### FARM NOTES.

MUTTON FOR THE TABLE .- TOO much of the mutton sold in our mar-kets is so dry and tough as to be almost uneatable. Such meat is alike unsatisfactory and unprofitable to the consumer, and is dear at any price. This s particularly the case with mutton chop, which often consists of two coarse bones and a mouthful or so of moderately tender meat growing close to where the two join at a right angle. while all the rest can scarcely be masticated, and if so, gives little nourishment and is hard of digestion.

A breed of large Merinos has been grown for some years past in Western 'ennsylvania and that part of Ohio bordering on it which, it is claimed, produces a fair quality of Merino wool and a good carcass or mutton. But we should not wait the slow spread of these but continue to import from England the various breeds of downs, and in much larger numbers than has heretofore been done. Instead of hundreds we should multiply these by thousands, until our country is filled with them and our markets abound with their lean; tender, juicy mutton.

I wish every American housekeeper could have a taste of a well-cooked English chop, for after that I think he would do his best to promote the profuction of them in his own country. When traveling in England it was the only meat I ordered at the hotels, for I liked it much better than beef, the latter not excelling our own, as English untton does.

WORKING BUTTER LOST WORK .-A farmer's wife, in the Western Farour, says that she can make a hundred pounds of butter a week easier and beter than she could make twenty pounds offern years ago. The has not worked a pound of butter over in two years, household, What would be the highest Her process is as follows: Have your milk brought in and strained into cans is soon as milled. Submerge them in Veluster says it is the adapting of think of water; if you have no ice, let as soon as milked. Submerge them in Do not churn above sixty-four degrees, or the grains of butter will be too large, causing white spots. Draw off what ways, bottermilk you want to use, throw in a ter, and a little salt each time; the last clean as dry as possible. Add sait mees to a pound of butter, turning ; few times, to be sure that it is ther stand in the churn one hour, dray off the extra brine, and turn the churi catefully until it is gathered into balls Pack tightly in jars or tubs, filling a little more than full, entting off with a and packer, then sonk in cold water.

TERMS USED IN GARDENING. enable any one to do this. For example, a seedling plant is so named to distinguish it from such as have been grafted make is in the matter of food. Their or less uniformly from seed.

Sour bread has more to do with a sour they are about doing things with their FACTS FOR FRUIT GROWERS.—One who talks like an expert cultivator de-chres that a big pile of manure is the left hand which they have trained their right to perform. Nearly every one holds a garment in the left hand to put it on. Why? Well, fruit-grower's bank. He adds that to it is a failure, i. c., greasy food is the raise strawlerries successfully the seed-germ of indigestion, and indigesthey learned to do it that way because ground must have rested the year pre- tion has broken more hearts than ever their mothers never taught them differwoosly as a Summer fallow. Currants did that arch little being called Cupid. ently. And in putting on a garment this way—putting the right arm in first —the left hand performs all the work. We have heard of the lack of nutritive and not lose their vigor, An established qualities of white bread, till like some to raise a large crop of turnips. The right arm, and then, while the right young plants require extra care when better than a large number. Grapes do yet it is a truth that in producing white arm crooks and the hand comes up and they flour the best part of the grain is elim-inated and fed to domestic animals, mon farm crops. To succeed, a man while man "the nobiest work of God," catches the coat, straightens it out, as must know his trade, be vigifant and | feeds upon the "husks." In talking of it were, and proceeds to search for the housest, and not expect to get rich all at wholesome food one isapt to get an idea place to insert itself, and, having found it, goes in and actually puts the coat of sticky mush and heavy bread, but on. The left hand has done it all. And now, which hand do you button there the mistake arises. I hold (I do not stand alone in my assertion) that -Plants that are set out for the sum- food may be autritions, dainty, and yet with? Nine people out of ten use the mer should not be forgotten. It is an undeniable fact that left as an experiment, and it you do not find THE RAKE MIGHTDER THAN THE it a paying one, then I shall be very much mistaken. I don't mean try for handed persons, or rather those who that a good rake is the best hoe, if the one day or one week, but for a length have trained the left hand instead of rake have long, sharp teeth and is used of time sufficient to make the experithe right from infancy, are much betbefore the weeds get too large among ment effective. Different economies ter performers on the piano than right cabbages, cauliflowers and other plants may be practiced by different families handed persons. One of the greatest difficulties to be overcome by the piano

# Some Thoughts On Economy.

BT BOSE SEELYE MILLER.

A perplexed sister asks for a clear and full defining of the word "economy." In its fullest, freest sense, it is very comprehensive-a word of very broad meaning-though often woefully narowed, and distorted in its acceptance by some who think it means merely the careful expenditure of money. I think 1 goes far beyond that. It is more by far, than the close calculating of finances, the watching of a good bargain, the buying of goods out of senson, in order to get reduced rates, on stan-dard articles. All of this may be right, may be economical, yet only a very small part of the meening of the word, economy, Webster gives us no defini-tion of that word but defines economics

and economical as: I. Pertaining to the household, do-

mosti 2. Relating to economy, or the man-2. Retaining to economy, or the man-agement of household or pecuniary affairs, private or public; relating to in-ternal system; adaption of means to ends, saving of waste and unnecessary

of using the right hand, to prevent it 3. Managing with frugality; guardrom being left handed. The left hand ng against loss or waste; prudent in xpenditures; said of character or alvits.

So it would seem that even Webster uses the word chiefly in relation to nance, and yet that one pregnant sentnee, "guarding against waste," may nean vastly more. There is a financial sonomy, as well as a physical, and vice Both are important, and the ritt.

latter no less so than the former. I think, however, that economy is something that each one must define and practice for themselves. It must be adapted to the individual or aggregate contomy for one, would be but sheer waste for anoth r.

them stand twenty-four hours, run off ing hes the whole gist of the matter. your milk and keep the cream in a cool. The means one person or family poshave until you have enough to churn, sesses, vary very materially from the Then place it where it will be at least sixty-four or sixty-five degrees to sour. Do not churn above sixty-four degrees, practice economy in very different

One must not confound economy with handful of salt and apail of water, turn nigmardly expenditure. It isn't econo-a few times, and draw off; then wash my to go thinly clad, 'mid the biting again. We give two thorough wasis frosts of winter, as many a victim to hugs that way with two palifuls of was pulmonary disease can affirm. It is not conomy to go without nourishing food, or a comfortable fire when such at the rate of one and one-quarter fire is needed. I have in my mind now a dear old soul who is so economical she has grown penurious. Pleasant to aughly worked through the butter. Les meet and converse with, and yet so careful of fire and light that one cannot keep comfortable in her rooms in cold weather, but there is something more than the more discomfort of it. There is the singer to health, and the prosstring dipped in brine. Butter made in peet of premature death to the inmates this way, shipped fresh, will bring the of such a dwelling. I must confess I high st market price, and is a pleasure cannot see the economy of turning the Thoroughly scald both churn gas jets or the kerosene light so low that one's eyes must be strained to see in doing ordinary evening work, that

many a poor woman must do. It is bad Young people, especially those in rural enough to work all day and through the life, should familiarize themselves with the terms used in garden and farm obliged to strain one's organs of vision operations, and understand their means in so doing. ACCORDING to the best evidence obtainable on the subject there is more profit to the dairyman in medium and smaller cattle than in larger ones. Those who are now advocating the general-purpose cow, claim that she must be large in order to make good paying beef. For our part we cannot ee why a large steer is any more profitable than a small one. Each animal sells by the pound and eats according to his size. Cuts from the carcasses of arge animals cost no more in market than cuts from small ones,

... APPLES,-Some of the best varieties are very showy. Care in picking, assorting and packing will pay with them, and bring ready sale, even in years of abundance.

practiced advantageously by all.

M. Trouvelet has communicated the results of his recent investigations on the planet Mars to the French Acadency of Sciences. Since 1875 he has weak from inactivity, and the other, market, been engaged in observing and mapping that it has lacked or does lack the eduthe configuration of this planet, which is believed to be in a more advanced

stage of development than the earth. The latest of these observations are the most interesting, because the planet regions to the earth, which have been

less studied than the austral regions, owing to difficulties of observation due to the distance of the planet from the earth when the boreal pole is inclined toward us.

TOMATO PIE can be made by peeling and shoring green tomatoes; to this allow four tablespoonfuls of vinegar, one of butter and three and a half of sugar; flavor with nutmeg and bake very slowly wih two crusts. If the tomatoes are first stewed there is then no danger of the pie being too juicy.

A NEW DEFINITION .- Teacher-"Now, my young friend, can you tell me what memory is?" Master Tommy, af er a moment's hesitation - "Please, sir, memory is bees the work of making it again, thus what you forget with."

When made for patients recovering from fever a far more grateful drink 'black stuff'' which has long annoyed | than strong temonade is made by using the gold miners in that region, and is one lemon to a quart of water, with one lump of sugar rubbed on the peel, sweeten very little. This, given in teaspoonfuls when the mouth and tongue are parched, is inexpressibly refreshing

TO POLISH NICKEL PLATING -TO polish nickel plating when it becomes exceeding by far the ore of the Cornwall mines, would soon supply the needs of this country, and affect the dull, use jewelers' rouge and fresh lard or lard oil, applied to a piece of chamois skin. Rub the parts using as little of price of tin the world over. The Austhe mixture as possible, and wipe off ralian mines were first discovered in with a clean, slightly oiled rag, or some 1872; hast year they supplied 10,625 tons of tin, against 16,761 tons from cotton waste. In many cases, perhaps in most, no preparation is needed to the Straits, and 8114 tons from Banaca clean or polish nickel, a simple rubbing and Billiton, and 9300 from Cornwall. While the East Indies yield over half with chamois skin or very soft cotton being all that is required.

the world's production, which was 45,770 tons last year, the United States probably consumes more tin than any EGG LEMONADE .- Break an egg into other nation. The imports during a tumbler, rub two lumps of sugar on the rind of a fine lemon, put the sugar eight months ending with February were 19,803,199 pounds, or 2,475,400 into the tumbler, squeeze the lemon pounds per month. But besides this into it with a squeezer, and half fill the onsumption, 1105 tons per month, or | tumbler with ice broken small, fill up with water, and with a s aker shake the whole vigorously a few seconds, then grate a little nutmeg over the top. If you have no shaker, beat the egg with a fork.

more costly metal is consumed. Hence An ingenious contrivance is about to it may be estimated that this country be brought out by Captain Woolward, consumes about one-third of all the tin of the toyal mail steamer, Don, by produced in the world, and the cost which it is proposed to do away with oars as a means of propelling ships' lifenow about 19 cents per pound, or \$425 boats. It consists of a handpower per ton, is at least \$6,400,000 yearly, apart from the cost of the iron plates screw propeller, which enables the boat and the labor of coating. If the depos-its of the metal in the Black Hills corto be driven by any one in it though unacquainted with rowing. This, Captain Woolward points out, will obviate respond in any reasonable measure with the statements of geologists, there is no the chance of passengers who may get away from a stranded ship finding reason why the production here should not be developed as rapidly as it has themselves in a boat without oars or been in Australia, so that within ten having them without any one skilled in or twelve years we may become entirely their use. The machinery takes up independent of other countries in this little room and seems to be both effi-

cient and simple.
