Vick's Floral Guide
 is one of the handsomest catalogues published. The illustrations are intended to give the reader a correct idea of the plant or flower illustrated. The grossly exaggerated, absurd pictures which deface so many catalogues and reflect upon the integrity of those who issue them, do not appear in this. The list of potatoes is good, and several new kinds are offered, among them the Early Market. It is said to be of the Ohio Class and is especially recommended for early marketing as the quality is excellent in the early stages of growth or "unripe" condition. The entire catalogue is one that the N. Y. greatly commends to the examination of its readers.—Rural New Yorker, New York, N. Y.
 \$2 and 10 cents (which amount may be deducted from first order) to James Vick, seedsmen, Rochester, N. Y., for copy of Guide.

A New Method of Treating Disease.
 What are they? There is a new departure in the treatment of disease. It consists in the collection of facts from Europe and America, and bringing them within the reach of all. For instance the treatment pursued by special physicians who treat indigestion, stomach and liver troubles, only was obtained and prepared. The treatment of 63er physicians celebrated for curing catarrh was procured and as on all these incurable curable cures now include diseases of the lungs, kidneys, female weakness, rheumatism and nervous debility.
 This new method of "one remedy for one disease," must appeal to the common sense of all sufferers, many of whom have experienced the ill effects and thoroughly realize the absurdity of the claims of Patent Medicines which are guaranteed to cure every ill out of a single bottle, and the use of which as statistics prove, has ruined more stomachs than alcohol. A circular describing these new remedies is sent free on receipt of stamp to pay postage by Hospital Remedy Company, Toronto, Canada, sole proprietors.
