Spider Versus Beetle.

A big spider was placed on a rock in the centre of an aquarium in a recent experiment, and a larva of a wate eetle put near. The beetle promptly eized the spider and pulled it into the water, but after a sharp struggle the spider broke away and escaped. The beetle soon afterward renewed the attack, and fastened itself on the spide by its pincers. The spider also got a good hold, and the duel resulted in the leath of both. It is said that if two of the larva are placed in the same aquarium they will fight until one or the other is dead, and the victor will deca-copperas in two gallons of soft water.

In Love's Harness

In Love's Harness. Most women naturally look forward to matrimony as their proper sphere in life, but they should constantly bear in mind that a fair, rosy face, bright eyes, and a healthy, well-developed form, are the best passports to a happy marriage. All those wasting disorders, weaknesses, "dragging-down" sensations, and functional irregular-ities peculiar to their sor, have an unfailing specific in Dr. Pierce's Favorite Prescrip-tion. It is the only medicine for women, sold by druggists, under a positice guarantee from the manufacturers, that it will give satisfaction in every case, or money will be New meat begets a new appetite. The remedy for baldness recently disco The remedy for balances recently discov-ered by H. A. Fechter, of New Haven, Conn., seems to be almost infallible. It is performing some wonderful cures, and phy-sicians are watching its effects with much interest. A circular giving the history of its discoverer can be obtained free, by writing to the discover. Fish make no broth.

"GEORGE, dear," said Mabel, I good friends?"

"Well, yes, that's so to a great extent I'm sorry to say." "Why, then, did you send him that reat big handsome bull dog?" "Why did I send him that dog?" Absinthe drinking is said to be in-creasing to an alarming extent in New York. George smiled a tender, thoughtful,

far-away smile. "You see, dearest, that dog and I are old friends." HUSBAND-What's the matter with y darling this morning? Wife-You know well enough what's

the matter. You came home of his again last night. "Me drunk last night-never!" "But you owned up that you had been drinking." "I did eh? Well, you can't believe

half what a man says when he's full."

"Don'T be afraid," said a snob to a German labores, "sit down and make yourself my equal." "I vould haff to blow my brains out, was the rep" of the Teuton.

MOUND layers or stool layers differ from the others by having the earth heaped up around them instead of be-ing buried in the earth. The sprouts from stumps or around growing trees, being well banked up, will readily root as high as moist earth presses against them. bem. ODORS in the stable indicate the air ODORS in the stable indicate the air And will remain on the most delicate therein is impure. Use of absorbents is very important in summer. Once a week the stable should be sprinkled from the siphon and milk.

TO PRESERVE PLUMS WHOLE. -Pierce the skins of the plums with a large needle; take one pound of sugar Guano produced by bats is known to Guano produced by bats is known to exist in large quantities in certain caves of Victoria, New South Wales. Some is sufficiently rich in nitrogen and phos-phoric acid to be useful in agriculture as fertilizers—for example, the Skipton Cave guano, found some thirty miles southwest of Ballarat. Until lately the Skipton Caves were inhabited by innumerable bats. According to a re-
