Last Wednesday night, a number of armed men were placed on a passenger train that "pulled out" of Missouri City, on the Wabash Western Railroad. They were put on the train to protect it from robbers who intended to stop and rob the train at Cooly's Lake a lonely summer resort. The passengers were not informed of the danger. As the train neared Cooly's Lake a red danger light was seen on the track. When the train stopped three armed men ordered the engineer to step down, he did so, and at that instant two officers in the engine cabin opened fire on the three robbers, the officers fire was returned. Other officers from different parts of the train came upon the scene. One of the robbers was shot; they were farmers that lived in that neighborhood.

The Bloomfield Advocate of last week says: Messrs. Critchfield & Myers of Rye township, are still mining for coal in the Cove Mountains, on the Penn township side, about two miles north of Hartman's Mills. The prospects grow brighter every day, and the coal becomes harder and of better quality the deeper the operators go. A miner from Shamokin, having 20 years' experience in mining, visited the shaft last week, and said that there was undoubtedly a large vein of coal in the Mountain. The coal is used by the farmers in Rye township, it being sold at $2.50 per ton at the mine. A man from Carroll township drove to the shaft on Monday for a load of coal. The men say another vein of coal runs from one side of the mountain to the other side. Greater interest is being shown in the operation.

The Juniata Turtle.

Peter Weitz and Jeremiah Thompson are fishermen. They have a boat half the size of an ordinary canal boat and migrated on the canal at will between Newport and points east and west, having been as far up as McVeytown.

While fishing in considerable quantities were caught, they devoted much attention to catching turtles. In all, they say they have captured not less than 1000 since August and have now in their boat, lying in the canal, along Water street, between 600 and 700 in prime condition for market.

Through the center, half the length of the boat, is a trough containing water to which the turtles have access as instinct may direct them.

They are an excellent barometer and indicate the approach of climatic changes with unvarying correctness. For instance, the who o school was as still as death on Wednesday, their shiny backs in the darkness of the vessel's hold resembling the glistening surfaces of so many polished, human skulls. The wind blew lightly and colder from the east and the turtles had gravitated to that side of the boat before the wind changed to that point. When the weather has become settled, the turtles are comfortable and at ease, moving about among each other with Sunday school picnic gracioiusness and exhibiting a fraternal feeling worthy of emulation by the human family.

They make good food, as many people know.

Years ago, when few persons sought to catch them, the river was full of them and in the eastern markets were readily sold at $42 to $16 and $18 a dozen. Prices do not rule so high now. They are known here as "the Juniata turtle."

The Pennsylvania Railroad Company's Florida Tours.

No opportunity of making a delightful trip to the South has ever presented itself in so attractive shape as that which the Pennsylvania Railroad Company's personally conducted pleasure tours to Florida offer to the people of this section. The tours have been arranged by the Tourist Bureau of the Passenger Department, and will be conducted under the personal supervision of the Tourist Agent Chaperon.

A special train of Pullman Palace Sleeping Cars will convey the party through to Jacksonville on the fastest schedule ever made on a similar occasion. The train will leave New York on the mornings of Jan. 26th and February 8th, Philadelphia about noon, and arrive in Jacksonville for supper the next evening, stopping for meals at convenient points en route. The round-trip tickets, which include the railway fare in both directions will include meals en route, sleeping car accommodations going and returning, and one day's board at the Hotel Everett, Jacksonville, will allow a stay of about two weeks in the flowery State. The rate from New York is $47.00, and from Philadelphia and all points south thereof $45.00. Tickets at correspondingly low rates will be sold from all principal stations on the Pennsylvania Railroad system.

This is not only by far the cheapest, but at the same time the most desirable, South ern tour ever presented. The dates, too, are well timed, as they cover the choicest portion of the Florida season, which has been a great attraction this winter the, Sub-Tropical Exposition at Jacksonville and the open ing of the magnificent new hotels at St. Augustine The time limit of the tickets permits of an extended trip through the State.

Names may be registered now for either of the tours by calling on the ticket agencies of the company.

Expert Testimony.

J. H. Richmonnue, C. E., Mining Engineer, of Scranton, Pa., has known the twelve mines of the Tortilla Gold and Silver Mining Co., since 1880, having spent a good portion of that and the following year at those mines. In a letter to the President of the Company, Mr. Rittenhouse says: "I have been in a good many mining camps in Colorado, New Mexico and Arizona, and never saw any better indications on the surface or ore in such quantity and of such grade anywhere as in the Tortilla Camp. To particularize: The Desert mine is a large vein averaging about 8 to 10 feet thick, in one place about 20 feet. Ore taken from it in development assayed from 30 to 40 ounces silver per ton, per 100-tons lot. I think the ore in these mines in quantity, and that a 10 or 20 stamp mill could be kept busy from it alone. The formation is about the same as the Benton. The other mines near the Desert were developed to a more or less extent by several shafts sunk upon them in cline, showing well defined walls. I saw about same grade as the Desert. The Eagle is the only defined and well sold (for that county) croppings. Ore carries more gold than silver, about $15.00 of the former, and $13.00 of the latter, I think. As for the Jesse Benton and Tom Benton. I think the Jesse Benton is the bonanza of the camp. The average of the bulk of the ore taken from it is 70 to 75 ounces of silver; a little gold occasionally. As this ore was the best, more attention was paid to it and more work done upon it. It was thoroughly proved for a length of about 1,200 feet (twelve hundred) along the claim and the ore found about the same in all parts. I believe the Benton will prove itself to be one of the richest mines in Arizona. All indications point that way."

A limited number of the preferred dividend shares of the stock of the company owning these mines are offered for sale at $2 per share. Address Jos. H. Reall, 57 Broadway, New York, or 48 Congress St., Boston, Mass.

CHURCH DEDICATION.

The Dedication of the new house of worship belonging to Emanuel's Evangelical Lutheran Congregation at Thompsontown, took place on Sabbath Jan. 15, 1888. On account of the unpleasant weather on New Year's Day the dedicatory services had been postponed, and a brighter day was fondly expected.

The weather however, on the morning of the 15th was indeed gloomy and foreboding. Nevertheless a goodly company gathered in the new church at the appointed hour and the services were begun.

First after an anthem by the choir was the solemn consecration of the house to the worship of God, according to the liturgical terms of the Lutheran church, conducted by the pastor and Rev. S. G. Shannon of Sunbury Pa., and participated in by all the congregation. The dedicatory sermon was preached by Rev. F. W. Conrad, D. D., Editor of the Lutheran Observer, from Isaiah 2, 3. It was a masterly production delivered without notes, clear, logical, convincing and full of able arguments and undeniable conclusions of the value of a church to the family, community and state. This was followed by an appeal for subscriptions to cancel the remaining indebtedness. $1200 was asked for, and about $1080 obtained in the morning. This was consider d excellent, taking into account the comparative smallness of the audience.

In the evening the church was filled and an attentive audience listened to an able and touching sermon by Rev. Shannon, on the "Wisdom of God," from Romans 11:33; after which Dr. Conrad made an appeal for additional subscriptions to cover the deficiency, which in a short time was more than raised. The total amount of morning and evening contributions being $1261 50. Besides the ministers previously named as present and participating in these services, were also Rev. Logan of the M. E. Church and Rev. Mounts of the Evangelical Church, both of whom kindly gave up their appointments for the occasion. The total net cash cost of the Church building is nearly $4000, but to this must be added material and hell from the old church used, labor furnished gratis, and the furniture which will make its cost at least $4500. It is believed that owing to the prudent care and management of the superintendents, Messrs. Keiser and Dimm, this sum is $500 or $1000 less than what such a building would ordinarily cost.

The church is very neat and tasteful structure, on a plan furnished by a Philadelphia architect and both the exterior and interior are beautiful and churchly. The ground plan is a Greek Cross 40 by 60 feet extreme dimensions. The walls are brick to the square above which are four gables one on each side. A tower at the south east corner extends upwards to the top of the steeple 105 feet. The roof is covered with slate. The windows are Gothic below and in the tower and filled with stained glass of beautiful patterns and designs. In each gable is also a large circular window, also of stained glass. The entrance is through the tower, at the side of which in front of the building is a small room, or council meetings &c., and especially for taking off wraps and warming on coming to church. The audience room is finely lighted by numerous windows in the day time and a large and beautiful Bolly reflector in the evening. This was presented by the young people's association of the Congregation. The pews furnished by the Philadelphia company are curved backs and seats slanted and very comfortable. The audience room is admirably heated with pure hot air from a furnace in the cellar. The pulpit furniture is neat and substantial. It was secured through the efforts of Miss Winnie Shannon, who also presented the pulpit Bible (containing both versions) and the hymn book. The Choir platform seated with chairs is at the left of the pulpit. The organ was secured some time ago through the efforts of J. Louderslager. The carpet of a very pretty pattern and excellent in quality was furnished by the ladies' Aid Society of the Congregation. The walls and ceiling are finely frescoed. The small room can be thrown into the audience room by receiving glass partitions. It is estimated that the church can seat comparatively 250 persons, but 200 may find room. The Congregation have done themselves great credit by erecting so beautiful and convenient a building and deserve praise for their enterprise and sacrifice, their number not being large; 124 being enrolled as communicant members. The Congregation was organized in 1835, by Rev S. P. Boyer of Mifflintown, who built the first church in 1843. Succeeding pastors were Rev. J. Martin, 1846 1848; Rev. L. T. Williams, 1849 1858; Rev. P. Willard, 1859 1861; Rev. M. L. Shindel, 1861 1867; Rev. A. Copenhaver 1867 1882; Rev. W. H. Wiegel 1882 1885. The present pastor Rev. G. W. Leisher took charge Nov. 15, 1885.

YOU CAN SPORT THE BEST AND FINEST

OVERCOAT, IN THE LAND,

FOR VERY LITTLE MONEY, IF YOU WILL BUT ATTEND

Schott's Closing Out Sale This Month.

True to our old principles, we will not carry any goods over to next year. This being the case there seems to be but one way to free ourselves from our surplus stock of Overcoats and Men's and Boys' Suits and it is *Cut down the Prices.*

In no instance is the price of any Overcoat above the naked cost of the Cloth and the trimmings. The cost of the making has been ignored.

Scale of Reduction on Men's Overcoats.
