A Chostly Legend of the Black Monatains.

Last of the mighty race of Windeck famed for brave men and lovely women, was Adelheid, beiress of the castle and broad lands that had been owned by her ancestors, and, so far as beauty went, she was worthy of her lineage. but of proud and haughty temper. proud was she that among all the nobles of Brisgan she could find none whom she thought worthy to call her

Among those whom she had, after her fashion, first attached to her by every art, and afterward repelled with bitter derision, was a young man of noble family, but slender fortune, who had long been in her service as page and squire, as the fashion of those days

demanded. Stung to the heart by her hard speeches and by the sense of his own folly and presumption, which suddenly poured upon him like a flood, he left his mistress's presence only to write a word of farewell to his mother, whose only son he was, and whom he tenderly loved, then threw himself into the

A few days afterward a woman, maddened with rage and sorrow, a widow whose only son had diel a suicide's death, sought the Lady Adelheid in her castle on the hill, accused her of being the murderer of her boy, and heaped upon her head the bitterest curses that her outraged mother-heart could devise or her woman's tongue

Thus shall your spirit wander through these very halfs until you find a lover as true, as honest, as pure-hearted as my poor, lost son, willing to woo the phantom of his bride. Then

only shall you rest in peace." Under this curse, says the legend, the lady of Windeck lived and died. She was the last of her race, and not many years after her death the castle, uninhabited and deserted, fell into

It happened, however, that one day a young hunter of noble family, Kurt Von Stein by name, a stranger guest led in the excitement of the chase up to the very gate of the deserted manslop. After awhile the idea occurred to the young man that he might as well pay his respects to the owner of it. So he made his way up the staircase and knocked at a door which was at the top of it. The door opened noiselessly, as though by an unseen hand, and admitted him into a long corridor lighted and adorned with white marble statues. Next he came into a great hall, on the walls of which hung a number of antique portraits, while in the centre of the apariment was a table spread as if for supper. He sat quietly down at one end of the table, which was laid for two persons. Scarcely had he done so when the door of the room opened noiselessly and a lady, young and beautiful, but with a somewhat sad and pale face, entered the

Who shall say how it came about? The lady was beautiful, the man was young. In such cases love is some- century. times found to be a plant that does not take long in growing. Moreover, Von Stein, though noble, was poor, and the lady the last of her race, the heiress of an acient lineage. Passibly the notion of the inheritance the lonely girl might

It was not long before he found himself kneeling at ther feet and offering the beautiful maiden all that he had to offer—his devotion and his life.

The lady listened silently and with bowed head to his ardent pleading. 'Come," she said to her lover, and

led the way. A little bewildered, after the fashion of bridegrooms in general, and scarcely knowing whether to be happy or alarmed, the young man followed his bride through, as it seemed to him, miles of dimiy lighted vaulted passages until at length they reached a vaulted chamber, which they had no sooner entered than a great fron door shut heavily behind them with a sound that echoed through every arch of the dimly lighted building. It was the

"Your hand is cold, said the young man tenderly to his bride. "No matter. Yours has warmth and life enough for both," returned

the lady. Yet the life seemed actually to ebb from the young man's heart as he observed the stone figure of a bishop which was sculptured in a gravestone in the centre of the chapel gradually rise from its recumbent position and walk up the steps of the altar. The eyes of the bisbop flamed like glow-worms, the candles upon the altar lighted of themselves and the tones of an organ rolled selemnly through the vaulted building.

"Kurt Von Stein, wilt thou take the Lady of Windeck forthy lawful wife?" said the bishop in low, sepulchral tones, which sounded as though not he but some muffled voice a dozen yards away was speaking.

At this moment the whole horror of the scene seemed to break upon the young man. Around him, slowly risfrom their graves, he saw the shrouded forms and fleshless faces of the dead, who came as witnesses to the ghostly marriage. Even the face of his bride, as his fascinated eyes fixed upon it, wore the livid hue of death. He turned in an agony to fly from the horrible scene, tried to snatch his hand from the cold, hard grip of the phan-tom lady, fell, as he believed, senseless upon the chapel floor-and awoke to and himself, at dawn of day, lying at his full length on the moss-grown stone where he had sat at rest the night before at the castle door and his horse intent upon an early meal on the rank herbage of the grass-grown court.

Royal Bodies Well Preserved.

Edward I., who died in 1307, was found not decayed 463 years subsequently. The flesh on the face was a little wasted, but not putrid. The body of Canute, who died in 1017, was found fresh in 1766. Those of William the Conqueror and his wife were perfect in 1522. In 1569 three Roman soldiers, in a dangerous diet for weak persons at all. the dress of their country, fully equipped with arms, were dug out of a peat mass near Aberdeen. They were quite fresh and plump after a lapse of

about 1500 years. In 1717 the bodies of Lady Kilsyth and her infant were embalmed. In 1796 they were found as perfect as in the hour they were embalmed. Every feature and limb was full. The infant's features were as composed as if he had only been asleep for eighty years. His color was as fresh and his flesh as plump and full as in the perfect glow of health. The smile of infancy and innocence was on his lips. At a little distance it was difficult to disguish whether Lady Kilsyth was alive or dead. The question is; What preservation was used, and how applied?

"ME, PORTER, you delivered my "Yes,"

"With what result?" "He knocked me down for my im-

"And what did you do?" "I put up with it, sir. It was in the line of his profession, you know." "Why, he's no slugger." "No, he's an auctioneer."

SCIENTIFIC.

There are three forms of atmospheric points, sometimes flaming up two feet high. Auroras are always accompanied by magnetic storms, showing that they robably depend upon disturbances of the electricity of the atmosphere. Lightning appears in three forms.

sheet, zigzag and globular. The two former are very common and known to all. The latter is rarely seen and its existence has been doubted by persons existence has been doubted by persons fluence variations in amimals, and that who have never seen it. But the evidence of its occasional appearance is judicious breeding the result is largely influenced by the mode and periods of stance was cited in which a ball of feeding, as also by the quality and lightning had been followed for two miles. It moves slowly and has never A normal condition cannot be suswas killed by a fireball. The ball was seen slowly rolling over the surface of the ground, and the pig going up to it rooted it over with his nose, and, "it of growth and warmth. Certain foods, was bad for the pig."

A series of tests has recently been made by Dr. Fischer, the well-known German chemist, showing that in ordinary domestic stoves in use not more than 20 per cent. of fuel consumed is really utilized for warming the rooms, whereas with stoves burning gas 80 per cent, and more of the possible effect is obtained. In a sugar manufactory at Elsdorf, it is stated no steam-engines have been used for several years. Gas is made at a cost of about 10d. per 1000 cubic feet, and is used for lighting and driving gas-engines. At the Essen works water gas is made at a cost of 4d. to Sd. per thousand feet, and serves both for fire and lighting.

A new work by Dr. Louis Jobert states that no purely left-handed race has ever been discovered, although seventy per cent, of the inhabitants of the Penjab use the left hand by preference, as do also the larger part of the Hottentots and Bushmen of South Afrea. In a study of criminals Dr. Marro has found that from fourteen to twenty-two per cent. of convicts were in one of the neighboring castles, was left-handed, the highest ratio among the people of all classes being only nine in the hundred.

A manufacturer of Roubaix, M Henry Buisini, has just discovered a very curious application of electricity to looms. He adopts an indicator which strikes when a thread in the warp breaks, and thus saves the warper from taking out any of his work to find the flaw, and he need not pay such close attention to the quickly moving threads which is so injurious to the sight. The invention can be applied to ower-looms.

The coast of Norway is sinking gradually, while that of Sweden is emerging more and more, and the Baltic is becoming shallower. Landmarks made on the Swedish coast by the celebrated naturalist, Linnaus, at the beginning of the eighteenth century, shows that this upheaval raises the coast about four feet in the course of a

A new use has been found for jute in the manufacture of a material called 'asphalted jute," which is now largely used in Europe for covering roofs, isolating damp walls and floors, etc. It where a material is required that is at once strong, impermeable and cheap.

A cement for sealing bottles, etc., is made as follows: Mix three parts of resm, one of caustic soda, and five of water; this composition is then mixed with half its weight of plaster of Paris. The compound sets in three quarters of an hour, adheres strongly, is not permeable like plaster used alone, and is attacked only slightly by warm water.

M. Fayot has ascertained that the absorption of atmospheric oxygen by coal dust usually produces the rise in temperature to which spontaneous combustion is due. Lignite is ignited at the low temperature of 300°, authracite at 5780, and other varieties of coal, in a powdered state, at intermediate temperatures.

The interesting discovery has been made in Switzerland of a bright-green moss growing on calcareous rocks 200 feet below the surface of Lake Leman. No other moss has been known so far under water, and how chlorophyl-the green coloring matter-could have been so richly developed in a place so emote from the light is a problem.

By the use of gold-coated selenium plates, Mr. C. E. Fritts expects to accomplish the important object of converting the greater part of light inteelectrical energy, which may again be transformed into light as required.

A doctor in St. Louis explains the necessity of having two ears by the fact that sound is always heard more distinctly by one ear than by the other, and in this way it is located. A man with but one ear can hear just as well as a man with two, but he cannot lo-

Sea sand is not the best in the com position of mortar, since it contains salt and its grains are round, being worn by attrition, and consequently having less tenacity than sharp-edged

Powdered slaked lime and Smith's forge scales, mixed with blood in suitable proportions, makes a moderate hydraulic mortar, which adheres well to masonry previously coated with boiled

When lumber is exposed to currents f air at a high temperature, the moisture evaporates too rapidly and the wood cracks; and when the temperature is dry and sap remains, it ferments and dry rot ensues.

Experience in a Glasgow hospital has taught that while boiled or fried fish is

"WHY don't you marry?" "Well, you see I am very particular how my intended should be-"

steamed fish is harmless.

"Explain yourself." "My wife must be rich, handsome and stupid. "Why all that?"

Very simple. She must be rich and handsome, otherwise I would not have fixed and will not rust. her, and she must be stupid, otherwise he would not have me."

A K. STREET girl and a young Conressman were engaged the other evening in bantering Cupid. "Ah!" she said prettily, after one of his soft speeches, "I see a flush on your cheek "

"No!" he exclaimed, nervously, put-ting his hand to his face. "Is it a bob. tail or a straight?" Our national legislators will never be successful lovers until they reform.

DE BAGGs-"I know how to manage Bagley-"You do? Then why don't you manage her?" De Baggs-"She won't let me." FARM NOTES.

FEEDING FOR GROWTH OR FAT. electricity, viz: Auroras, St. Elmo's Simply feeding an animal without fire and lightning. St. Elmo's fire is some definite object in view is to waste oftenest seen at sea, playing about the the food or else deprive the animal of something it may require unless the farmer knows the quality of the food given and the nutritive value of the ingredients of which it is composed. So important is a knowledge of the proper mode of feeding that it is often possible to produce a more perfect animal from a grade than from a thoroughbred, and Darwin expresses the opinion that the quality of the food in-

been known to harm any person. An tained in an animal except by a mixed instance was narrated in which a pig diet No single article of food used rich in nitrogen, are required for pro-ducing flesh. These foods are known as "flesh-formers," and are derived from the gluten of grains, the legumen of clover and from the different forms of nitrogen in all the plants used as food, being transformed in the body of the animal into flesh and to supply the natural waste of the muscles and cartilages, the surplus being imparted to the products of the animal, as ca ein in milk or albumen in eggs from birds.

> MANY carefully conducted experiments have proved beyond a doubt that young animals pay much better for feeding than do those which have long passed their years of growth If this fact were more generally realized there would be fewer old animals kept and farmers would change their stock much oftener than has been their practice. Many buyershave already learned better than to ever purchase an old cow or pair of oxen, because they know that no gain in growth can be obtained, only a gain in constitution, and this at a cost fully equal to all it will bring when the animal is again offered for

Cows are as liable to founder as horses, or at least will show the characteristic lameness of this disease after overfeeding on almost anything. We have seen it where apples, potatoes or green corn were the articles with which the stomach was overloaded. Any such rations fed to excess will stop at once the flow of milk in the best cow. and it will take several days of careful management to restore it. If she dungs freely keep her in a dry place, especially at night, and give light, nutritious, but easily digestible A cow suffering from indigestion is very liable to take cold if exposed to storms and chilly weather at night.

DISCUSSING grafted varieties of fruit rees, a writer says: This opportunity to grow different kinds of fruit on one tree imparts a new and delightful interest to the orchard. The proprietor can always be on the lookout for something new and fine, and the few moments required in grafting or budding make it his. The operation is so simple and easy that he can learn to perform it himself, and there are always plenty of adepts in the rural vicinage to give him his Initial lesson. he will keep the standard kinds for his is adapted for use on farms in making main support, he can gratify his taste sudden passion which filled the young man's heart. Who can tell?

tight reservoirs, or in the construction of bridges and is of value in any case

main support, he can gratify his taste and eye with some pretty innovations. I know of an apple tree which have over 100 varieties.

> SECRETARY SHAFFER, of the Iowa Agricultural Society, says the cabbage worm has destroyed whole fields and acres of eabbage, and the remedies of ashes, lime, brine, salt and lye have been failures. Birds do not take them, and hens and chickens tied among the plants, which were previously covered with meal, never touched a worm nor drove away the swarm of butterflies, which were so numerous as to appear like a snow-storm. But the use of pyrethrum was attended with entire access. A pound of the leaves of this plant mixed with 150 gallons of water killed every young worm with which it came in contact, while it is barmless

GRYPES should be trimmed now and the vineyard well cultivated both ways. As a precautions against rot dissolve a pound each of sulphate of copper and copperas in four gallons of boiling water. Then add four gallons more in three or four hours after, and while the solution is warm use it for slaking freshly burned stone lime, getting the lime into as fine condition as can be done, Scatter the lime around the vines, covering the ground well, and dust the vines also. When the vines are in full leaf give a light dusting over them again. if this does not prevent rot entirely it will greatly assist in reducing its ravages, and by repeating the application for two or three seasons the disease may be eradicated.

MALIGNANT foul brood is always iggressive, ne : retrograding; and allough there are times during a heavy ney-flow when the bees make a deserate effort to clean it all out, yet, as many succumb to the inevitable, for by that time the combs have become literally a putrid mass.

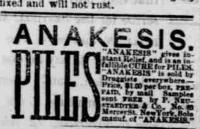

SAWDUST, when used as bedding and then added to the manure heap, will decompose if the heap heats sufficiently to become "rotted," and it will not only serve as an absorbent but add a certain amount of fertilizer to the soil

BEE-KEEPING is a profitable industry to those who are adapted to and horoughly understand the business. A young man in Illnois has already sold 10,400 pounds of honey this season from 135 colonies of beer.

PROFESSOR WALLACE thinks that much of the advantage of cooked food may be gained and labor Jessened by pouring hot water over chopped food, which at least is a better mode of feeding than that of giving no preparation

A STOCK-RAISER found that by changing from soft to hard water many bone diseases were avoided and cures effected of those suffering from horn brittleness owing to the mineral matter existing in the hard water.

It has recently been discovered that crews dipped in a mixture of oil and

COCKLE'S

DYSPEPSIA

Causes its victims to be miscrable, hopeless, confused, and depressed in mind, very irrita-ble, languid, and drowsy. It is a disease which does not get well of itself. It requires which does not get well of itself. It requires eareful, persistent attention, and a remedy to throw off the causes and tone up the digestive organs till they perform their daties willingly. Hood's Sarsaparilla has proven just the required remedy in hundreds of cases. "I have taken Hood's Sarsaparilla for dyspepsla, from which I have suffered two years. I tried many other medicines, but none proved so satisfactory as Hood's Sarsapa THOMAS COOK, Brush Electric Light Co.,

New York City. Sick Headache

"For the past two years I have been afflicted with severe headaches and dyspep-sia. I was induced to try Hood's Sarsapa-rilla, and have found great relief. I cheer-fully recommend it to all." Mrs. E. F. ANNABLE, New Haven, Conn. Mrs. Mary C. Smith, Cambridgeport, Mass., was a sufferer from dyspepsia and sick head-ache. She took Hood's Sarsaparilla and

found it the best remedy she ever used. Hood's Sarsaparilla Sold by all druggists. \$1; six for \$5. Made only by C. I. HOOD & CO., Lowell, Mass. 100 Doses One Dollar.

HOUSEHOLD.

To BAKE CAKE .- Most cake requires a moderately hot oven to make it rise up well. Fruit cake, however, should be put into a slow oven, as it needs longer baking and is apt to burn. For all cake the heat should be well kept up. If allowed to decrease the loaves will be doughy inside, or at least heavy: Sponge cake, in particular, needs a steady heat. Jelly cake, and all layer cakes, need a hot oven, and are easier for a novice to bake than any other kind. They bake quickly. Watch carefully to see that that they do not burn around the edges. Except with layer cakes, do not open the oven door till the end of ten minutes. It might chill the cake while rising, which is the most critical time. When opening the oven, take care that no old draught of air from an open window or door strikes in. Do not slam the oven door when it is to be shut, or jar the pans by moving them unneces-

it in the tureen with some dice of fried over these and serve hot.

ROAST CHICKENS are a delicacy, if the chickens are of good quality. Obtain, if possible, chickens with a whole breast-bone, truss them neatly and let them be carefully singed; put celery bacon over the breast and roast in a All druggists. moderate oven, basting frequently. Time of roasting, about an hour. About ten minutes before they are done, remove the paper or bacon and sprinkle them freely with salt. Serve with plain gravy in a boat, not in the dish; garnish with thin slices of broiled bacon rolled up.

POTTED SURIMPS,-Shell a quart of shrimps, freshly bolled, chop them suspicion of mace, and, just at the last, some finely chopped chives. Serve

STEWED MUSHROOMS.-If canned, drain free from all liquor, turn them into a granite pan with one ounce of butter. Let fry five minutes, stirring constantly, then dredge thickly with flour, mix, add a half pint of cream, soon as that flow ceases, even an inex-perienced eye can tell that the disease stir until it boils, add salt and pepper is surely and steadily advancing, so that to taste and serve at once. Fresh in less than one year from the time mushrooms are stewed in the same manner; of course, peeled and washed first. Mushrooms may also be baked in the oven, basted and served with a lit-

> BAKED INDIAN PUDDING .- Stir colling water thick with cornmeal, few minutes, take from the stove and stir in sweet milk until it is thin like gruel, salt and sweeten to taste. For a two-quart basin full, three eggs well beaten and one-half a nutmeg, piece of butter size of an egg. Bake one hour in a slow oven. This is

SPONGE JELLY ROLL .- Four eggs, one cup and a half of 'sugar, one tablespoon baking powder, beat the whites separately and the sugar and the yolks together till very light, then add part of the whites, then a cup of flour, then beat good, then a little more flour, then the rest of the whites and stir easy, put it in and bake. Spread and roll as

MOCK CAVIARE. - Bone some anchovies, chop them lightly and pound them in a mortar with a little dried parsley, a clove of garlic (shallot is usually strong enough, especially if a piece of garlic has been rubbed once or twice across the mortar), cayenne, salt,

GREEN BUTTER.-Wash and pick fillet of anchovy on the top.

PLUM PUDDING .- One pound currants, one pound bread crumbs, one-half pound raisins, one pound such chopped fine, four eggs, one table-spoonful brandy, sugar and nutmeg to

LIVER, BLOOD AND LUNG DISEASES.

LIVER DISEASE

Mrs. Mary A. McClure. Columbus, Educ., writes: "I addressed you in November, 1884, in regard to my health, being afflicted with liver disease, heart trouble, and female weakness. I was advised to use Dr. Pierce's Golden Medical Discovery, Favorite Prescription and Pollets. I used one bottle of the 'Piesasant Purgative Pellets.' My health began to improve under the use of your medicine, and my strength all day, or walk four or five miles a day, and stand it well; and when I began using the medicine I could scarcely walk across the room, most of the time, and I did not think I could ever feel well again. I have a little baby girl eight months old. Although she is a little delicate in size and appearance, she is healthy. I give your emedicies all the credit for curing me, as I took no other treatment after beginning their use. I am very grateful for your kindness, and thank God and thank you that I am as well as I am after years of suffering."

Mrs. I. V. Webber, of Forkshire, Cattarangua Co., N. F. writes: "I wish to say a few words in praise."

LIVER

LIVER

DISEASE.

Mrs. I. V. Wenber, of Yorkshire, Cattaraugus Co., N. Y., writes: "I wish to say a few words in praise of your 'Golden Medical Discovery' and 'Pleasant Purgative Pellets.' For five years previous to taking them I was a great sufferer; I had taking them I was a great sufferer; I had taking them I was a great sufferer; I had now well and strong, thanks to your medicines."

Chronic Blarrhea Cured.—D. Lazanra, Esq., 275 and 277 Decatur Street, New Orleans, La., writes: "I used three bottles of the 'Golden Medical Discovery,' and it has cured me of chronic diarrhea. My bowels are now regular."

BENERAL

DEBILITY.

Mrs. PARSIEJA BREEDAGE, of Est Lock Street, Local Control, N. Y. writes: "I was troubled with Local Control, and my mouth was badly cankered, sore throat, and my mouth was badly cankered. My liver was inactive, and I suffered much from My liver was inactive, and I suffered much from My liver was inactive, and I suffered much from My liver was inactive, and I suffered much from My liver was inactive, and I suffered much from Golden My liver was in pleased to say that your 'Golden Medical Discovery' and 'Paints' have cured me of all these alignments and I cannot say enough in their praise. I must also alignments and I cannot say enough in their praise. I must also alignments and I reference to your 'Favorite Frenchiption,' as it has proven itself a most excellent medican for weak females. It has been used in my family with excellent results."

Dysnepais. James L. Colley, Esq., of Yucaton, Houston College. It has been used in my family with excellent results."

It has been used in my family with excellent results."

Dyspepsiz.—Janzs L. Colhy, Esq., of Yucatan, Houston Co., Minn, writes: "I was troubled with indigestion, and would eat meantily and grow poor at the same time. I experienced heartburn, beartily and grow poor at the same time. I experienced taking your to that disorder. I commenced taking your to that disorder. I commenced taking your Golden Medical Discovery and 'Pellets,' and I mm now entirely free from the dyspepsia, and I mm now entirely free from the dyspepsia, and mm, in fact, henithier than I have been for mich work the past summer as I have ever much work the past summer as I have ever much work the past summer as I have ever much work the past summer as I have ever much work the past summer as I have ever much work the past summer as I have ever took a medicine that seemed to tone up the nuscles and invigorate the whole system equal to your 'Discovery' and 'Pellets.'" Dyspepsia. Theresa A. Cass, of Springfeld, Mo., writes:
I was troubled one year with liver complaint, dyspepsia, and
leopiessness, but your 'Golden Medical Discovery' cured me." Chills and Fever.—Rev. H. E. Mosler, Montmorenel, S. C., writes: "Last August I thought I would die with chills and fever. I took your 'Discovery' and it stopped them in a very short time."

"THE BLOOD IS THE LIFE."

Thoroughly cleanse the blood, which is the fountain of health, by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and bodily health and vigor will be established.

Golden Medical Discovery cures all humors, from the common pimple, blotch, or eruption, to the worst Scrofula, or blood-golden Medical Discovery cures all humors, from the common pimple, blotch, or eruption, to the worst Scrofulaus Sores poison. Especially has it proven its efficacy in curing Salt-rheum or Tetter, Fever-sores, Hip-joint Disease, Scrofulous Sores and Swellings, Enlarged Glands, and Eating Ulcers.

Rev. F. Assury Howell, Paster of the M. E. Church, of Silverton, N. J., says: "I was afficted with catarrh and indigestion. Boils and blotches began to arise on the surface of the skin, and I experienced a tired feeling and duliness. I began the use of Dr. Pierce's Golden Medical Discovery as directed by him for such complaints, and in one week's like a new man, and am now sound and well. The 'Pieasant Pargative Pellets' are the best remedy for billous or sick headache, or tightness about the chest, and bad taste in the mouth, that I have ever used. My wife could not walk across the floor when also began to take your 'Golden Medical Discovery.' Now she can walk quite a little ways, and do some light work." Mrs. Ina M. Strang, of Ainsworth, Ind., writes:

"My little boy had been troubled with hip-joint disease for two years. When he commenced the use of your Golden Medical Discovery' and not be moved without suffering great pain. But now, thanks to your 'Discovery,' he is able to be up all the time,

and can walk with the help of crutches. He does not suffer any pain, and can eat and sleep as well as any one. It has only been about three months since he commenced using your medicine, I cannot find words with which to express my gratitude for the benefit he has received through you."

A TERRIBLE

AFFLICTION.

Fix in Disease.—The "Democrat and News." of Combridge, Marpland, says: "Mrs. Eliza Ann Poole, wife of Leonard Poole, of Williamsbury, Dorchester Co., Mid., has been cured finansbury, Dorchester Co., Mid., has been cured for a bad case of Eczema by using Dr. Pierce's Golden Medical Discovery. The disease appeared first in her feet, extended to the knees, covering the whole of the lower limbs from feet to knees, then attacked the elbows and became to severe as to prostrate her. After being treated by several physicians for a year or two she commenced the use of the medicine named above. She soon commenced the use of the medicine named above. Poole thinks the medicine has saved her life and prolonged her days."

Mr. T. A. Ayrass, of East New Market, Dorchester County, Md., vouches for the above facts.

Consumption and Heart Disease.—"I also wish to thank you for the remarkable cure you have effected in my case, thank you for the remarkable cure you have effected in my case.

WASTED TO

A SKELETC

To a skeleton; could not skeep nor rest, and many times wished to die to be out of my misery. If then consulting you i had wasted away to the mouths' treatment in all. The first two months I was almost discouraged; could not perceive any favorable symptoms but the third month I began to pick up in flesh and strength. I cannot now recte how, step by step, the signs and renilies of returning health gradually but surely developed themselves. To-day I tip the scales at one hundred and sixty, and an well and strong.

Our principal reliance in curing Mr. Downs' terrible discuss was the "Golden Medical Discovery."

CONSUMPTION, WEAK LUNGS, SPITTING OF BLOOD.

GOLDEN MEDICAL DISCOVERY cures Consumption (which is Scrofula of the Lungs), by its wonderful blood-purifying, invigora-ting and nutritive properties. For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Severe Coughs, Asthma, and kindred affections, it is a sovereign remedy. While it promptly cures the severest Coughs it strengthens the system and purifies the blood.

It rapidly builds up the system, and increases the first and weight of those reduced below the usual standard of health by "wasting diseases." cal Discovery' has cured my daughter of a very bad ulcer located on the thigh. After trying almost everything without success, we procured three lottles of your 'Discovery,' which healed it up perfectly." Mr. Downs continues:

It rapidly builds up the system, and increases the flesh and w "wasting diseases."

Consumption.—Mrs. Edward Newton, of Harrowsmith.
Out., writes: "You will ever be praised by me for the remarkable cure in my case. I was so reduced that my friends had all given me up, and I had also been given up by two doctors. I then went to the best doctor in these parts. He told me that medicine was only a punishment in my case, and would not undertake to treat me. He said I might try Cod liver oil as a list treatment, but I was so weak I could not keep if far advanced. I tried the Cod liver oil as a list treatment, but I was so weak I could not keep it on my stomach. My husband, not feeling satisfied to give me up yet, though he had bought for me everything he saw advertised for my complaint, procured a quantity of your "Golden Medical Discovery." I took only four bottles, and am entirely free from that terrible cough which har rassed me night and day. I have been afflicted with rheumatism for a number of years, and now feel so much better that I believe, with a continuation of your "Golden Medical Discovery," I will be restored to perfect health. I would say to those who are falling a prey to that terrible disease consumption, do not do as I did, take everything else first; but take the "Golden Medical Discovery" in the early stages of the disease, and thereby save a great deal of suffering and he restored to health at once. Any person who is still in doubt, need but write me, inclosing a stamped, self-eding and be restored to health at once. Any person who is still in doubt, need but write me, inclosing a stamped, self-eding and be restored to health at once. Any person who is still in doubt, need but write me, inclosing a stamped, self-eding and be restored to health at once. Any person who is still in doubt, need but write me, inclosing a stamped, self-eding and be restored to Poly, when the foregoing statement will be fully substantiated by me."

Under Cured.—Isaac E. Downs, Esq., of Spring Valley,

Ulcer Cured. ISAAC E. Downs, Esq., of Spring Valley, tockland Co., N. Y. (P. O. Box 28), writes: "The 'Golden Medi-
