such a vain bird that he will never repeat any thing but his own name; and crushed and sweetened. Serve with the German children have a piece of cream if possible. poetry which relates how a cuckoo stopped a starling who had just come om town, and asked her what people thought of the nighting

"The whole town is loud in her " said the starling.

And what about the lark?" 'Half the city is talking of her." "And the blackbird?"

'A few people say they admire him." "Well, what do they say about me?"

"Nothing at all." Oh, then," said the cuckoo,

must praise myself. Cuckool" Another reason for the bird's mor tonous cry is given by Rev. Charles Swainscn, who tells us the old Bohemian legend: "In early times the cuc

koo had a crown, but the hoopee has deprived her of it. It happened in this and boll, then make a glaze or dressing wise: When the birds were about to celebrate a wedding, the hoopoe-being selected to give away the bride, and therefore anylous to add to the dignity of its appearance-asked the cuckoo to lend him his crown. The latter kindly consented, but when the hoopoe dis covered how well it suited him, he kept

it and never returned it to its owner! "And ever since the cuckoo has been catting 'Kluku! Kluku!' (i. e. 'You knave! you knave!); while the hoopoe answers: 'Jdu! Jdu!' (i. e. Fm comingl I'm coming!)."

A Buggy's Wear and Tear.

"How much do you suppose it costs," asked the eccentric statistician, "te pay for wear and tear on a buggy?' He asked the question to answer it, of course, and replied: "It takes two cents a mile. That has been figured out by owners of carriage works, and that is this lowest figure. Two cents a mile for a buggy driven at a trot, next come heavy wagons with loads a fraction higher, and buggies behind speedy horses are higher still. About three cents a mile is the highest, and the wear and tear on all kinds of vehicles run between two and three cents a mile, the kind of paving, whether it is against the festive mosquito. sheet or stone, having considerable to

The use of alum to clear muddy water has long been known, but Prof. Leeds, in the course of an investigation on an outbreak of typhold fever at Mount Molly, N. J., discovdred another value in its use, which may be water which was supplied to the inhabitants of Mount Holly was swarming | cool the fish. with bacteria, about fifteen drons being capable of forming 8,100 colonies of these microscopic germs when spread upon a suitable surface. He tried the experiment of adding a minute amount of alum to this water in the proportion of only half a grain to a gallon, and found that not only were the dirt and coloring matter precipitated, but that instead of the s ame quantity of water
