THE CHINESE ARMY.

Its Organization, Equipment and

General Condition. Those who believe that in the not renote future the Chinese empire will prove a thorn in the side of Russia, will find their views corroborated by an article in the current number of The nternationale Revue ueber die Gesamnelten Armeen und Flotten, which gard to quantity-sometimes ten cups treats of the latest reforms introduced

Apart from the Chinese and Manchu militias, each province now possesses a regular army of enlisted troops under the immediate command of its viceroy. Of these the best organized is the army cabulary the word "samovar." Their of Pe-chi-li, which instructed by Euromethod of making and drinking tea pean officers, also well armed and clothhas been noticed by all travelers in ed in uniform, serves its model for the others. What, however, concerns us most in this country is the reorganizapoint is destructive to the good tion of the army of Manchuria, which qualities of tea, so they draw has recently been undertaken-partly their tea water just below that because China wishes to colonize that They use thin glass tumb- region as a bulwark against Russia, ers, with ordinary saucers; sometimes and partly because she fears that power never, the tea is poured into saucers, reorganization was begun two years which are held on the upturned ends ago, Manchuria being divided into of the thumb and fingers of the right three districts, the united military hand; milk and cream are rarely used; strength of which is said to amount to a block of cut sugar is held in the left | from 250,000 to 300,000 men. Of these, hand, from which they nibble pieces, we are told, one-third are armed with greech loaders, the remainder with old ashioned firearms, bows, arrows and

Behring Strait and the Baltic. Cu- watches the Russian frontier with decumber water is a favorite hot weather tachments, which scour the country ticism, they make their lemonade from keep the roads open for postal commucucumbers. This light beverage, how- nication. The cavalry, formed into undrons of 250 men, are armed with Vinchester magazine rifles or Remingon repeaters; and their horses, though that it is high proof is well attested by smallare active and serviceable. They are escribed as bold riders, with the usual igly Asiatic seat; and, strange to say, hey make no use of steel weapons-in me cases are not even provided with hem. Their formation is in single ank; their pace the walk or gallop, the trot being unknown. They attack n a swarm after fire, and to the sound f trumpets, the officers being in rear of ready to go on at once.

Target practice takes place in July the rudest character. Grass is cut expended by each man. Bad shots are unished, and at the autumnal inspecat the country blacksmith's shop, and thon of the general commanding the 3,000 years ago; the ground is plowed same adornment, the distinction is not with roots, and harrowed with the overflattering. The soldiers are well limbs of trees; the grain is threshed paid. Every cavalry soldier gets the equivalent of twenty-one roubles per month and his clothing; fifteen of these onbles go to pay for the keep of himself and horse, six remaining for shoe eather, washing and underclothing they seldom use a knife and fork, but a As food, he receives rice, millet and oden spoon for liquid food, and the lea; four times a week meat and a small quantity of spirits; while hay, On one occasion a something was straw and crushed beans are served out placed before me as I sat at the sam- to his steed. > EGG-PLANTS will not thrive unless the ground is very rich. If a few tufts of grass are placed around the main stems, so as to cover the roots, it will be an advantage. The egg examined every day.

Some of the trees of Arkansas have peculiar properties. The fruit and root of the buckeye are used by Indians of their fishing excursions. They put the fruit and roots in a bag, which they drag through the water. In an hour or so the fish rise to the surface dead Cattle die after eating of the fruit or leaves. Man eats the fruit of the paw-At a California agricultural show paw, but hogs won't, Ropes and mats two tons of grapes from one exhibit are made of its bark. The fruit and illustrated the culture of the vine in bark of the bay tree are supposed to be a cure for rheumatism and intermittent

> In the manufacture of lamp chimneys none but the purest white sand is used, which is thoroughly cleansed. Pure oxide is next added, turning the sand red and it then resembles sugar. It now goes into earthen pots with closed tops where it is melted, when it is in the proper condition a workman gathers some of the mass upon the end of his blow-pipe and after manipulating it into the desired form it is reheated and finished by machinery,

Some experiments have been placed on record, in which a number of eggs pounds has been raised this year in an were hatched out in a magnetic field. with the result that the chickens were all more or less deformed, blind, deaf

A PERFECT COMBINATION
