb-skin soles, being light, soft and easily renewed. I have for cows and sheep if it is cut soft and easily renewed.

If you wish to test the power of a when it is in blossom; it is very valuable newspaper in excluding cold, try tack- for seed when the price is \$10 a bushel made by cutting a fan out of very stiff ing one, doubly folded, between your and promises to be more; it is exceed window and your stand of plants, and ingly beneficial to the soil, and by skulful use of it a farm may be kept producsee how nicely they will be protected, and how frosty the window will conse- live and yet improve in fertility. For, quently be.

nently be. New papers will in the autumn, be-taken, the soil is left filled with roots are down, at the top or handle put fore severe black frosts come on, effec- which furnish a large quantity of valuatually protect green house plants before be fertilizing matter. caused by chemical acids and not by bacteria. Microscopic examination, According to Solomon, life and death are in the power of the tongue. not affect a cat when injected beneath the skin. Only poisonous cheese violently reddens litmus paper, and this is

a test easy of application. Every grocer should try the experiment when he onts a new cheese. The following are the conclusions: 1. The toxic material in poisonous cheese is a compound soluble in alcohol, 2. The production of this poisonous material is due to the rapid growth of the bacillus subtilia. The difference between poisonous and non-poisonous new cheese is one of degree rather than of nature.

Home Made Microscope .- A simple microscope may be made cut of a common pill-box, for a few cents. Take out the bottom, and put in a piece of window-glass, then paint the inside black, and make a small cychole in the iid. In this eyehote place a single drop of Canadian balsam, and allow it to cool, This grop of the transparent resin assumes, when cooling, the proper form

magnifying power. The Imperial Government of Germany has detected an extensive adulteration

drying them, which adds to their weight and apparent solidity and increases their value. It was detected by soaking the eather in water for twenty-four hours,

A new paint consisting of a mixture of zine with white zine chloride, has been for some time in successful use at Brest for painting wood and metals; it becomes very hard, and can be washed or brushed without is jury. It should not be applied, however, in rainy or 'rosty weather, as it then becomes mealy and scales off easily. Chloride of zinc is not the only salt which possesses the power of forming a mastic by its mixture of zine white, for Sorel long ago showed and that the prochlorides of iron, manganese, nickel and cobalt were good bases for

of iron, all form good mastass with zine white, able for less than \$4.50; my price \$2.00/ postage \$4 cepta. 2.0. Bor 107. JOHN B. ALDEN, Publisher, A
