What a miner would very properly term "auriace indications" of what is beneath, are the Pianples, Sties, Sore Eyes, Boils, and Cutanoous Ermptions with which people are annoyed in spring and early sommer. The effoto matter accumulated during the winter months, now makes its presence felt, through Nature's endeavors to expel it from the system. While it remains, it is a poison that festers in the blood and may develop into Serofttian. This condition causes derangement of the directive and assimilatory organs, with a feeling of enervation, knappor, and weariness often lightly spoken of as "only spring fever." These are evidences that Nature is not able, unaided, to throw off the corrupt atoms which weaken the vital forces. To regain health. Nature must be added by a thorough blood-purifying medicine; and nothing else is so effective as
