Some Valuable Suggestions in Regard to Breathing.

Some of our readers who may be far removed from any opportunity of gym- rarely met with, either because difficult nastic work in regular gymnasiums, to produce at the outset, or because may feel that there is little use in their trying to undertake such work, howof those we have in mind are Alpine ever much they may need physical development. But they are mistaken. If one really is in earnest, much can be taking much trouble to possess them. done. It may be something like taking Our success with the glacier pink this medicine, for certainly there is less fun in home exercise than in the gym-

color. There is confusion among the authorities as to the proper name for glacier pink; some call it Dianthus perfectly marvelous. Half a dozen people will sit in an ordinary sized room, with one or two kerosene lamps, perhaps, which are eating the same vital principle from the air that the lungs need, a whole evening, with windows and doors tightly closed, and wonder why they feel so sleepy or headachey! Could they be required to measure the air capacity of the room, and

A PHYSIOLOGICAL EXPLANATION. Could they only watch the change in the flow of blood, they would not only not wonder they did not feel brilliant, of the poorer animals. It will not pay

and lower lack it. In ordinary inspiration the lower part

of the lungs should be inflated first, animals. If once we start with and the upper chest should move little bred animals, the increase of bree or not at all. While this process is go- makes us rich in flocks and herds of the ing on, a certain set of muscles is con- best blood in what, when the goal is stantly at work. There is another set | reached, seems a very short time, that is not needed except in case of forced inhalation and exhalation. The times a day.

breather, you will best accomplish the desired end by lying flat on your back. In this position the back muscles are down, while the diaphragm will more surely be depressed. When your forced ower chest will rise strongly first; then the side muscles will swell, causing at the same time a slight depression again in front; then the muscles of the apper chest. Many people suck the diaphragm up, apparently, actually making the lower chest smaller. Raise the lower chest muscularly first, if you have this habit, and then force the

EXERCISES FOR THE LUNGS, Here are a few movements:

Take a strong, full breath, as nearly right as may be, through the nostrils, old a second, and expel the same way. Repeat several times, Now, inhale strongly, hold, then, making a small aperture with the lips.

as though you were going to whistle, blow it out vigorously, inhaling again the quantity, the second it is out. Repeat several times, and you will probably find, by the calf will the time you have taken the third or rth breath, you are breathing propmove normally at first, while the upper chest will move later without thought on your part, Next, take a long breath, and hold

it while you count twenty, then gradually increase the count to forty or fifty. Do not repeat this more than twice. Count while you are at working in the right way, try the same novements standing, raising the arms at the same time slowly over the head, When the blood is circulating freely | do with the result. by this process, rise vigorously on th toes twenty or thirty times, increasing as you can; then lift the toes strongly, keeping the heels firmly down; then stoop very low, separating the heels, throwing the knees well apart and out, and keeping the back as straight as pos-sible. This will keep up the circula

### tion and develop the legs, The Use of Perfumes

The refinements of the ancients varied in almost every way from those some of the uses appertaining to the testimony that baths and clean linen, performes and sweet odors were regarded quite as much of a luxury then as now. Few are, perhaps, aware that the origin of the use of manufactured perfumes had a sacred character, yet they were an invention of the priests who officiated at the sacrificial altars in the olden temples, and, doubtle-s, great necessity must have been the mother of invention, for from the slaughtered beasts must have arisen most noxious emanations which all the water in the land would not have washed clean without the aid of the perfumes of Arabia. Moses leaves a record of the exact perfumes and incense which were used in the temples, although in biblical days the latter was termed frankincense, and was, moreover, with myrrh and gold, the most valuable article of com-

An official report by Colonel Majen-die, Colonel Ford, and Captain Cundill, British Inspectors of Explosives, states that within the past year the dynamite trade in Great Britain had grown considerably, four new factories for explosives having been erected: that the number of licensed storage magazines had increased from 320 to 329; and that the total number of registered premises for explosives in the United Kingdom was 19,386 During 1883 there were 179 explosions, causing the death of 39 and the injury of 109 persons.

THE PINK OF THE GLACIEES .-Aside from the pinks usually seen in our gardens, there are several others nastum, but it will soon become inter-esting and enjoyable, couragement to others. It is a peculi-arity of the flowers of the higher One of the first and most important Alpine regions that they possess in things for any one to do is to put into color a remarkable intensity and brilliyour lungs, several times a day, as ancy, and some of them a purity and large an amount of pure air as possible. Clearness not found in lower regions. On this depends so much the absolute The several Alpine gentians well illusoxygenizing of the blood, which carries trate this in blues, while the glacier nutriment to every part of the body. The amount of impure air which people color. There is confusion among the

ure the air capacity of the room, and compare it with the amount of air ciothed with grassy, blush leaves and vitlated by one person in a given time, they would be surprised to find, per-haps, that, during the first hour, so much oxygen has been taken from the air, and so much carbonic acid and so rose, surpassed by no Alpine plant in many impurities thrown into it, that, from that time they had been breathof remarkably easy culture; not only ing and rebreathing vitated air, which can it be grown on a rockwork, but in each respiration renders more and more a border of very sandy loam.

but they would be astonished that the busin worked at all, with such insufficient nourishment. The blood that flow-feed. It is not economy to keep a poor ed freely at first, and of a bright scarlet animal through any season; but it is color, would gradually grow more slug- most extravagant to keep it through gish in its action, and the color would the winter. It is the hight of folly in change slowly to a more and more stock raising to sell the best and keep purple hue, indicating that it carried the worst. True, the best bring the less and less oxygen, the life giving largest prices; but if you sell the best principle, and more and more of the and keep the worst, soon your best will clogging and poisonous elements. It is be no better than your worst is now, unfortunate this process cannot be and your worst will be such that the watched, but, if you really want to be more you have the poorer you will be. strong, see to it that you give your You, by this plan, constantly make lungs plenty of good air, sleeping and your animals poorer; and as the stock raiser makes his animals poor he makes Another point you may not have himself poorer. If he keeps up the thought of. It is one thing, and the process, bankruptcy is as sure as fate. first one, to have the air you want to The opposite policy is the winning breathe pure and abundant; the next policy. Sell the posserst and retain the thing is to know how to take it prop- best, And sell enough of the poorer animals that you may buy a few better "Why, we breathe all the time," than the best you now have. This is making your animals constantly better Very true; but most people breathe and yourself richer. Soon your worst very badly, giving only the upper cells of their lungs any refreshment, while the lower cells are panting, so to speak, or, rather, it is the middle cells which mal of each sex, pure-bred. Hold fast get the most nutriment, while the upper | to the full-blooded produce and to the highest grades. Almost before you are aware of it you will have only purebred animals. If once we start with pure-

THE FARMHOUSE CELLAR .- As a lungs need this extra feeding, and forced inhalation and exhalation should be indulged in two or three cellar. It underlies the whole house, Unless you are sure you are a good with nothing to prevent its exhalations rising into the upper rooms, except a thin board floor. In this cellar, all manner of things for family use are rept the season round. Meat, vegetable, milk, butter, bread, pastry, preserves, pickles and fruits are here aspiration is taken as it should be, the stored in their various receptacles, There is very seldom anything to separate the fruit and vegetables from the other parts of the cellar, and there is usually more or less decaying vegetable matter to load the air with poisonou germs. At various seasons of the year the cellar walls collect dampness, or small pools of water lie under their loose board floors, sending up malarious odors into the rooms above.

comes to the stock-raiser, how shall I lessen the cost of producing caives? One way is to feed new milk almost wholly at the start. Give it to the young animal fresh from the cow, but never let it suck. Feed it well when oung, at three or four weeks lessen the quantity, and at two months gradu-In the summer season the calf will do well if weaned at less than two months' old. In winter, skim-milk, after two months, will help erly; the lower part of the chest will calves a great deal. They develop naturally and easily, learn to take care of themselves, growing fairly well. The green feed does most good to an animal when it is three or four years old.

In developing cows for butter the Again, take a full breathand exhaust | feeder should be sure that he does not very slowly. Then inflate as slowly as everfeed, but as he finds they eat with work, thus diverting your mind and more to each feed, and so continue a good appetite he may add a little giving you an opportunity of testing gradually to increase the feed as they your gain. After working on your will bear it. This power of digestion back long enough to know you are will increase, and he may gradually cows and their production of butter.
The skill of that feeder has much to

A WESTERN dairyman has hit upon a very simple plan of warming water for his stock to drink in winter. He put an iron plate, say eighteen inches square, on the bottom of his water tank, cutting away the wood, of course, where the iron was. Under this plate he used an oil stove. He says 10 cents' worth of oil a day would warm the water for sixty cows up to 700 or more.

THERE is no necessity for pamperin of a modern age, except, perhaps, in a bull and allowing it to become vici ous. It can be made to work, if de toilet, and the Scriptures, as well as sired, in providing power for fodderother records of ancient customs, bear cutters, grain-mills, etc. It is done in Europe, and is practicable here.

> AGED horses should have ground grain at all times or they will not thrive, owing to their mability to masticate the whole grains. Where a horse is subject to heaves it is best to moisten all the chopped or ground food.

FEEDING red pepper to laying hens not beneficial unless given very moderately, and not oftener than three times a week. It acts as a temporary stimulant, but if given continually causes injurious effects.

No flower is more popular than the ester, and few have held so high a place n popular esteem for so many years, and it is still growing in favor. For an autum show of flowers we have not its equal.

One trial will convince you that it is the best. Ask your dealer for the Frazer Axle Grease, and take no other. Every box has our trade mark on. Emma Abboit's real estate in

France Axle Grease.

A clergyman, after years of suffering from that loathsome disease, Catarrh, and vainly trying every known remedy, at last found a prescrittion which completely cured and saved him from death. Any sufferer from this dreadful disease sending a self-addressed stamped envelope to Prof. J. A. Lawrence, 88 Warten St., N. Y., will receive the recipe free of charge.

A FATHER had been lecturing his son upon the evils of staying out late

"You will never amount to anything, he continued, "unless you turn over a new leaf. Remember that the early "How about the worm, father?" pulred the young man, borrowing the old sarcasm, " wasn't he rather foolish o get up so early?"

"My son," replied the old man, sol-emnly, "that worm hadn't been to bed at all. He was on his way home," SERVANT (to widow only recently pereaved)-There is an old clothes man at the door, mum, what wants to know

have you got any cast-off garments to Widow (with a burst of grief)-Ah, no, Bridget, not now-not now. Tell

A QUIET TASTE .- "I knew, Bobby, said his mother as she opened the closet door, "when you became suddenly so quiet that something must be wrong. Put those preserves back on the shelf and go upstairs at once."
"You told pa this morning," replied
Bobby, with an expression of injured

innocence and raspberry jam, "that you always admired people with quiet The Excitement Not Over-The rush on the druggists still continues and daily scores of people call for a bottle of Kemp's Balsam for the Throat and Lungs for the cure of Coughs, Coids, Asthma, Bronchitis and Consumption. Kemp's Balsam, the standard family remediate and consumption of the couple of the consumption of the couple of the
