The Realizing Faculty

There is no faculty of the mind, Facts About Some Diminutive Spewhich is so prominent in its influence on the moral nature as imagination. As the reasoning powers and the judgment are cultivated they reveal to us much knowledge of right and wrong, solve many of the knotty problems of life, and disentangle some of the intricacies their rarity, so they are regarded with of duty. But it is reserved for the imag-ination to touch the heart and to arouse though doubtless of less use to the world the feelings. And as the essence of the moral life is love of the right, and the desire to persue it, whatever can ha-draw the dwarfing men by art. He says, "If

The imagination is almost boundless in its range. Without creating any-thing absolutely new, it has the power ians in Italy, to make their dogs very in the power in the power is a solution of the power is a so tank in fraity to make their dogs very better than and in the shift and in the shift and the shift a materials and relations of life as to spring water, which, drying and hard- this kind are often used to contain two form innumerable fantastic and even ening these parts, hinder their extenimpossible images, which appear, dis- sion.

solve and re-appear in ever new formt. Some of our modern Barnums would, But, aided by keen perceptions, wise no doubt, like to try these experiments discriminations and a sensitive nature, it also has the power of picturing things as they are, with a fair degree of them than by the unfortunate subjects correctness. This may be called the of their attentions. Probably the realizing faculty. Its function in our smallest individual on record was an in Paris, even when cut flowers are social life is much more important than Egyptian dwarf, who lived in the reign is generally supposed. A very large of Theodosius. This diminutive pigmy proportion of our sins against our fel- was so exceedingly small that he reprelow men may be traced to a deficiency sented a partridge, yet he performed which the beanty of indivi-of this power. Unkindness, from the the daties of a grown man, and as an most trifling discourtesy to the most ancient historian puts it, "had an exstidess crueity, is largely due to the cellent knack at singing musically fact that we have no adequate image in Another one, John de Estrix, of Mech our minds of the feelings of those we len, who lived in 1592, at 35 years of thus hurt. In former times this was age had a long beard, and was but the case with regard to bodily pain. three feet in height. He was noted for Mee, and even women, could witness his good sense and ingenuity, spoke by their diminitive size and brilliancy without a shudder the gladiatorial contests and the agony that supervened. well at most games, and was very in-Torture and persecution were every dustrious in all things that he was cap-day affairs, because no one realized the able of undertaking. A DIMINUTIVE COURTIER.

pangs inflicted. Civilization, with its pangs indicated. Civilization, with its increase of knowledge, insight and sympathy, has made all such things well high impossible. And slowly, to, we are becoming able to picture to our selves the thoughts and emotions of others, and these images make many was of an exceedingly aniable disposipersons careful not to come mental dis-tress to those with whom they mingle, was this dwarf who made the celebrated Pity and compaismon are, indeed, the retort to Maria Theresa, empress of fruits of this real zing faculty, Austria. While he was visiting Vienna, and are concraity propertioned to its development. We know how much more easily they are aroused by the sight of the pain than by its mere reci-tal, by the occurrence of a small ca-replied: "The strangest sight is that I tastrophe in our immediate vicinity, see at the present moment,

"And what is that?" inquired the emthan by the wholesale destruction of life in a faraway land. In the one case press, "To see so little a man on the lap of the mental picture is vivid, in the

so great a woman." other it is pale and colorless. After marrying a young lady of ordi-If this realizing power makes us nary size, Joujou settled down in life and became the head of quite a large family. He wrote and published a book compassionate it also makes us charita-Intellectual sympathy is more rare and more difficult of attainment descriptive of his life and travels, and than mere sympathy with pain and Those accustomed to one lived until the remarkable age of 98 pleasure.

ine of thought and associating only years. understand how any one can differ from them, and are, therefore, inclined During the last century several noted created in London to doubt either their honesty or their intelligence. Much bitter controversy, known as Mr. and Mrs. Robert Skin. much harsh and unjust criticism is ner, who were each but two feet in height. Their carriage, which due to the feebleness of this power. Neither party can put himself in the about the size of a baby's, was drawn by two dogs, and their coachman was a place of the other or see how he came to hold such beliefs, or why he should not at once abandon them. So the esti-mates of guilt commonly made are selmates of guilt commonly made are selsmall. dom fair and just for the same reason. THE MOST FAMOUS AMONG DWARPS.

When a man, accustomed all his life to abhor some vice or to leathe some crime, and mingling only with those who share his feelings, forms his judgment of a delinquent from his own standpoint, it must be an erroneous He thinks what his own guilt would be in such a case, which is a very different matter. He does not LITTLE MEN AND WOMEN.

THE FLOWER GARDEN. FLORAL BASEETS.

The most popular ornamental baskets interest than little people, for a sym-materical dwarf is a diamond edition of mankind; and as diminutive bits handles, bent to a rectangular shape, which are covered, body and handle both, with folds of ribbon. It is a mechanism are esteemed because of question whether it is as tasteful to use such an extent of color in connection with flowers as to use the simple, har spire or nourish these deserves our you anoint their spines in their when the color of the ribbon contrasts special consideration. from France, where baskets of or three pots with growing plants, the pots themselves being covered from sight with trimmings of green. Some-

thing may be learned from Parisian florists as regards the number of blos soms which should be used. Too often in this country we see more blossoms and less foliage than is desirable, while used, four or six fine specimens relieved against a great mass of green, are preferred to a more compact display in which the beauty of individual flowers

MAPLES from Japan, says a well-known florist, are likely to become as popular in this country, in time, as the chrysanthemums have been for the last few years. They are especially adapted Japanese use them in this way. Where a change of color is desired in their gardens a pot is sunk in the ground and one of the richly colored maples planted. The fine, delicate, fern shap-

ed leaves of some of the varieties are effective at a short distance off, when the lacy veining of the leaves can be seen traced in all their beauty. Other varieties, where the colors are more solid and the leaves larger, look better when at a longer distance. They make a good foreground for lawn scenes and Cabiage and cauliflower can be set out have a good effect in small parks.

... Something About Needles.

A needle is a little thing hardly worth mentioning, in fact, but the daily con-sumption of them in the United States are made in Brooklyn, but the greater part of the needles we use come from

Redditch, England, according to the New York Graphie. There are needles which all wig makers use. They are as delicate as a hair and shaped like a fish hook. There is

the tambour needle and the needle for shirring machines; the great sail needle which has to be pushed with a steel palm; the knitting machine needle with its lit-tle latchet; the arrasene and crewel

Then there is the surgeon's cruel outfit, the probing needle made for hunting after bullets or internal sores; the st mortem needles, of various curves and sizes; the hare-lip needle; the long accupressure pins, for pinning gaping wounds in place; all the needles for eye, head and body-long, short, curved once, twice or three times. Then the veterinary surgeon has his case of need-The upholsterer is a favored les, too.

During the French revolution a dwarf named Righebourg was made use-He has needles on the half curve, and on the quarter curve, round points and sword points, long eyes, round ful in carrying letters and messages out of Paris. He was dressed in a full suit of baby clothes, and with the secret eyes, egg eyes, and countersunk eyes. The cook is not left out of this trade, papers hidden about his person was carbut has a curious trussing needle, made ed in the arms of a nurse. Very luck-for the "baby" the trick was never for carrying melted butter or savory very different matter. He does not discovered. This prgmy lived to the age of 9) years, and during the last birth, surroundings and education have twenty-five years of his life never went. There is also the larding needle, which made vice and crime familiar, can-not regard it as he does. He cannot strangers
