By a despatch from Richmond, Va., on the 12th inst., the Democratic City Committee announce that they will call upon the city authorities to discharge all colored men now in the employ of the city government.

Philadelphia anarchists have been dodging the police and holding secret meetings. The newspaper reporters always trace them and hear their murderous utterances.

Work before last, a Montgomery county, Pa., bank officer disappeared, and the bank is out one hundred thousand dollars.

Some time previous to his capture in Hagerstown, Lieutenant Shearer had been captured and confined in Fort McHenry and had escaped.

When he was taken before General Morris for identification that officer recognized him at once, but not the name of the man who had been sentenced.

It took his whole staff to convince him to the contrary. The Shearer then standing before him was six feet two and a half inches tall, while the escaped Shearer was but five feet and six inches in height.

He was then sent to the Old Capital prison, where he escaped while the guards were within fifteen feet of him.

Two guards were set to watch him and these were continually pacing beneath the window. They would stand directly under the window with backs together, and walk off fifteen paces, turn about, walk toward each other till they met, turn and go back again.

Shearer was requested to go first. This the guards were walking away from each other. Shearer slid down the improvised rope which was immediately headed up by Fitzhugh, and then Shearer coolly walked up past one of the guards who paid no attention to him, not thinking he was one of the prisoners.

He went up the street, came down on the other side and coolly sat on the curbstone opposite his prison to wait for Fitzhugh.

After waiting for some time without Fitzhugh's making an appearance he began to get impatient for him. The guard ordered him to stop and move on, to which he replied, "Oh, all right old fellow; if you don't like my society about here, reckon I'll be a nigger" and he moved. Fitzhugh did not attempt to escape. Shearer was sent south through the assistance of the wife of a Union officer who gave him one of her husband's old uniforms, which was of great assistance to him.

territory, who is now to the east: On the 4th of July, 1864, when Gen. Early crossed the Potomac at Shepherdstown, Lieutenant George M. Shearer was sent by General Bradley T. Johnson, with a squad of Maryland Cavalry into Hagerstown to see if any Yankee troops were in the town.

Yesterday morning twenty-five years later, Lieutenant Shearer walked into Gen. Johnson's office and laughingly reported that he had found plenty of Yankees there. He would have reported sooner he said, but circumstances beyond his control prevented him.

The fact is he had been taken prisoner in Hagerstown and confined in Fort Delaware. Lieut. Shearer went into the confederate army in '61, and served through the War in the Maryland Line, except during the intervals while he was in prison.

After the war he went to Idaho. His curiosity and love of adventure had not been entirely gratified by his four years experience in the confederate army, and he engaged in the Indian wars in the West. He now carries somewhere in his body, two bullets as souvenirs of the notorious Nez Percés Chief Joseph, who, ten years ago, made one of the most famous resistances to United States troops that has taken place since the Black Hawk war.

The confederate Lieut. Shearer is now Major Shearer having won his commission as major in the Territorial Volunteers. He has served several terms in the Idaho Legislature and is now clerk of the State District Court in that Territory. This is the first time he has been east since the close of the war, and he felt in duty bound to make his report to his general—a report which, though long delayed, got there just the same.

While a prisoner at Fort Delaware, Lieutenant Shearer was the victim of a curious mistake. A man who's name was the same as his had been convicted by court-martial at Fort McHenry of killing the provost marshal of Martinsburg, West Virginia, and had been sentenced to fifteen years penal servitude. He escaped from Fort McHenry about the time Lieutenant Shearer was taken to Fort Delaware. Gen. Morris, commander of Fort McHenry, heard of the arrest and sent an order to Lieut. Shearer at work at once. The Lieut. naturally remonstrated against this, insisting on proving an alibi. He was promptly marched off before two bayonets, however, and put to work with his general—a report which, though long delayed, got there just the same.

While arguing with his guard he met a Union officer who knew him, and immediately had him sent to Fort McHenry for identification.

was near the murderer's proclama- went into his cell and sang and prayed with him until the time of execution. The wretch was worked up to the belief that he was on his way to Heaven, and he sang: "I'm going home to die no more."

On the scaffold he said: "Dear friends I am about going to Heaven. All I have to say is my wife had nothing to do with it. I am the only Hillman who had a hand in it. I forgive you all and hope to meet you all in Heaven."

"Don't make the noose to tight." A SHOCKING STORY. As the words left his mouth, Sheriff Ridgway touched the drop, and at exactly 10:29 o'clock the 330 pound weight dropped with a loud crash and the most agonizing body of Hillman dangled in the air, his feet but a couple inches from the ground.

The request of Hillman had been complied with by the executioner, who left the noose loose, and Hillman was hanging by his chin and back of his head. The noose had slipped and instead of tightening about the throat and fastening under the left ear of the hanging man slipped around under his throat.

As the rope tightened Hillman uttered loud cries and struggled desperately to get his hands up to the noose as he kicked and groaned. Large drops of blood dropped from a wound made by the rope in the man's neck upon his spotless shirt, and the spectators turned their heads away, made faint and sick by the sight.

Deputy Sheriff William Smith and James Carr sprang forward, and catching the partly unconscious man by the legs lifted him up while Van Hise tried to lift the noose. As Van Hise trembling with fright attempted to adjust the noose, Hillman in his struggles grabbed him by the lapel of the vest. His hold was loosened and once more the body was swung in the air, while Sheriff Ridgway stood by horror struck.

The young rascal, who struggled desperately for a few moments, then his body grew rigid. At 10:44 exactly fourteen and a half minutes after the drop fell Drs. Forman, Abbott and Dorch pronounced the man dead. His neck was not broken, strangulation being the cause of death. At 10:55 the body was cut down and given into the charge of Undertaker Jeffries.

What a Dakota Girl Did. Martha Tallidge, is 19 years old. This year she ploughed, sowed and reaped forty acres of land, and has sold 600 bushels of wheat. All this was done without male assistance.

And the Men Sat Still. An incident occurred on an afternoon train on the Consolidated R-and the other day that ought to have found its way into print before this. It has numerous lessons. Among the passengers were three sweet and quiet Sisters of Charity in their characteristic dress. A drunken man very drunk and annoying, entered the car and sat down beside one of them. He talked persistently, drank from a big bottle that he carried and finally struck his disagreeable face repeatedly into the long bouquet of the Sister in a most insulting way. She was evidently much frightened. The conductor had already been told of the man's conduct, but did nothing. The other passengers, in true passenger fashion, sat and looked on as usual.

Finally a woman, white as a sheet and full of suppressed indignation, got up from her seat and went to the reason. She grabbed the fellow's bottle, wrested it from his hands and flung it out of the window, and she took hold of him, and after a lively and unassisted struggle got him out of the seat. "I'm no Roman Catholic," he said excitedly to the spectators, "but I can't sit still and see a Sister of Charity insulted."

Quotations for Scapls. During the French and Indian war in 1754 the French offered a bounty for British scalps. In the same year a bounty of \$100 was offered for the colonies for Indian scalps. In 1755 Massachusetts granted a bounty of \$3 for every soldier who would enlist and find his own gun; also a bounty of \$40 for every scalp of a male Indian over 12 years old and \$20 for every woman and child's scalp. In June, 1764, John Penn, the grandson of Wm. Penn and Governor of Pennsylvania, proclaimed that for every male Indian above the age of 10 who was captured, a bounty of \$150 should be paid; for every male killed and scalped \$25; for every one thus served with \$10, \$130; for every female killed and scalped, \$50.

Not Entitled to Pension. A Lancaster county pensioner drawing 14 dollars a month recently boasted to a stranger that he could beat more fence than any man in the county. When his pension was stopped he learned that the stranger was a Government detective to investigate his case.

Covered with Molasses. Literally the sweetest couple on record is a pair arrested in Pittsburgh a few nights ago. The man was a grocer, and with a female companion had succumbed to the growler's baneful influence and had gone to sleep in the room back of his store. While tossing around the floor the spigot of the molasses barrel was knocked out and the pair were covered with syrup.

Mrs. Cleveland was asked the other day, if she thought she would like house-keeping. She answered: "Certainly; it is the only way to live." This does credit to Mrs. Cleveland's womanly nature, and it recalls the fact that some people claim that the great increase in divorces in this country is owing to the lack of home life.—Savannah News.

Miss Axtie Hamilton, just appointed a notary public in Washington by the president, it is said in the opinion of her sex ever appointed to a similar position in Washington, the other lady being Miss Emma Gilletty.

Contributed. Photography is a great art and most people get their pictures taken sometime during life and find pleasure in giving them to relatives, friends and acquaintances. In some cases photographs are perfect or good pictures, exact likenesses of the features. In other instances they do not resemble the person photographed and it is best to pass over such and look at pictures that resemble those photographed. The pictures of soldiers, statesmen, politicians, who are often seen, and especially of those who have never been personally seen, but heard, talked and read of, are closely scanned as if the observers could form opinions of character strong or weak, good or bad by the lines and curves of the features. Pictures of people as found in "regue's" gallery are closely looked at by thousands of people for the lines and curves in the pictured features that would indicate evil traits. But not all criminals are evil looking in the expression of the face aside some of them have gentle looks and therefore show fairly and would deceive those that search the face for the respectable. From the fact of photographers taking the picture of the forms and facial appearance of a great people, let it rather be viewed in another sense that God "looketh not upon the outward appearance, but upon the heart" or takes not the appearance of the face to judge by, but takes notice of the state of the heart and of the thoughts, words and deeds that proceed therefrom. He takes note in the case of successful men. Therefore let any one appear before God or in the eyes of God without the mediator Jesus Christ, and hence without His intercession and without the favor of God, and his appearance as pictured before God, whose "eyes run to and fro throughout the whole earth beholding the evil and the good," will not present an appearance or picture clothed in the righteousness of Jesus, and for this reason such a person while left in this condition does not merit salvation. Let anyone come unto God the Father through God the Son (who removes the unrighteousness of man and makes him worthy before God through himself,) and such a person thus coming, being clothed in the righteousness of God the Son, his appearance as pictured or beheld by God will be accepted as worthy of his salvation. Christ says: "He that cometh unto me I will in no wise cast out." David says in one of the psalms: "As for me I will behold thy face in righteousness; I shall be satisfied when I awake in thy likeness." The psalmist has reference to awaking from the sleep of death after the illness of Christ the resurrection, who lived on earth God on his likeness as a man. Man was originally created after the image and likeness of God and will have God's likeness restored through the Savior who lived in likeness as a man.

The success which has attended the Cooley Creamer and its products in past years has continued to attend them this year. The Sweepstakes gold medal on butter awarded at the Pa. Exposition went to the Green Mountain Stock Farm, West Randolph, Vermont, who made the butter by the Cooley process. This award is all the more noticeable from the fact that the Cooley was awarded the Gold Medal at the exhibitions of 1879 and 1882. The last after competitive tests of six weeks at the French Government Experiment Station.

Thus the Cooley Creamer and products have been awarded the Gold Medal at every exposition since it was invented which is certainly a very remarkable record and made more noteworthy by the Bay State Fair in Boston at which there were more than two hundred entries of butter, the Gold Medal being won by a creamery using the Cooley Creamer. This is a very significant fact, and it is the first time that the product of co-operative products of mixed herds has come in competition with the registered private herds, and therefore the award carries all the more credit and glory with it, and the successful creamery has just cause for congratulating itself upon its well-earned victory.

In the several tests of expert butter-makers using the cream for a Cooley cream gathering factory another sign of victory.

Since the beginning of the fair a year ago that have been awarded the Cooley Creamer and its products, and makes the total number twenty-three gold-medals besides numerous silver medals awarded since it came upon the market.

It took the lead at first and has steadily maintained it, steadily widening the gap between it and its competitors until now they are nearly distanced.

The Cooley Creamer certainly has a phenomenal record. Those who desire it and opposed the introduction of its process have been forced greatly against their wills to admit that it has not its equal in the dairy line. Many of its former opponents are now its most ardent friends and advocates.

This system is used extensively in this country, Europe and Australia.
