of the charms of the place, in which

respect it rivals Venice. One of the drives was over the turnpike road by which the French army entered Moscow; turning aside to Sparrowhill, their one elevation, we saw the glittering city from the place where the monarch general viewed his prize, before his bitter disappointment. How he looked for the expected attack, and seeing no sign of that, waited for the surrender of the city; then the puzzled emperor made his non-obstructed, entrance into the deserted place. He saw from every oil-shop and inflamable place the fires break forth, which, as the engines had been removed and the prisoners liberated to tan the flames, raged for three days, leaving little of the city beside the Kremlin, which the French army fortunately succeeded in preserving. Their precious relics, and the enormous wealth of their churches, investments and precious stones, were all preserved; dozens of wagons carrie! them away to be hidden until the time

The Kremhn (the origin of the name is uncertain) stands in the midst of the city; a wail surrounds it with towers and high corner turrets; its shape is triangular, two of the sides being each a mile in length; within the walls stand the winter palaca, the tower of Ivan. the treasury, churches, monasteries, and other buildings pertaining to church and state. A staircase outside the palace is shown as the one which Napoeon mounted for his short and disappointing possession, and down the same steps, generations previous, an enraged people threw the false Demetrius, the usurper and murderer of the true emperor, one of the tragedies in which their history abounds.

out realizing that he is in a holy city; new species of shark with horns. he meets groups of pilgrims in the streets, carrying their bundles over on a ship from Calcutta. We were be-their shoulders—not the pilgrims clad calmed, and I saw a shark snoozing calmed and I saw a shark snoozing calcuttant. dust. In the churches they fairly impede one's progress; men and women of it up and went below. While I was shrine, and each has to be kissed, while the pilgrim crosses himself many times had left overboard. I picked up my add some seasoning, the parsley, thyme, before every sacred object. One stands back at first, to make way for so much religious zeal, but soon concludes that over twelve feet long, and was making for the hook when I fired right into hour and a half; take out the steak, seem utterly absorbed, and go through lowered a boat, threw a painter around the prescribed forms apparently unconscious of the presence of other. FARM NOTES.

CORN CULTIVATION,-The matter of I had a letter from Miss Clara Louise
Kellogg the other day, in which she
described a part of her tour to me,
She is now journeying through the
northwest, and in all her travels, in
Europe or America, she easys she has
never had so interesting a time. These
is nothing very exciting or romantic
about the ordinary thriving western
town, but the mining towns where Miss
Kellogg has been singing of late have
given her the most picturesque episodes
of her professional career.

Corn Countration.—The matter of
cultivating corn, whether deep or shallow, is a subject of much thought and
discussion; but it seems to depend very
much upon a principle which exists
everywhere, viz., that at first, and before the roots have spread through the
rows, deep cultivation is useful, but
afterward, as the roots spread through the
rows, deep cultivation is useful, but
afterward, as the roots spread through
the soil, only the surface should be
stirred. A most successful and large
cultivator of corn in Central Illinois,
upon a strong clay loam, but containing

NEW MODE OF PRESERVING MILK. - It is said that a company has been formed in New York city for securing pure milk, by a new process. Fresh, pure milk, made in localities where feed is cheap, is cannod, bottled and corked when first drawn from the cow, and immediately heated in water or steam, both under the pressure of the atmosphere. It is then cooled, after which it may be kept a year without undergoing any change. Heating destroys all germs, and bottling prevents all connection with the outside air. Should the new method prove equal to the expectations of the projectors it will work a revolution in projectors it will work a revolution in the projectors in thousands of cases, has felt in this day to make it is a the form in the projector it was in the project in the formula in the formula in is said that a company has been formed projectors it will work a revolution in praise, bestowed at the right time, is Woman's Congress says, 'It is a nice the milk business of the country.

season, thinned out the fruit and cut away some of the small branches. To his surprise he secured a larger crop than ever before, and the quality was than ever before, and the quality was the distribution of the secured alarger crop to to day, all from the use of one bottle.—

No other medicine known so effectually purges the blood of deep sented diseases.

Millions bear testimony to its wonderful curative effects. ful curative effects.

It is a purely Vegetable Freparation, made from the antive here's and roots of California, the medicinal properties of which are extracted therefrom without the use of Alcohol.

It removes the cause of disease, and the It removes the earne of disease, are the patient recovers his health.

It is the great Blood Purifier and Life-gleime frinciple; a Gentis Furgative and Tonic; a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounted possessing the remarkable qualities of Viscoan Borrans in healing the sick of every disease man is her to.

The Alterntive, Aperient, Disphoretic, Carninative, Nutritions, Larative, Sedative, Commer-firstant, Sadweife, Ant-Billong, Solvent, Diuretic and Tonic properties of Vivacas Browness exceed them of any other medicine in the world.

mas exceed them of any other medicine in the world.

No person can take the Briving according to directions and remain long unwell, provided their boars are not destroyed by mineral poisen or other means, and the vital organs wanted beyond the point of repair.

Hillour, Remittent, Intermittent and Mahrial Ferox, are prevalent throughout the United States, particularly in the valleys of our great rivers and their was tribularies during the Summer and Asturna, especially during second of unusual heat and dryness.

These Fevers are invariably secompanied by extensive destroyments of the statusch, liver and bowels. In their testment, a purgative, exerting a powerful influence types there organs, is absolutely necessary.

There is no cathartic for the purpose equal to be, J. Warran's Virginia Burries, as it is the conditive means the dark colorest visely.

equal to Dr. J. Warsan's Virginia Birring, as it will speedly remove the dark-colored visibl matter with which the bowels are loaded, at the same time stimulating the accretions of the liver, and generally restoring the healthy functions of he directive organs.
Fortify the body spained disease by purfcall its finite with Viscoun Birress. No

epidemic can take held of a system thus forarmed.

It flavigorates the Stemmeth and silvaties the torpid Liver and Bavels, which render
to of unsquade delicence in cleansing the blood
of all impurities, impurities new life and vigor to
the frame, and carrying off without the aid of
Unioned, or other mineral medicine, every particle of poisonous matter from the system.
