danger of trouble is passed now."
"I am very glad to hear it." "Yes, it is a great relief. My daughters, you know, married young.

"I heard of their weddings," "Well, they are both living splendidly on their alimony, and my sons are living luxuriously, though quietly, in

ONCE upon a time a miser made a bargain with Hogarth to paint him, for id.if price, a picture of the "De-struction of Pharaoh's Host in the Red When Hogarth showed him the picture it was simply a piece of canvas painted a solid red."

"There," said Hogarth, "is the Red "But where," asked the astonished miser, "are the Israelites?" "They are all gone over," replied the

painter. "Where are the Egyptians?" "They are all drowned

A SOMERVILLE girl has had her room papered with old love letters written to ber by rejected surters. Young men who propose to pay court to her in future will be more likely to win her favor if they write only on one side of

the paper. OLD MRS. BENTLY .- I see, John, that this new faith cure has been the means of savin' a great many people. Old Mr. Bently -So I've heerd, Old Mrs. Bently, -Well, the fust time you pass a drug store, John, I wish you'd stop and get a bottle of it.

MRS DEWINKLE-Did you hear, dear, of the death of Mrs. DeBlank? MR. DE WINKLE-Why, no; what

was the matter? "The doctor said it was the result of imprudent exposure in cold weather. I remember only last month she was complaining that her husband was just like you-too mean to buy her a \$500 "Oh, she was?"

"Yes; and now she is in her coffin." "Well, a pretty fair sort of a coffin can be got for \$10."

MISS MAY JACQUEMINOT (to D'Huyvetter Driggs, the artist of fashion). "It's love, of course, but -dear Mr. Driggs-may I make just one little critcism-one little suggestion?"

Driggs (gallantly), "A thousand if you wish-what's wrong?-the expres-

Miss May, "Oh, no; the expression's just the way I like and the light is lovely and you haven't made me look cross-eyed, and I'm sure I never was so beautifully posed before, but-dear Mr. Driggs, would you mind making that fur on my wrap just a little bit of an inch wider? They're wearing it awfully w de this year, don't you know."

PRETTY GIRL-"An old woman told me to-day that I ought to get some love powder and she said she guessed you kent it." Druggist-"You can make it yourself by mixing half a teaspoonful of sugar with a-a minute quantity of powdered starch. "Yes, and how will I give it to him?" "You must invite him to a supper which you prepare, and slip it into his coffee." "And will that

CARELESS-"What is it?" asked a waiter in an uptown restaurant, as he contemptuously poised a dime, which a gentleman had just given him on, his index finger, "What is it? Why, it's a- Well, I'll be hanged," said the utting the dime back in his pocket. 'if I didn't think I gave you a twenty dollar gold piece! I beg your pardon. "It's my mistake."

ENGAGED YOUNG MAN-"Yes, indeed, my Alice is certainly a little

Married Man-"Well, if she's a little dear now, you can rest assured she'll be dearer when she gets a good chance at your pocket-book."

"Are you out of work?"

"SAY, mister, don't yer want a boy?"

"What did you do during the sum-"I stuck flies onto fly paper in druggists' winders; but fly time's over

MISTRESS-"Where's the meat, Brid-Bridget-"I don't ate mate of a Friday, mum."

Mistress-"But we do." Bridget-"I don't see how yez can whin yez haven't any."

"On, Fanny, you'd never believe it!" "Yes, I would, and I'm dying to "You know Milly Billiggin? I heard from Cella Rouger that she was en-

gaged."
"Is that all? I thought you were going to tell me that she had eloped." Well, dear, you can make it an el-

opement when you tell the story." "Do you know what time is?" asked a passenger on the elevated road of a

stranger at his side. "Yes," replied the other after glancing at his watch. And he resumed his

PATIENT-"Well, doctor, what do Doctor—"Progressive paralysis."
Patient's Wife—"Is it anything like
progressive euchra, doctor?"

"WHAT luck did you have fishing yesterday, Pennybunker?" asked an Austin gentleman of a well known impecunious character who owes everybody, "Splendid! While I was out on the wharf twenty men with bills

called at my house to collect money." HUSBAND, said the telegraph editor's wife, "I wish you would notice that lovely hat at Blank's as you go down to the ofice " "Can't do it my dear," was the answer. "Why not?" "Be cause that don't come in my line. If you want it noticed you will have to see

the city editor about it." "MARIA," said her father, "William asked me for your hand last night, and I consented.

"Well, pa, that's the first bill of mine you haven't objected to."

"PA, why is a girl called a belle?" "Ob, I guess it's because of her tongue," unfeelingly replied the old man.

It is injurious to feed boilers cold water near the bottom, just where they are bottest, because the cold feed water n becoming heated robs the hot sheets of their heat before it can rise. Top feed (say by a pipe running lengthwise of the boiler, three or four inches below the water-line) will save leaks and dan-

A German test for watered milk conded 71,050 foot-tons sists in dipping a well-polished knitting needle into a deep vessel of milk and then withdrawing it in an upright position. If the milk is pure a drop of the fluid will hang to the needle; but the 1,600 feet high before the bottom would addition of even a small proportion of be crushed. If Portland cement were water will prevent the adhesion of the added to the mortar, the height might reach 5,700 feet.

FARM NOTES.

CONVERTING CORN INTO PORK .-Pork and corn seem to be inseparable articles. But unless the corn is properly fed the pork will be expensive. Corn and pork only go together when it is desirable to fatten the hogs. If corn is used in any other manner, or for a different purpose, the pork becomes very expensive product. We do not advocate feeding corn in the summer to any class of stock, and experience shows that while it is invaluable to the pork raiser, and the most convenient article he can use, pork can be produced more cheaply when the corn is fed in a judicious manner. Many farmers, though aged, do not know that clover hay can be fed with advantage to hogs, and yet such is the fact.

We have long separated the hog from all other classes of stock, and denied him the privileges of being fed on grass, cut hay, ground oats, and other food that is more acceptable to him during his growing period than corn, and the consequence is that he fails under the long continued diet of corn, and becomes susceptible to diseases that were before unknown. To keep the steer stuffed with dry corn, which is a concentrated food, and deprive it of bulkly provender and of pure water would cause it to succumb in a short time. Yet this is just the treatment the hog is compelled to undergo, simply because "corn is king," and supposed to be ch ap, when the fact is that when fed under such circumstances it is very costly. What the hog requires is variety, including bulky food, and corn will then perform an important service.

RAISING DAIRY COWS .- Mr. John Gould advises farmers to replenish their dairies by home-bred stock. Mr. Hardin questions Sie utility of this practice on the ground that a small percentage of the heifer calves will grow into profitable cows. Perhaps Mr. Hardin's opinions are based on his experience as a breeder of Jersey Catt.e, and it may well be doubted whether the raisers of such stock can afford to rely upon the home-raised dairy for milk. This breed has been so valuable that one could not afford to reject the offspring of any cow however indifferent. That is, it has been the practice to raise all heifer calves. This took away from the breeder the opportunity of selection, which is the very basis of all improvement. Of course, it is rank me in that class. I have strength possible under this system to choose males from good families, but this at the best leaves the breeder but half a chance to select. It is a wonder that the average Jersey is as good as she is. Indeed it is the strongest proof of the inherent good quality of the breed that the average Jersey is not now an indifferent butter cow. With the ordinary or "scrub" cow the case is different, The farmer with a dairy of thirty cows needs to raise but three or four heifers a year to keep his herd full. If he has a good bull he can select the offthis way the chance is that the majority of his growing dairy will prove better his return. than the average of his old stock.

IN the process of drying grass into hay most of the violatile oils which give green herbage its delicate flavor and odor are lost. But some farmers have found that by putting clover and other grasses in barns while rather green, and m xing with them enough dry straw to absorb moisture, not only preserves the flavor in the hay, but a portion is commake him want to marry me?" "It | municated to the straw, making it will if the coffee is good and everything much better for much cows. It is not impossible that farmers may yet take to sowing sweet vernal grass for the sole purpose of flavoring their winter's supplies of dry hav or straw.

> THE black knot on plams is caused by a vegetable parasite. It developes from spores that are wafted about by the wind. The disease is therefore contaglous, and if it attacks one tree the others may also be affected. The best remedy is to cut off the diseased branches and burn them, as nothing short of fire will answer. The ground should also be sprinkled with a solution of

> The unreliability of chemical tests is strikingly illustrated by leather scraps, which by chemical analysis show a large percentage of ammonia, but in soil tests are found practically whiless. The ammonta which exists in the skin of the anima! from which the lather is made is not destroyed by tanning, but is offset by the astringent

MRS. J. M. HALL, of Tolono, Ill., had a hen that laid two eggs a day. The hen was killed, and out of curiosity | fault that I have met with this unexan anatomical examination was made, which revealed the fact that the hen had two egg sacks, each containing a full matured egg which would have

substances used with it.

been laid that day. Do not work too closely in the melonhills after the vines have begun to run. Manure may be now applied with advantage, but it should be well rotted and spread around the hills, on the edge of the running vines. Work with the hoe in front of the vines, and not

among them. To protect watermelon plants from bugs a South Carolina grower recommends charcoal dust, or coal-kiln dirt, dustling about a pint over each hill when the plants are young. He states he has used the method fifteen years, and always thus protects his

By stirring the soil after every rain the weeds will be more easily destroyed than at any other time. Never allow weeds to go to seed, especially in the garden. A single weed that seeds entails more labor next season than it would cost to clean out all of them at

TEE circulation of sap is like the circulation of blood in the human body when the blood is first started from the stomach, where it is made. If this blood is stopped before it reaches the lungs the blood becomes poisoned and produces disease. So with the potato

vine, which, if the sap be stopped, produces a disease called rust. THE reason why the lower or white portions of the stems of asparagus are less tender than the upper or green parts is that they are older The stems grow from the top not the bottom. As the shoots increase in age the woody

If there hadn't been a touch of ex-centricity about old John Marchhare he would hardly have made such a will. would hardly have made such a will.

Several years before, the vessel on which he was returning from Europe went down at sea: John Marchhare was picked up by one the boats, clinging to a little girl, whose life he had saved, while her relatives and all who knew her were among the lost.

From the little stranger, thus thrown.

From the little stranger thus thrown, upon his care he did not turn away. She was too young to give any account of her parents or family, and all subse-buent efforts to discover her kindred or whence she came proving fruitless, John. Marchhare adopted her and took her to:

his home and heart.

Having neither wife nor child, he felt. free to do as he would with his fortune, and it pleased him that it should go to his adopted daughter-"provided, his will ran, "that if my said adopted daughter shall marryduring the life-time of my brother, Eben Marchhare, whom I hereby constitute her guardian, without the approval of my mid brother, then the foregoing bequests shall become void, and my whole estate shall go to my said brother.

my said brother." George Preston had not waited for the publication of John Marchhare's will as the signal for falling in love with Alice, as several others had done in spite of her beauty. The truth is, he had been in that state as far back as he could remember, And Alice had always liked George. But when George Preston asked Eben

Marchhare's permission to tender his hand to Alice, the old gentleman shook 'Have you a home to offer her?" he asked. "Or means to support her?" he added, before George, in his confusion,

could find an answer.' "Perhaps," he continued, "perhaps you think Alice's fortune sufficient for both. Now, whether she shall have

"It is a question I have never stopped to ask," broke in George indignantly.
"Whether she shall have a fortune or not," said Mr. Marchhare, "depends on her not marrying in my lifetime in opposition to my wishes, and I shall certainly never wish to see her wedded to a man willing to be dependent on the

bounty of his wife " "You must mistake me," cried George, with a flushed face, "if you

and energy-"But as yet they are untried," said Alice's gaurdian, without waiting for him to finish. "I am willing to put you to the test, however, Return in three years the possessor of \$5,000, saved from your own earnings, and if Alice then consents to hear your effer I

shall not oppose it."
George's face brightened. A much severer ordeal would not have daunted im. And, when he took his leave of Alice, though there was no formal plighting of troth between them, he had spring of his choicest milkers, and in no misgiving lest the end of three years should not find her faithfully waiting

> The allotted time had nearly gone by before George had succeeded in laying up the sum which entitled him to appear and claim of Mr. Marchhare the dfillment of his promise,

At a railway station he went into the refreshment room for supper. He had not half finished the scanty repast when the sound of the whistle and the cry of "All aboard!" caused a general commotion and rush for the train. George caught up his overcoat and followed

about to draw on his overcoat when he discovered that the garment he had brought from the supper-room was not his own. It was similar in color and material, but the attempt to put it on at once revealed the difference. He was thunderstruck at the discovery. In a secret pocket of his own coat was the

many precious hopes. He wildly ran about among the dispersing passengers, looking sharply at to find upon him the object of his

search. But all in vain. With a vague purpose of advertising alone to determine the value of manure everywhere and telegraphing in all directions, he was hurrying rapidly along, when whom should he meet but Mr.

George's first greeting was to blurt out his loss. "I am very sorry," said the old gentleman, gravely, "but you know my conditions, and, with respect to their fulfillment, it seems you are just where

you started. "But I was ready to fulfill them, exclaimed George, "and it is not my pected loss,

"No; it is your misfortune. "Give me but anot er chance! 'cried George, "I can earn double as much in the same time. I will work night and

day to do it." "Your time is up to day," said Mr. Marchhare. "And I have promised my old friend, Wells in the event of your failure, that his son, Lawrence, may pay his addresses to Alice to-morrow. The young man is somewhat of a fop, and I doubt if Alice will listen to his suit. Still, my word is passed. Ah, bere be comes—shall I introduce you? "Stwop thief! S wop thief" shoute a flashy-looking youth, rushing forward and seizing George by the collar.

"What do you mean?" exclaime George, dashing aside the hand se rudely laid upon him. "What is the matter, Lawrence?

asked Mr. Marchhare, astonished at the proceeding. "Mattah? Mattah enough, I should say! Why, that's the fellah that stwole my eweat; there it is on his arm.'

"Come come," interposed Mr. Marchhare, "mistakes will happen some times."
"Mistwake!" sneered Lawrence

Wells; "a vewy likely mistake, seeing mine's the best eweat, and his is mor than a yeah b-hind the fwashion. I'm almost ashamed to be sween in it-I am upon my swoul! But I'll have satisfaction-I'll call the police." After a quick glance at the young man's apparel, George flung aside the

coat on his arm, and, placing a hand on each of the dandy's shoulders, got him out of the one he had on in a manner more expeditions than gentle. Hastily examining the secret pocket, George found the money safe, and Lawrence Wells was convinced that there had been a mistake. Mr. Marchbare took him aside and explained that his call on Alice must be postponed for the present. We need scarcely add that it never took place.

Brooklyn is shortly to be furnished with automatic post-office supply boxes from which the citizens may obtain, at any hour of the day or night, a postage stamp of the denomination of 1 or 2 cents, a postal card, a letter envelope, or even a pencil to write with. These conveniences will be fifteen inches high conveniences will be fifteen inches high by seventeen inches deep, and will have the appearance of narrow writing desks. Over each compartment of the boxes will be a slot, into which the price of will be a slot, into which the price of the article must be dropped. The coin sets in motion a simple piece of mech-anism which places the said article in a little drawer beneath. This drawer is at the same time automatically un-locked and pushed out, offering the pur-chaser exactly what he wants. A mo-ment later the drawer closes and locks itself, to await the next customer. Should the supply boxes prove a success they will be introduced in all the large c.ties of the United States. They will doubtless afford a profitable subject for mechanical analysis to ingenious per-sons who may try to invent a scheme for beating them.

Electricity Applied:—Mr. Leo Ehrlich, who is rapidly becoming known as an inventor, has recently completed a device upon which he has been engaged for the last year. It is an electrical stamp, which is to take the place of the hand stamp used in the Post offices for stamping mail and cancelling stamps. It consists of a handle, to which is attached a plate composed of a nonconducting composition, on which is engraved the letters and cancel-mark desired. In these lines is laid a thin platinum or iridium wire, which is held n the form of the letters by a wire thread looped over it like the stitch of a sewing-machine. When an electric current is passed through the letters they become heated to a red heat, and it needs but a momentary application to a letter or postal card or any oth-er combustible material to brand it indebbly. Mr. Ebrlich has applied the principle to a type-writer, and can write it would be more correct to say burn -a note to any one with electricity.

"I do not like thee, Dr. Fell, "I do not like thee, Dr. Fell,
The reason why, I cannot tell."
It has often been wondered at, the bad odor this oft-quoted dector was in. Twas probably because he, being one of the old-school dectors, made up pills as large as builets, which nothing but an ostrich could bolt without nausea. Hence the dislike. Dr. E. V. Pierce's "Pieasant Purgative Pelets are segmented and no larger than lets are sugar-coated and no larger than bird-shot, and are quick to do their work. For all derangements of the liver, bowels and stomach they are specific.

To her it must be gratifying to know that there are many different ways in which this dellcious and economical fruit can be utilized, both for dinner and tea, A dessert, simple Mrs. Lydia E. Pinkham, Lynn, Mass: "Abou and appetizing, is made as follows.

BROWN BETTY .- Lay in a puddingdish first a layer of finely sliced apples, sugared to taste, and dusted over with powdered cinnamon; next a layer of coarsely crumbed bread, buttered at intervals. Alternate these layers until the dish is full. Let the layer consist of apples cut in eighths. Pour on sufficient water to moisten the whole. Stomach's sickness, &c. The hemorrhage is very Cover and set in the oven. When the apples on top are tender remove the cover and cook until brown. Serve hot without sauce.

APPLE JELLY, -Equal to the finest quince currant or crab apple jelly is made in the following manner: Take apples, wipe and slice them; use seeds, skins cloth, taking care not to squeeze. To with lemon and sugar added in the same proportions as in the jelly makes a most excellent marmalade.

Born or steam sweet potatoes until CURE and set in the oven until they begin to and smally the system ber brown. This is an excellent dish. In Virginia a baked sweet potato, with a glass of rich milk, is considered a gool enough dessert for anybody after a plain dinner.

for more than a year and my lite was disparted on. Children and friends were called in to see me die. I was treated by three good physicians, and they and my frie ds did all they could to relieve my suffering—but with no avail. My nips were bistered, and my limbs rub ed, bathed and bandaged, but nothing they could so afforded me even temporary relief. Tongue cannot describe my suffering. I urged them to let me try Dr. Pardee's Hemedy, as I had read so much about it, and of Liose who had been cured by its use, that it gave me confidence in it, although I confess i had little or no faith in the so-called patent medicines. The Remedy was procured, and I commenced using it as directed, and after taking it a short time could see that it was helping me. I began to perspire freely, and as the perspiration increased ince pain decreased, but my clothing and building was a sight to behold, being nonly "as yellow as saftron." I had taken the Remedy but a short time, when I could sleep like a child, and relish my food like one. Thank God it has cured me, and I am to-day as healthy and strong as before, and van walk and have as free use of my limbs as ever. I have recommended your Remedy to the very many who were afflicted, and I do not know of a case that it has not cared. I am confident that it will cure young people, if it will cure at my age. You are at liberty to use my name, if it will be the means of insucing any poor sufferer to use your excellent Remedy. I am very greatfully yours, ICING .- The boiled frosting will go much further in covering a cake than that which is not cooked, and consequently is much less expensive. A lit tie practice in making it will insure success every time. The only fear of failure comes from the danger of cooking the sugar too long. Let it boll until it "hairs" or "threads" from the spoon; then take it off from the stove and stir briskly in the well-broken, but not beaten, whites of eggs. The quan tity must be determined by your needs.

Mix one tablespoonful of butter with half a cup of sugar and stir in two-thirds of a cup of molasses and half a cup of sour milk. If you have no sour milk add a dessertspoonful of vinegar to a cup of sweet milk. To this mixture add half a teaspoonful of cinnamon, a small tablespoonful of cinnamon, a small tablespoonful of gingar, half a teaspoonful of soda dissolved in a little water and enough sifted flour to make a rather stiff batter; then add half a cup of currants or seeded and chopped raisins. Bake in a deep pan.

We have all heard from childhood that "variety is the spice of life. No one can appreciate this saying better than the jaded housekeeper who, on account of the shortness of her purse, has been ringing changes on apple.

ABOUT IT. It does care many had states of the system precisely as we have it Now when the kidneys are diseased, the albumen, the life property of the blood. Now when the kidneys are diseased, which their walls and passes away in the water, while the urea, the kidney pomains, and it is this kidney poison in the blood, that, circulating throughout the end

effects every organ, and produces all the above sur Therefore, we say confidently that "WARNER'S SAFE CURE" is THE MI EFFECTIVE MEDICINE EVER DISCOVERED for the human race. It is the comremedy which, overcoming the common cause, removes the greatest possible number effects from the system. Let us note a few of these diseases and how they are affect

"WARNER'S SAFE CURE."

CONSUMPTION: In a great many cases Consumption is only the diseased condition of the system and not an original distribution of the lidneys are inactive and there is any natural weakness in the lungs, the last attacks their substance and ecentrality they waste away and are destroyed. Dip you acid and it is burned. Wash the finger every day in acid and it soon becomes sore and is eventually destroyed. The kidney poison acid in the blood has the same time effect upon the lungs: For this reason a person whose kidneys are ailing will have attacks of Premounts in the Spring of the year, Lung fevers, Coughs, Colds Branchs Pleurisy, etc., at all seasons of the year, Rectify the action of the kidneys by WARNER SAFE CURE," as many hundreds of thousands have done, and you will be any

IMPAIRED EYE-SIGHT: Kidney acid with some persons has an expectation of the optic nerve, and though we have never and all; add sufficient water to cover as a cure for disordered eye-signt, many persons have written us expressing our and cook until soft; strain through a after a thorough course of treatment with "WARNER'S SAFE CURE," their of been cartly approved. In fact, one of the best oculists in the country says that every pint of juice allow haif the juice of a lemon and a pound of sugar. Bill kidney disorder. We have no doubt that the resson why so many people complain of fa the liquid thirty-five minutes over a eye-sight early in life, is that, all unconscius to themselves, their kidneys base leequick fire before adding the sugar. Al- of order for years, and the kidney poison is gradually ruining the system.

remove. The pulp remaining in the cloth may be squeezed through it, and with lemon and great and great their victims by the capture the capture the capture the capture the capture their victims by the capture the capture the capture the capture the OPIUM HABITS: It is a well-known fact, recently shown and other enslaving had capture their victims by their par lyzing affects upon the kidneys and liver. In the organs the appetite is deceloped and successed, and the best authorities state that the had cannot be gotton rid of until the kidneys and liver accorded to perfect health. For this purparameter the potton rid of until the kidneys and liver accorded to perfect health. leading medical authorities, after a thorough examination of all claimants for the he being the only specific for those organs, have awarded the prize to "WARNER'S S.H.

nearly done, peel them, cut them in slices half an inch thick, pilling a bak.

RHEUMATISM: Every reputable physician will telliped that rheumatism is caused an acid condition of the system. With some it is uricacid, or kids ing dish full of them, interspersed with poison; in others, it is lithic acid, or liver poison. This acid condition is caused by in blespoonsful of granulated white sugar, people more than young people because the acid has been collecting in the sys becomes entirely acidified. These acids produce all the var "WARNER'S SAFE CURE" acting upon the kidneys and it neutralizing the acid and correcting their false action, cures many cases of theumann "WARNER'S SAFE RHEUMATIC CURE," alternating with the use of "WARNER'S SAFE RHEUMATIC CURE,"

BLADDER DISORDERS: Gross and other high medical authorities say that of the bladder diseases originate with false action of kidneys, and urinary tract. Uric acid constantly coursing through these organs in and eventually destroys the inner membrane, producing the intense suffering. Some this kidney acid solidifies in the kidneys in the form of Gravel, which in its descent t bladder produces kishing colic. Sometimes the acid solidifies in the Bladder, produculous or Stone. "WARNER'S SAFE CURE" has restored thousands of cases of inf mation and catarrh of the bladder and has effectively corrected the tendency to the h

"WARNER'S SAFE CURE.

CONGESTION: Congestion is a collecting together of blood in any one place, there is a loss of nervous action in any organ the blood vessels improved for some people if suct is not allow the blood to circulate and it stagnates. If this condition exists very long their added to give it richness. Chop a quarter of a pound of beef suct very fine, add an equal quantity of sugar, one teaspoonful of ginger, half a teaspoonful of salt, enough sweet milk to mois-ten the meal, and a teaspoonful of bak-ing powder, or about a cup of sour

milk and a teaspoonful of sods. This should boil in a bag for at least three hours, and be served hot with wine sauce.

FEMALE COMPLAINTS: What we have said about Congestion applies at particular force to the above complaints. Then as common as can be, and as every doctor can tell you, most of them begin in this condition of the system, which, not being regularly corrected, grows into disease and present these countless sufferings which can be alluded to but not described in a publicity Thousands have been permanently cured.

BLOOD DISORDERS: It is not strange that so many, many people write using since they have given themselves thorough treatment "WARNER'S SAFE CURE" their thick and turgid blood, their heavy, blotched, in skin have disappeared under its potent influence. The bidney poison in the blood sheds It is not readily purified in the lungs, and the result is the impurities come out of the set of the body, and if there is any local disease all the badness in the blood seems to collect here experience justifies us in the statement that "WARNER'S SAFE CURE" is other green control of the set of th blood purifier known." The treatment must be very thorough. STOMACH DISORDERS: Many people complain more or less throughout a year with stomach disorders: Dyspepsia, Indigesia Waterbrash, heat and distress in the stomach, sharp pains, frequent achies, want of appearance of the stomach of th
