ders. Wa quote:

"We have convinced ourselves that by telling what we know to be true, we have produced at last a permanent consiction in the public mind. Seven years ago we stated what the national been given it.

"The statistics of one of the largest not increase over the previous years: other companies stated the same thing. It is not presumptuous for us to claim credit for checking these ravages.

"Seven years ago we stated that the condition of the kidneys was the key to the condition of health; within the past five years all careful life insurance companies have conceded the truth of this statement, for, whereas, ten years ago, chemical analysis to determine the condition of the kidneys was not required, to-day millions of dollars in risks are refused, because chemical examination discovers unsuspected diseases of the kulneys.

"Seven years ago we stated that the ravages of Bright's Disease was insignificant compared with other unsuspected disorders of the kidneys of many misleading names; that ninety-three per cent, of human ailments are attributable to deranged kidneys, which age. fil's the blood with uric acid, or kidney poison, which causes these many fatal diseases.

"The uric acid, or kidney poison, is the real cause of the majority of cases of paralysis, apoplexy, heart disease, convuisions, pneumonia, consumption, and insanity; over half the victims of consumption are first the victims of diseased kidneys.

When the recent death of an honored ex-official of the United States was announced, his physician said that although he was suffering from Bright's Disease, that was not the cause of death. He was not frank enough to admit that the apoplexy which overtook him in his bed, was the fatal effect of the kidney polson in the blood, which had eaten away the substance of the arteries and brain; nor was Logan's physician honest enough to state that his fatal rheumatism was caused by kidney acid in the blood.

"If the doctors would state in official reports the original cause of death, the people of this country would be alarmed, yea, nearly panic stricken, at the fearful mortality from kidney dis-

Surprises in Surgery. — Numerous instances have been recorded of late in the medical journals of the complete reunion of portions of fingers which had been cut off from the hand, in some cases by the knife and in others by the ax. In one case, a man in cutting kindlings for the morning fire, acci-dentally cut off the end of his thumb. He had gone from the place some twenty feet, when he returned, picked up the end, wiped it and replaced it, binding it in its original place as nearly as possible. The wound united, and the finger is now as good as ever, save that its sensibility is somewhat diminished. In another case a boy chopped off the ends of three fingers. He was seen by a physician three or four hours after the che people of the Euglish metropolis in accident. The ends of the fingers had a year's time eat 500,000 oxen, 2,000,been found in the snow and were 000 sheep, 200,000 caives, 300,000 brought to him. He attached them, swine, 8,000,000 head of 'owls. 500,and two of the three united.

HOUSEHOLD.

How the Young Clerk Lightens the Tedium of Business.

The young drug clerk is alone. His imployer has gone to the city to buy stock. There has not been a customer stock. There has not been a customer to the city to buy to the city to buy the cornel of multiple and stir into one stock. spoonfuls of sugar to an egg; then put that it was a detective story. It makes t into the oven until it is a light brown.

CAMPHOR BALLS.-Clarify a pound of mutton suet and add to it three counds of spermaceti, two of white wax and one of gum camphor cut into rery small pieces. Melt these together with gentle heat and stir until the camshor is dissolved, then pour into molds. Frequent application of this emollient will prevent disagreeable roughness of he hands. Should they become chapsed, a most effectual but slightly inconvenient way of healing them is to wrap them in wet cloths with an outide bandage of flannel, first making a 'ree application of the camphor balls. This treatment will soften and whiten he roughest skin, and is also an excelent remedy for chronic rheumatism.

POT ROAST OF BEEF.-Get four of ive pounds from the rump without one. Cut gashes lengthwise and lay n strips of salt pork. Put in a broad oot and pour in a cup of boiling water. lover tightly and let cook about two lours, turning once. During the last salf hour baste several times. Then out the meat when done in a covere lish to keep warm while you cool the gravy by setting it in cold water. When the fat rises skim off every paracle, return the gravy to the fire in a aucepan, thicken with brown flour, boil up and serve. Even the coarser pieces of meat may be made palatable

ENGLISH OATMEAL PORRIDGE .-Wet one cup of oatmeal and a teaspoon-'ul of salt into a paste with cold water and stir into a quart of boiling water; out into a farina kettle; fill the outer ressel with boiling water and set at one nde of the range when you go to bed and the fire is low; stir well before leaving it and again before setting it over the fire in the morning. Do not put a spoon in it again, but cook for more than an hour before dishing.

POTTED BEEF .- Take the smaller round cut from a fine fat beef and bake t with a little salt, the beef being fresh, Make a little gravy with it and put the beef away until the next day, when it must be chopped into small pieces. Fake two nutmegs, one tablespoonful ture is above the freezing point; and if of allspice, one tablespoonful of black it should be too moist, fresh lime placed pepper and a little salt. Beat up the spices and mix them with the gravy in stew-pan. Beat the beef in a mortar very fine, and as you beat, season with

SAVORY EGGS .- Take four eggs, boll them hard, when cold shell them and cut them in half lengthwise, take out the yolks and beat into a smooth paste. To each egg allow a good slice of but ter, half a teaspoonful of anchovy sauce and cayenne pepper to taste. with the yorks; then fill the white nalves with this paste. Serve on a nap-kin and garnish with parsley. This is a most appetizing dish, either for dinner or supper, and enough for eight

FREPARED GLUE .- In a half pint of water in a wide-mouthed bottle put eight ounces of best glue, place the botle in water and heat until the glue is lissolved. Then pour in slowly two and a half ounces of strong nitric acid. Cork tightly. The glue thus prepared s always ready for use, and may be apolied to mending furniture, broken vessels and other articles not exposed to

t into a little oil, and rub the spots well with a piece of flannel dipped in the mixture, after which apply some process must be repeated daily until all trace of the rust has disappeared. To plan to rub them over with the fat from the inside of a fowl and finish them of with whitening.

NUT CAKES .- Half cup of sugar, half cup of butter, two eges, half cup of water, one and one-half cups prepard flour, one cupful hickory nut kerne's freed from bits of shell and dredged in flour. Cream the butter and sugar, Then he wipes his brow with his silk add the yolks of the eggs, the water handkerchief, and adorns his features and flour and the whites. Last of all, and ice if desired.

> CHEAP BEER -Two tablespoonfuls pulverized ginger, one pint hop yeast, one p nt molasses, six quarts cold water; mix well; bottle immediately; in 24 hours it may be used; good in har-

FOR INVALIDS .- Crust coffee is an excellent substitute for tea and coffee; brown the crusts in the oven, pour hot water on them, and let it stand for an hour on the back of the range; use milk same as for other coffee.

DUMPLINGS .- One cup of sweet The word pamplet is derived from milk, one egg, one heaping ter poonful the name of a Greek authoress, Pam. of butter, salt, one teasp outsil of soda. two teaspoonfuls of creof tastar; rub the butter with a little four to a 8,100 plants are needed. Old Scrath is the demon Skrattl, who cream, then add the remaining ingredistill survives in the superstitions of ents, with enough flour to make it very northern Europe. Old Nick is none stiff. Drop the butter by teaspoonfuls

and they cannot fail to be light. MINCED VEAL .- Take three pounds happy chance. Value is also of Ori-ental origin.

of uncooked veal, chop fine; add three beaten eggs, butter the size of an egg, four rolled crackers and enough pepper and salt to season well; one-half grated nutmeg; mix. Press it into a crock or earthen dish and bake half an hour. When ready to serve, turn it out and slice down on a platter. Beef is good

prepared in the same manner. Complaints are often made by those using iron saw-tables that the table becomes charged with electricity to such an extent as to be disagreeable. The table is undoubtedly charged by the friction of the belt. To prevent the table from becoming charged run a small copper wire from the leg of the table to a water, gas or steam pipe. Anything that will carry off the current as fast as produced will do the work

The captain of an Australian schooner, Mr. T. H. Griffiths, reports the setting fire of his vessel by a meteorite on December 12, while in latitude 230, 53 his mouth full ."Guess you don't something engraved on it to denote know much about 'em, mister. Three what he was. "Certainly, certainly," No shock was felt, but two or more hot of these apples'll keep me out of school said the tra lesman; "I'll put a cipher for a week."

effectually.

FARM NOTES.

A New Tuber.—A new esculent having a close relationship to the pota-to, was discovered several years ago by S. Ohroudi, on a little island known as Goritti, at the mouth of the River La engine, a vacuum of 75 per ceat. Plata, the flora of which is limited, and is produced in a pipe, and from which the soil sandy. The plant is named the smaller tubes branch off to each workthe soil sandy. The plant is named the smaller tubes branch off to each work-solunum, after the discoverer, and the shep; the workshops are severally prospecimen found was taken to Brest, vided with small motors, worked, of rance, where it was placed in the care course, by means of the difference of of Mr. Blanchard, gardener of the Sea- pressure between the density of air in men's Hospital. Mr. Blanchard gave the tube and that of the atmosphere it place in the garden, which it has and thus the power can be distributed held ever since, it being impossible to in quantities no greater than may be destroy it. The produce has been taken needed to work a sewing-machine, for up every year at the end of June or the instance. Each workman is supplied nning of July, but notwithstanding with an automatic registering apparaall the pains taken in lifting, there re- tus, and as he is able to shut off the mains enough in the ground to insure a power when it is not require!, he is crop the ensuing year. The solanum charged only for the quantity actually has three sets of creeping stems, one of used; a fixed monthly rent is charged which runs near the surface and throws in addition to the installation, the rent up at intervals young growth which being proportionate to the size of the flower almost as soon as they appear. motor in the workman's room. The Another strikes deeply into the soil and principle of rarified air has been adopted produces tubers, while others take a path winding between the two, produc-ing an enormous quantity of almost and the inconveniences which might microscopical bulblets, which when de-ar se from the chilling consequences of tached; effectually guarantee the plant using compressed air in small workagainst extermination. Cultivation shops are avoided. The importance of has improved the size of the tubers, the exenomic distribution of motive which now grow about as large as a power in fractional quantities in Paris, hen's egg. They have a chestnutty is indicated by the statement that, in taste, accompanied by a slight amount one municipal division alone, there are of bitterness, and are best baked. In live thousand persons engaged in small the climate where Mr. Blanchard's ex- industries, who require in the aggre periments have been conducted, the tubers prove perfectly hardy, but The Garden doubts whether they would be hardy in England. Whether it will prove a valuable acquisition remains to seen. It might be very useful for table use, and its large productiveness would give it value. The crossing of it with the ordinary potato might proluce a hardler and more enduring race than we now have.

premature breeding of cattle, hogs and heep. A rule which would do much how to keep our animals in perfectly healthy condition, and how to ward off diseases which, when they have taken hold, are almost impossible to treat successfully-a rule which would solve these and many more, would be never to allow an animal to breed until it has attained its full development. Like surely begets like; and if an immature sire is employed, strong, vigorous offspring cannot reasonably be expected. The sire may be of the finest breeding. but it cannot implant qualities which it does not possess; and no animal, however fine, can possess the requisite qualities of a breeder until the vigor which only full development can give is acquired.

PEARS AND APPLES,-Both pears and apples will keep best in a cool dry cellar, laid singly on latticed shelves. If they are not to ripen, the cooler the cellar the better so that the temperaunder the row of shelves will great benefit. Again, if the apples be packed in dry barrels, and placed under a shed and protected against all moisthe spiced gravy. Pack in small pots ture, to remain there until late in No-or jars and cover with fresh butter. vember and freezing weather approaches, then remove to a cool dry cellar, as before mentioned, and the barrels headed up, is as good as any way when the quantity on hand is large and the intention is to keep them over winter for spring.

> According to the Chemiker Zeitung, M. Muller has evaporated skimmed phere, and which has valuable almentary properties. He thinks that it may be of great use in pastry, and in various and cheese factories is usually given to animals or wasted in sewage; it contains, however, large quantities of saits and particles of butter and caseine, which can be utilized by Muller's method.

A CORRESPONDENT says that a sure method of protecting young fruit trees from the ravages of rabbits is to place from a polished grate is to scrape down to a fine rowder some bath-brick, put to thirty-six inches in length, about each tree, and tie them near the top and bottom with carpet twine. four or five pieces of cornstocks, thirty can remain on the trees until after the spring planting. The carpet yarn is better than stronger tarred twine, as This the former will be sure to rot before the young tree begins to increase in diameter.

IT is said that the horse's stomach has a capacity of 16 quarts, while that of the ox has a capacity for 250 quarts, but in the intestines this is reversed somewhat, the horse having a capacity for 190 quarts and the ox 100. The you be not understood, n horse, therefore, feeds often and eats lest you be troublesome. slowly, while the ox stores up a large supply of food to be masticated at lei-

RIP out your unnecessary fences and pile up the posts and rails or boards neatly, and protect them from the weather until you have use for them. Every fence that is not absolutely needed is a costly nuisance. An Alloy, consisting of one-third silver and two-thirds of aluminium, is employed in the manufacture of silver-

ware in Paris. It is very hard, and

more easily pressed and engraved than silver copper alloy. An alloy of equal parts of aluminum and silver is as hard as bronze. If the proposed tunnel should be made for the relief of about 180 mines in Gilpin county, Colorado, it would be one of the largest of the kind in the world. These mines produce about two million dollars a year, chiefly gold, of which the total output since its dis-

Peculiar success appears to mave at-nded the method adopted in the Rue aubourg, Paris, for the distribution of mechanical motive power, the prin cip'e adopted in this case being that of rarified air. By means of a large steam in preference to that of compressed air, gate from one thousand to twelve hun Ired horse-power per day.

A German professor spent twenty years in studying the habits and characeristics of a certain snail, and learned this interesting fact concerning it. On the Pacific coast of America, where it is found in great abundance, it is preyed upon by a certain fish which abounds in the Pacific Ocean. As an ald in escaping from its formidable enemy, it THERE is no worse mistake made on has been provided with an eye on the the average farm of to-day than the back of its head. The same small is found on the Atlantic coast, exact'y like its far western brother in every toward solving the many questions of particular except it has no posterior eye. And the reason for this is that there is no corresponding fish to prey upon it in the Atlantic Ocean.

M. Delahaye has instituted a compari son of the relative merits of compressed air and electricity as a motive force for machines in mines. For long distances he says that the latter has the advantage, and the plant required and the expense of maintenance are less than in the case of compressed air. In the coal mines of Zankerode and Oppel, in Saxony, electricity has for some time been employed to work a ventilating fan and draw trains of coal. The fan is distant from the machine which generates the electricity about 2500 feet, and there is an available force of 49 per cent. To work the electric locomotive 37 per cent is found to be utilized, although the generator of the electricity. in this instance, is 2000 feet away.

TEA CARE. - One egg, one and half cupfuls sugar, one-half cupful but-ter, two and a half cupfuls flour, one cupful sour milk, one-half teaspoonful sida. Flavor with lemon.

It is noted that the number of insanpersons in the Massachusetts hospita's has increased 150 per cent. since 1865 while the increase in the population has been hardly 60 per cent. It is also estimated that nine-tenths of the present patients are incurable.

There Shall be no Alps. M. Muller has evaporated skimmed milk in a vacuum, so as to obtain a perber the Alps." ROCHESTER N V GENTS:-For the past winter I have been very badly afflicted with rheumatism. About six weeks ago was confined to my bed, and obliged to use crutches. All the time I had the best medical attendance.

After one week's use of Dr. Pardee's Remody I was able to walk with a cane. I continued its use and can now move around without assistance of any kind, and am better in health than I have been for years. It has effected a permanent cure and I take pleasure n recommending it. C. R. FINNEGAN. Supt. Fire Alarm Telegraph, City Building, Send for Pamphlet to Pardee Medicine Co.

FACETIÆ. THE KING of Hanover and His ourt Ball.-Once at dinner the Duke

of Altenburg, who was in poor circum-stances, father of the crown princess, sat nearly opposite to the King of Hanover. During a pause his Majesty called across the table: "Joseph, a glass of champagne; you don't get that every day at home." One day the Hof-Marshal came in, bearing in his hand a large dispatch, with a broad black rim of deep morning. It was the official announcement of the death of an old archduchess of Austria. The King, who had sent out cards for a court ball, declined to realize the interesting fact, and said, without breaking the seal:

'There, there; take it away. I know all about it. Let her die next week " FELT AGGRIEVED -"They tell me you have been courting young Miss Ransom," said the interlocutor, addressing ex-President Jenkins, of the match company, "How do you get along in the affair?"

"Not very well, sir, I am sorry to say." answered Mr. Jenkins. "Haven't you proposed to her yet?" "Oh, my, yes-seven times," "Seven times! And what does she

"She wants to know every time what she has ever done to me."

A WELL-WORKED SCHEME .- Don't you like jelly care with frosting on top. Mr. Featherly?" inquired Bobby. "Oh, yes," laughed Featherly, "but I thought that I had eaten about all the dessert that I ought. However, since Bobby is so polite about it, Mrs. Hendricks," continued the young man,

"I believe you may give me a small piece of the jelly cake."
"All right," said Bobby, "and I'il have some, too. Ma said I could have I was so troubled a piece if she had to cut into it."

A JUDGE and barrister, being upon indifferent terms, a chent of the barrister making his appearance at the bar with his face and jaw terribly swelled, fully restored. B. F. the judge remarked: "Mr. client of yours would make an excellent barrister-he's all jaw," which, of course set the court in a roar of laughter. On silence being obtained, the barrister remarked: "My lord, I think he would make better judge, for his jaw is all on one

> WIFE-"John, what do you think of the new cook?" Husband-"Excellent, my dear, ex-

cellent. I never enjoyed a better meal than my dinner to-day. Where did you ever manage to find such a remarkably good-looking young lady, anyway?" In just five minutes by the watch the cook was informed that she might find another place.

THERE Was a Difference .- "Boy!" she called from a side window, "you get off'n that fence!" "Do you rent or own?" he inquire !.

"We own this place and you get off." "Mortgage on it?" "No, there's no mortgage on it." "Then I'll hitch over the line to the next fence. That woman dasn't drive me off, for she's two months behind in

"AT what time did you get home from the club last night, Jack?" "At three in the morning." "Awakening your wife, no doubt?"

"Yes. Tom, That's my usual luck,

know." "What did you say?" "I didn't say auything. There wasn't anything left to say after she had finished."

A NEWSBOY who was eating away at whenever I was able to get around, was a yellow banana, while he had two re-obliged to use crutches. All the time I had ones stuffed in his pockets, was apreached by another and asked: "Did you get your tintype took fur ten cents?

"Naw." "Too cloudy?" "Naw! I was on my way to the gal ery when bananas dropped to three for ten cents and I look advantage of the decline. Tintypes are allus ten cents. but bananas bob up and down."

A LADY accompanied by her 3-yearold daughter got into a crowded car one day. The lords of creation being absorbed in their newspapers, neglected to give her a seat. When the glected to give her a seat. little one cried in plaintive tones "Mama, don't stand up," a dozen seats were vacated with a spontaneity that was really startling. And yet they tell us that children should be seen and not

RADWAY'S SARSAPARILLIAN RESOLVEY

PISO'S CURE FOR CONSUMPTION

HAINESVILLE, N. J., October 15, 1886. E. T. HAZELTINE, Warren, Pa. Dear Sir: I was taken with a very

severe cold last Spring, and tried every cure we had in the store, and could get no help.

I had our village doctor prescribe for me, but kept getting worse. I saw an-other physician from Port Jervis, N. Y., and he told

me he used Piso's Cure for Consumption in his practice. I bought a bottle, and before I had taken all of it there was a change for the better. Then I got my employer to order a quantity of the medicine and keep it in stock. I took one

more bottle, and my Cough was cured. Respectfully. FRANK MCKELVY.
