# A Wife's Tact

HOUSE AQUATICS .- There is a great

DOMESTIC

Every house has its "squally" days nce in a while, when a "nor caster" brews in the heavens and on the earth, giving every member of the household either toothache or rheumaism or the "bluce," It was just such time as this at our house last week. Fo cap the chmax, about noon company was announced, and we had planned or "a picked-up dinner." I was in lespair, and went down to the parlor with such an inhospitable face, that my little friend exclaime I, as she came forward to meet me: "You aren't glad to tee me one hit. Aunt Sue!"

I was, though, and all my ill-nature vanished in a moment at the sight of her sad faca. "What is it, Kitty? What is the

matter?" I asked, tenderly, "I'm in trouble, Aant Sue, and I thought perhaps you could help me." the sweet face s raggled bravely have their roots cleaned. The bulbs with tears. "Of course I can, dear child, 'Take

off your wraps and have lunch with me, and then you shall tell me all about it."

Kitty is one of my children-an old maid's darting. Why she ever took a fancy to "Aunt Sue" it is quite impossible to say; but the reasons for my partiality to her are self evident to all who know her, for who can help loving the thoroughly good, sincere, loving all over the country for the digging. little cuild-woman? Then I had been

her teacher before her marriage, and "foster mother" she had called me through a very desolate orphanage She is the wife of a promising young lawyer; and though her hps had ever licen sealed on the subject, we had a long time feared she was not a happy this wrap answers the purpose of a

"Let me sit on this stool at your feet, suntie, and lay my head on your knee venience. To make the wrap you will so-as I used to do, long ago Oh, require two yards of single wilth flan it seems so long ago!

"How long, pray, Kitty? You talk like an old woman.

"It is five years since Fred carried me off, you know, auntie.

"Five years to grow happy and wise,

"Yes. But, On, auntie, Fred doesn't in the middle six inches deep; turn the love me one bit. It's so dreadful to tell you, though." It was all out now, and the flushed cat-stitch a narrow hem around them

face buried itself in my lap for shame and down the fronts: trim the collar and sorrow, while the poor hands and cuffs also one side of the front, worked convulsively. "Tell me all about it, Kitty," I re- and button-holes on the front, and pink

> .... The Laboring Classes,

A public dinner was recently given to the villagers of Leigh, near Tun-bridge, Eugland, by Mr. S. Morley. The meal consisted of three coursesa soup, a savory and a sweet-and cost, without cooking, sixpence per head, the prime cost of the articles alone being only threepence. Mr. Moriey, who presided, said he had been accused of wanting to deprive the workingman of his beer, and now he might be ac cused of wanting to deprive him of his mest; but it was, he thought, of the greatest importance, and worth considering by fathers and mothers, if they could have their children properly nourished at half their present cost, Then it was said that those who were thoroughgoing vegetarians were invariably total abstainers, and to his mind that was a very great charm. They ate so much fruit and vegetables that they did not need the drink which some people felt they could not do without except in the shape of intexicants. He he lieved that a system of fruit and vegetable farming would pay better than corn growing, owing to the foreign competition in the latter art cin besides which it would enhance the wages of the laboring classes.

Dreydoppel, Phila., Pa Love has many languages and the tenderest and most eloquent of them is silence.

For DYSPRESIA, INDIGESTION, depression of spir-its and general debility in their various forms; also as a preventive against fever and aque and other intermittent fevers, the "Ferro-Phosphorate-Elixir of Calissya" made by Caswell, flazard & Co., New York, and sold by all Drugpists, is the best tonic; and for patients recovering from fever or other sickness, it has no equal. Time waits for no man. Do not be a

laggard, but rush onward in the battle of life determined to win.

If afflicted with sore eyes use Dr. Isaac Thompson's Eye Water, Druggists sell it, 25c Simplicity of character is the natural

result of profound thought. Heart Pains.

Palpitation, Dropsical Swellings, Dianuess, indigestion, Headache, Steeplessness, cured by Wells' Health Renewer."

The principle of cooling by evap aration is one on which some ice-making machines are constructed; ether or aqua ammonia applied to the skin when heated produces a coo'ing effect by its rapid evaporation; a playing spray fountain in a room will sensibly cool the air from the same cause. Under favorable circumstances this principle may be economically applied to the cooling of overheated rooms. Many years ago the proprietor of a summer boardinghouse in eastern Massachusetts cooled h s upper rooms in summer by spraying water through an air duct, the plan being almost identical with that described in an exchange as being employed in the composing-room of the New Orleans Picayune. In this case a yertical wooden box was constructed in the corner of the room, with openings at the floor and ceiling, and furnished with a pipe for supplying water at the top, and a pan and drain at the bottom for receiving the flow and carrying it safely away. The supply pipe was bent over the upper end of the shaft, and fitted with a rose like that of a watering pot, so as to deliver a shower of spray instead of a solid stream. On connect-ing it with the service pipe the mov-ment of the water was found to caus: an active circulation of the air in that part of the room, which was drawn in at the upper opening of the shaft and issued again cool and from the one at the floor level. The relative

temperatures of the water, the air at ti e top of the room and the couler air that had passed the water bath were-Water, 84 degrees; air in the room, 96 deprees; cooled air, 74 degrees; showing that the air was cooled ten degrees be ow the temperature of the water when cooled it. This refri, e ation was due to the rapid evaporation of the water by the heated air, the water being in the form of a fine spray.

MANTRE should be subject to the same rule. We advocate plowing in the manure if it is at all coarse; if it is fine we spread it on the plowed ground and work it in with the Acme harrow or a cultivator. When manure is plowed in with lop furrows and the harrow is drawn across the furro vs it is evident that the manure and soil be very intimately mixed together and this is precisely what is wanted for the Spring sowing, Land so prepared and well manured needs no fertilizer; but where is the farmer who ever found his supply of manure ample for his needs.

THE DELL FOR SOWING SEED, -This puts the seed precisely where it ought to be, about an inch and a half below the surface and the passage of the drill sponts through the soil mingles the soil together and drops the seed exactly where the fertilizer can be reached.
