DANGEROUS DRUGS. SEAWEED. How to Control Effectually All Such Horrible Habits

9 8 2

Rochester, N. Y. Post-Express.

A gentleman who has spent the ner abroad, said to our reporter, that the thing that impressed him most of all was the number of holidays one encounters abroad and the little anxiety the people display in the conduct of business affairs. "Men boast here," he said, "that they work for years without a day off; in Eu-rope that would be considered a crime.'

Mr. H. H. Warner, who was present at the time, said, "This is the first summer in years that I have not spent on the water. Been too busy," "Then, I suppose you have been advertising extensively?"

"Not at all. We have always heretofore closed our laboratory during July, August and September, but this summer we have kept it running day and night to supply the demand, which upon which I was sailing became behas been three times greater than ever before in our history at this season." "How do you account for this?"

"The increase has come from the eve could reach, but was open here and universal recognition of the excellence of our preparations. We have been nearly ten years before the public and the sales are constantly increasing while our newspaper advertising is constantly diminishing. Why, high scientific and medical authorities, now publicly concede that our Warner's safe cure is the only scientific specific for kidney and liver diseases and for all the many diseases caused by them."

"Have you evidence of this?" "Abundance! Only a few weeks ago Dr. J. L. Stephens, of Lebanon, Ohio, a specialist for the cure of narcotic, etc., habits told me that a number of eminent scientific medical men had been experimenting for years, testing and analyzing all known remedies for the kidneys and liver, for, as you may be aware, the excessive use of all narcotics and stimulants destroys those growths of many stages, I observed a organs, and until they can be restored to health the habits cannot be broken up! Among the investigators were such men as J. M. Hall, M. D., President of the State Board of Health of Iowa, and Alexander Neil, M. D., Professor of Surgery in the college of Physicians and Surgeons and president of the Academy of Medicine at Columhus, who, after exhaustive inquiry, reported that there was no remedy known to schools or to scientific inquiry equal to Warner's safe cure!"

"Are many persons addicted to the use of deadly drugs?"

"There are forty millions of people in the world who use opium alone, and there are many hundreds of thousands in this country who are victims of morphine, opium, quinine and cocaine. They think they have no such habit about them-so many people are unconscious victims of these habits. They have pains and symptoms of what they call malaria and other diseases, when in reality it is the demand in the system for these terrible drugs, a demand that is caused largely by physicians' prescriptions which contain so many dangerous drugs, and strong spirits, and one that must be answered or of the eves, silenced in the kidneys and liver by what Dr. Stephens says is the only kidney and liver specific. He also says that moderate opium and other drug eaters, if they sustain the kidney and liver vigor with that great remedy, can keep up these habits in moderation."

"Well does not this discovery give you a new revelation of the power of safe cure?"

convince the public that nearly all the a Dutch cheese. It was merely a mass as sweet sauces are concerned, a pleas-diseases of the human system originate of sargassum collected together in oval ant substitute. "No, sir; for years I have tried to

In many observations made then and later, garding its use as sinful. Education or conviction will govern here as else-I invariably found them lying upon where. In most rules where wine is their sides or entangled in the weed. One of these little mimics was found specified as flavoring, the juice and near a ball of seaweed about the size of gratel rind of a lemon will be, so far

FARM NOTES.

BUTTERMILK FOR CALVES AND PRESERVING MUSIMPLONS the Ger-man way: This recipe is from the cook book of a noted housekeeper: Choose melons that are at the perfect stage of ripeness, not hard and yet not too soft, Peel them, cut them in half and re-move the pulp and seeds with a silver spoon. Cut them in preces three inclus long, one inch wide and one-third of an inch thick and cover them with pure of liquids, vaporization, and surface tension. Of these properties perhaps the most astonishing are those exhibited ured at 22 cents per 100 lbs. It will produce a rapid growth on calves and pigs if it does not derange the stomach. But buttermilk is apt to be in a strong condition of fermentation. This very soon produces a bad form of scours, which, unless taken quickly, may end mony, 38 tons: almiuum 38 tons; anti-mony, 38 tons: almiuum 38 tons; bls-muth, 38 tons: copper, 38 tons. At 33 tons per square inch lead actually began to flow, and at 47 tons tin showed the same phenomenon. When pressure of more than fifty tons to the square inch the square inch state of the square fatally. It is hardly safe to feed buttermilk without mixing one-half pound of finished middlings (what the farm-ers call "canel") per gallon of buttermilk. If it is quite sour it should be boiled with the middlings. The heat will neutralize the acidity but it will not be as valuable as before fermentation has eaten up some of the food elements. We often recommend keeping a little flaxseed on hand for checking scours, and it will be most useful here. Boil one quart of flaxseed in six quarts of water. This will become like jelly. Stir a little of this boiled flaxseed into the ration of each calf, or

Beware of Scrofula

In one of his recent interesting lec-

between metals and fluids

tures in London, Prof. Roberts-Austen

spoke of eight prominent points of re-

which have long been known. They

are the rejection of impurities on

solidification, suffusion, flow, under pressure, changes due to compres-

sion, absorption of gases, absorption

by a pressure of 13 tons per square

inch; zinc, by 19 tons, tin 32 tons; anti-

inch was given the metals under ex-periment flowed through the fine cracks

of the compressing chamber like so

much treacle. Prof. Spring also

proved that the crystalline structure of

metals may be changed by pressure as by fusion; and that it is possible even

to build un-alloys by pressure.

Scrofula is probably more general than any other disease. It is insidious in charact and manifests itself in running sores, pustular eruptions, boils, swellings, enlarged joints, abscesses, sore eyes, etc. Hood's Saraaparilla expels all trace of scrofnin from the blood, leaving it pure, chriched, and healthy.

"I was severely affilieted with serofula, and for over a year had two running sores on my neck. Took five bottles of Hood's Sarsaparilla, and consider myself cured." C. E. LOVEJOY, Lowell, Mass.

C. A. Arnold, Arnold, Me., had scrolulous sores for seven years, spring and fall. Hood's Sarsaparilla cured him.

Salt Rheum

Is one of the most disagreeable diseases caused, by impure blood. It is readily cured by Hood's Sarsaparilla, the great blood purifier.

William Spies, Elyria, O., suffered greatly from erysipelas and salt rhoum, caused by handling tobacco. At times his hands would crack open and bleed. He tried various preparations without aid ; finally took Hood's Sar saparilla, and now says: " I am entirely well." "My son had salt rheum on his hands and on the calves of his legs. He took Hood's Sarsaparilla and is entirely cured." J. R. STANTON, Mt. Vernon, Oldo.

Hood's Sarsaparilla Bold by all druggists. \$1; six for \$5. Made only by C. I. HOOD & CO., Lowell, Mass. 100 Doses One Dollar.

In the flush stock times, when W. J. Budd was the idol of the Stock Board, and many who are now satisfied with beer and sandwiches could not endure anything but champagne, he had a boy in his office who made a little turn in speculation, and he determined to go on a little tour of the State. He got a holiday and started. At last he at poker. Two days after this meeting, Budd received a telegram:

W. C. Budd, San Francisco: Please send me \$250 to pay my debts and ex-penses back." Mr. Budd did not answer. The

oung gentleman evidently proceeded to tackle the poker game again, and gram:

forever recognizable by the planting of a beech tree, for centuries known as the "Luther beech." The tree nobly braved the storms and defied the tooth of time until the early part of this cen-tury, when nearly one-half fell to the ground, another portion was destroyed by lightning in 1841, and the remaining stump, protected by an iron fence, still leafed until last year. The past winter killed this last remnant, which still holds its place in the ground, surrounded by Islac bushes. ---Dr. R. von Helmholtz before the
