## **Surface Indications**

What a miner would very properly term "surface indications" of what is beneath, are the Pimples, Sties, Sore Eyes, Boils, and Cutaneous Eruptions with which people are annoyed in spring and early summer. The effete matter accumulated during the winter months, now makes its presence felt, through Nature's endeavors to expel it from the system. While it remains, it is a poison that festers in the blood and may develop into Scrofula. This condition causes derangement of the digestive and assimilatory organs, with a feeling of enervation, languor, and weariness—often lightly spoken of as "only suring fever." These are evidences that Nature is not able, unsided, to throw off the corrupt atoms which weaken the vital corrupt atoms which weaken the vital forces. To regain heath. Nature must a sided by a thorough blood-purifying me leine; and nothing else is so effective as

# Aver's Sarsaparilla,

which is sufficiently powerful to expel from the system even the taint of Heroditary Scrofula.

The medical profession indorse AYER'S SARSAPARILLA, and many attestations of the cures effected by licome from all parts of the world. It is, in the language of the Hon. Francis Jewett, ex-Sinte Sentior of Missachusetts and ex-Mayor of Lowell, "the only preparation that does real, lasting good."
