rope, and it is no pshaw-ing matter to gated and the absorbing part of the

The surprising fact, to western peo- of them. flowing blood and offal is agreeable to

And Nasr-Ed-Deen is in all these respects the most Persian of Persians, On his first visit to Europe he had the sheep for his cookery slaughtered in substance. the reception hall of the palaces in which he was lodged. And this was rather the least offensive of his domestic performances. In England some of the clergy and noble ladies tried to impress on him their ideas of the proper dignity of women; he could not even understand what they were talkng about, When the Princess of Vales was presented in court dress, he hald his hand on her bare shoulder and said she was fit for her place. What further liberties be might have taken had not the princess relired can only be conjectured. At Berlin he asked Emperor William why he did not "cut off that ugly old woman's head and get a young princess to be the mistress of the

Nasr-Ed-Dien was born in 1830, and by a strange train of circumstances a sosition somewhat similar to that held James I in English history-that is, all the old royal lines are supposed to unite in him by descent. But this is not proved, and the recent claim that he is also a descendant of Cyrus and general statement about the filthmess of Orientals does not apply of course, to the various princes and nobles of Inhin. Siam and eastern Asia generally have generally displayed both elegance both and humanity as well. The late princes of Persia are of the Mongol Mongols in China and India. Nasr-Ed-Deen has waged three terri-

England asked. In 1873 he made the grand tour of Europe, leaving behind for example. infectants before the workmen would consent to work in it; all the furniture and hangings were burned and the plaster scraped from the walls. At wis he did better, but sewelers and artists levied on his baggage and the government had to pay them for arti-cles he had bought. At Vienna Emperor William got sick after the first interview, and thereafter the courtiers kept the shah "soaked" with champagne, and therefore comparatively de-

And now the poor monarchs of Europe had to stand a repetition of this thing because Nasr-Ed-Deen is their royal brother, and monarchical etiquette demands it. How thankful we should feel, as the Sunday school books say, that we live in a free country and kick a shah outdoors if he don't behave blueself.

Mr. Bright's Speeches.

Above twenty years ago I was talking with Mr. Bright, in the smoking room of the house of commons. He was going to speak later on in the evening, and he had a long roll of notes which he was looking through. "I never learned a speech but once," he said, "and then I did not remember it, down some pussages," I said, pointing to the notes. "Yes," he replied, "I do, otherwise I might say more than I explain that his greatest difficulty in are several furnaces in this country mastering the art of which he had bequire the habit of speaking slowly. "You should not make pauses between words and sentences," he went on to century ago. "but pronounce distinctly every

nature and history of ammonia.

The universal use of ammonia in some

LAWNS AND LAWN-MOWERS .-- A large proportion of the lawns in city, village and country are deteriorating, well as for the toilet and bath, makes it desirable to have some definite and ac-curate information in regard to the and close examination shows the turf to be thin, the desirable grasses weak browning quickly under drought and hot sun, while coarse, unsightly plants creep in and retain a foothold. The substances. The name comes from the province of Ammon, in Egypt, where sal ammoniac has been known for 2,000 beauty of the lawn diminishes with age in spite of liberal fertilizing and close and regular cutting. What is the rea-son? Mainly, it is the excessive use of years, being produced by the decompothe modern lawn-mower. In nearly every locality may be found pasture lands low set with grasses fine and rich holding color well under mid-summer sun and drought, with a thick, elastic turf, through which no color of soil sition of ammonia gas, the basis of all can be seen-the very perfection of a ammonical preparations.
Until quite recently the only source lawn if it were trimmed close and even. Why does the pasture flourish through a score of years and the lawn decay? Simply because the pasture is kept nearly under natural conditions, and the lawn is subjected to an intense Chinese dwarfing system. Suppose the lawn is newly made, according to the best instructions, the soil deeply dug, produced in large quantity in the man-ufacture of ordinary coal gas, with the enriched and made clean and fine, the seed sown and the grass plants show increased production the cost was so much cheapened that it became possible to use it for many new purposes.

seed sown and the grass plants show thick and strong. What next? The lawn-mower—twice or three times a lawn-mower-twice or three times a The first ammonia ever bottled for week until growth stops in autumn. Next spring the grass makes a renewed general family use was the now celestruggle for existence, starts early and strong again. It lifts its blades to the brated C. C. Parsons' Household Ammonia. It took a long time to persuade sun and air that it may push its roots ladies who were used to buying a small bottle of ammonia at a high price and into the rich soil for moisture and sus-keeping it on their toilet table, that in tenance. The effort is promptly met by Household Ammonia they had an im- the lawn-mower. Growth is checked proved and economical rival for the soaps and sodas they were familiar above and under ground; so through an entire season and succeeding years. The law is that the root growth of the plant But time, a fortune spent in advertisis in proportion to its top growth; the

> is the deep, rich soil? It is a wonder that the lawn browns early, and that coarse, hardy plants get a foothold? Give the grass plant a chance to make adequate root growth if you would have and keep a good lawn. Read the lesson of the pasture lands. Encourage it a little, in early spring, and in the autumn lay the lawn-mower away early, and let a thick, strong growth of grass be the winter protection of the lawn.

FRUIT-DANGERS AND REMEDIES. within the digestive tract, and to produce stomach and bowel disorders. these disturbances are not too great, or too prolonged, they need occasion no special anxiety. A dose of castor oil, to which a few drops of laudanum have been added is usually sufficient to clean out the irritating "debris," and in a day or two the natural equilibrium is reis even sold bottled with cork. when, if stored. If there is much griping and it had any strength at all, it would de- pain with the movements, and these become too numerous to be comfortable. the dose of oil soould be followed by curtailing activity—by quiet and repose—by a diet of meat broths, containing ways was found an insuperable obstacle, rice, barley, or sago; by rice and milk, milk toast, etc.

would escape in a short time, and you WATER CRESS .- The water cress is a weed, pure and simple. It can never it and produce a better and more delicate species have been made, and signally failed. Under artificial treatment it loses the famt, piquant, mustard wonders Zomonia would have suggested it is constantly renewing itself, the large, coarse leaves of the old plants may be left to wither; and only the onia is only a very nice soap young delicate stems picked. It will powder delicately scented, but put a little in the palm of your hand, moisten it and rub gently, and presto you have the transcent anymonis. In the same way, and butter, it is—well, try it.

In the same way, and butter, it is—well, try it.

In the same way, and butter, it is—well, try it.

THE BEST FERTILIZER .- A Southern paper avers that wood ashes con-tain all the mineral elements of wood experience has shown has the greatest in an available form, Ground raw bone supplements this with nitrogenous matter and a needed excess of phosphoric acid. For trees ten inches or more in diameter, a barrel of ashes and tifty pounds of bone spread evenly It is impossible to imagine any further steps or improvements in cleansing comd the tree over a circle thirty feet in diameter and dug in will aston pounds. A perfectly made neutral soap ish most people by the effect it will produce.

A QUICK MANURE.-Dr. T. II. bottled, and sold at a price that brought it within everyone's reach, was an immense addition to the ease and comfort your flower beds seem to be languishing. and especially if the leafage is small and pale, a little saltpetre, say a pound to a square rod, if applied just before rain, will astonish you by its effect in stimuhighest efficiency, the ammonia never lating the growth and enriching the loosing its strength and yet always ready color. It should be scattered as evenly as possible on the soil, not on the plants. If rain is not expected at once, a liberal watering will develop its action.

THE roads are in bad condition for this season, and the difficulty of using soda generally used in soaps or soap them should impress upon farmers the importance of selecting only the most capable citizens as road overseers. The road tax is one that returns fourfold soda is not very thoroughly rinsed out to the farmer, if rightly applied, which would be the case if the farmers themselves would take more interest in the matter. This is the season for bauling gravel on the roads and ditches should be dug along the sides for carrying off the water. A well-graveled road should be servic able the entire year and show no effects of use except when the frost is leaving the ground.

CLOVER can be sown in the fall, The of the minute measurements which seed is put in about the middle of Aug-physicists can make. The standard or ust or September. To prepare the land plow it now and let the seeds of weeds sprout. Just before seeding plow the raising a gramme, which is about fif- land again, and dress it with a mixture teen and one-half grains, to a height of of thirty bashels of lime and wood ashes one centimetre, or less than two-fifths harrow well, sow the seed, and brush of an inch. Insignificant as this seems | the land over, so as to lightly cover the to be, Professor Langley estimates that seed. It will make a better "catch" the same expenditure of energy would than when clover is seeded on grain in suffice to give us the sensation of crim- t e spring.

Duning seasons when rains are frequent the effect of tile drainage is made very manifest by comparison with unto produce as that of its complemen- drained fields. It requires but a short tary color, green. Here is at once a time for a tile-drained field to rid itself of the surplus water and become warm. son why green gives the eye repose and red disturbs it. CREAMED BLACKBERRIES. - Select arge ripe blackberries and have them perfectly dry. Put one pound of gran-u'ated sugar and a gill of water in a saucepan over the fire to boil; stir until he sugar is dissolved-not one moment onger. Boil continuously until the syrup thickens when dropped into ice water and will form a soft ball wher rubbed between the thumb and finger Watch the syrup carefully while boil ing, and with the sponge wipe the sides of the saucepan three or four times. Papa said something about going into insolvency, and if he says so, I suppose This prevents granulation. As soon as we shall have to go there.' you can form this syrup into a soft ball urn it out onto a large greased meat platter, allow it to stand a few moments o cool, then stir with a wooden spoon rapfdly until you have a white creamy candy called fondant. Now, place this fondant in a porcelain-lined saucepan add your flavoring, stand the saucepar in a pan of boiling water and stir the fondant constantly until it melts. If it

PRESERVED PEACHES. - Twelve ounds ripe peaches, six pounds sugar, ne pint vinegar. Make a syrup of the sugar, vinegar and a little water. When this comes to a boil, drop in a few at a time and cook until they are so soft that a broom splinter will easily pierce to the stone. Do not think that this is a recipe for pickled peaches; the vinegar vill not be noticed except in the increased richness of the preserves.

s too thick add water or flavoring to

thin. Dip the berries in the hot fond-

ant and stand aside to dry. A delicious

CANNING SWEET CORN .- One quart root growth is shallow. Of what avail the corn come to a boll. Add one teapoonful of tartaric acid to each quart of corn. Boil fifteen minutes. When wanted for use, add one teaspoonful of soda to each quart of corn; let it stand one hour before cooking.

HINTS ABOUT SQUASHES.-The crook-necked squashes are not as watery | the rest as a weat er prophet." as the round ones, Select those that are tender. If they are not too old you can cut through the skin with your nail. Wash them and cut in slices about a half inch thick, and lay them -An excessive amount of fruit, or, if on a cloth in a steamer. When they are eaten either in the unripe or over-ripe tender turn them out into a hot dish state, produces various disturbances in and mash them, adding sait and butter the system, chiefly so because of its to taste. If the skins and seeds are not tendency to ferment and decompose tender enough to eat, rub the equash through a colander.

BLACK RASPBERRY DESSERT. Look over and put into the sauce dish expect to go to town to-day. If you the best sweet raspherries, crushing them as little as possible; then much and strain half as many ripe, red corrants, add sugar to the juice of these till it is quite sweet, and when it is well dissolved pour it over the "blackcaps, and let them stand an hour or so. Serve for after dinner dessert or for sauce

white beans over night in cold water, drain, and put into cold water and boil until you can rub them as a paste through a sieve, add a little milk and hot water, some shreds of onion, return | lobe? be anything else. Efforts to cultivate to soup pot. Season to taste and flavor with parsley or dried thyme.

RED RASPBERRY AND CURRANT Jelly.—Take equal parts of currant flavor that is its especial charm, and as- and raspberry juice; boil and skim; then sumes much of the hot, pungent taste of the horseradish. It flourishes for nearly nine months in the year, and, as Boil from five to fitteen minutes. CUCUMBER CATSUP,-Grate birge

cucumbers before they begin to turn yellow; drain out the juice and put the quantity of ten per cent, vinegar; cork tightly. When used add pepper and salt; salt kills the vinegar if put in when

CREAMED SALT FISH,-Pick into pieces enough salt fish to make one cup. cover with cold water and let it come to the boiling point; simmer ten minutes, then drain; make one cup white sauce, with one tablespoonful of melted butter; add one table-poonful of flour and pour on slow'y one cupful of hot milk, season with salt and pepper and add one beaten egg.

WHITE CAKE, -One cup heaping full f sugar, piece of butter size of an egg. rub to a cream, two-thirds cup of sweet milk, two cups sifted flour, two teaspoonfuls of baking powder whites of three eggs beaten to a stiff froth and

To Cook Hominy .- Wash and roak the hominy over night. In the morning add plenty of water, and cook slowly for about two hours; stir often and allow it to boil down thick; pack in a stone jar, and set in a cold place. When wanted take out the desired amount, ald milk, salt, sugar and a large lump of butter; heat thoroughly, and it is ready to serve.

COLD SLAW. - Shave off a hard white sead of cabbage and season with the following dressing: One cup of cream. one and a half teaspoons of mustard one teaspoon of salt, one teaspoon of butter, one tablespoon of sugar and yolk of one egg beaten light. When booled, add one cup of strong vinegar, stir well and pour over the cabbage.

CURRANT JELLY, -Boil the currants twenty minutes. Strain the juice and measure one pound of sugar to one pint of juice; boil the juice two minutes, then ad I to the sugar and boil the whole to gether one minute. This is very nice.

SWEET PUDDING,-One cup of suct chopped fine, two cups of flour, two eggs, one cup of sweet milk, one teaconful of baking powder, one-fourth of a teaspoonful of salt, pour into pudding bag and boil one and one-half

PARSNIP CAKES .- Two cupfuls of grated raw parsnips, same quantity of bread crumbs, one cup of milk, two eggs, three tablespoonfuls of flour, salt nd pepper to taste. Fry in butter or lard.

HICKORYNUT CAKE, -One and one alf cups of sugar, one-half cup of butter, two eggs, one cup of sweet milk, one and one-half teaspoonfuls of baking powder, one cup of hickory nut meats. chopped fine; nearly three cups of flour, COOKIES. - One and one-fourth cups

of sugar, one-half cup of butter, one egg, one-half teaspoonful of soda; mix all together; roll out, cut into shape MASHED POTATOES, -Boil one-half

ozen potatoes until well done, then alsh, with a tablespoonful of butter, a ittle salt, pepper and three tablespoor
