### WORRY.

There is much unavoidable sorrow and anxiety in our lives, but it would be safe to say that at least one-half of our troubles are unnecessary-are caused by needless worry. We find this idea well expressed by Paul Siegvolk in the Home Journal. He says-

"It is a common observation that no of our crowded modern life, and alwise and useless than self-worrying. The matters usually causing this kind of mental disquietude, if they be at all form of suffering to the few. Railpractical, will concern either others or way travelling has its amari aliquid in one's self. If they do concern others the shape of slight, but possibly not a man can only do his duty as he com- unimportant jolting of the nervous prehends it. This being found and done, one should be content and accept centres; the electric light has already the result as inevitable, without regrets, and now we have the telephone indictthe matters concern one's self there is still less cause for this fruitless discon-tent. Benders, one should reflect of the general health. M. Gelle has obhow little importance such matters are, served, not in women only, but in for the most part, in the economy of strong-minded and able-bodied men, the universe-whether they be done symptoms of what we may call "aural well or ill, or not done at all-and how over-pressure," caused by the condiinsignificant in a large view and to tion of almost constant strain of the every one clse is anything that pertains anditory apparatus, in which persons o one's self, and now wasteful even of power is all idle fretting about spend a considerable portion of each

working day. In some cases also the Probably the secret of this habit, so ear seemed to be irritated by the conpersistent in spite of its being so con-trary to reason, is that the things worstantly recurring sharp tinkle of the bell, or by the nearness of the sounds ried about are seen in such undae proconveyed through the tube into a state portions, because they are too near the mind. Like any small objects very of over-sensitiveness which made it inclose to the eye, they obscure other things a little distant and take on a consequence they do not deserve. When time, or the occurrence of some other ed from nervous excitability, with matter of greater interest, has adapted buzzing noises in the ear, giddiness, us to the trouble before us-so that it and neuralgic pains. more nearly assumes its true significance ur anxiety diminishes or ceases altogether. But it we act, while under such a victous excitement, we are liable to net foolishly. Indeed worry is the street, New York, and entered one of vice of a shallow mature and implies the prominent banking institutions. street, New York, and entered one of poverty in the possession of patience. They were sturdy, heavy-set men. One carried a small black satchel. One available method of putting down this tendency to unreasonable fretting kept their eyes roaming from side to over personal disappointment or appre-hended evil may be to recall how many side. I followed them into the bank. The man with the satchel sat down, of our dearest friends have more real dropping the bag carelessly on the cause to warry than ourselves. IT CAME FIRST FROM JAVA AND BERLEY'S GREAT INDUSTRY. One Mine Which Has Already Produced Prices Once Charged for the Drug ---

\$45,000,000 Worth Of Diamonds. Chinese Exports Falling Off.

Kimberley (South Africa) Letter in the New York Sun: The first annual meeting of the shareholders of the De Beers mines was held here last week. This company was formed about fifteen months ago to consolidate the whole of the diamond mining industry of South Africa, and it has so far acceeded that it has now the ownership first of the De Beers mine, which been great, for at first the price ranged has an area of about fifteen acres, with from £6 to £10 per pound. Even 600 claims. Out of this mine there during the reign of Charles II, and his have already been excavated 3,250,000 brother it was disposed of at from los. cubic yards of diamondiferous ground. producing diamonds to the value of payable on every gallon of the bever-\$9,000,000, or about one and one-half age sold in the coffee - houses being ons weight of precious stones, between eightpence. In the reign of William 1871 and 1885. Since then its annual has averaged about £500,000. and Mary it was further burdened

This mine was originally worked by individual diggers. Then, as the depth ing the next century, when the aveincreased and the cost of working beage price was 16s., the imports mountcame too great for individuats, claims ed up to fully 200 per cent, on the were amalgamated and taken up by value of the commoner qualities. companies, till at length the mine came into the hands of the De Beers company, which has a nominal capital of about £2,000,000. Early ast year the £10 shares of the company stood at £40, making the capital then more than £8,000,000. At that time it was taken over by the new company, the De Beers consolidated mines. The next step of the Consolidated was to take over the Kimberley mine. This mine, although smaller than the De Beers, possessing only about 280 workable claims, was and is much This is no longer the case. The peoicher in its production, and by the nd of 1885 had scooped out 9,000,000 ubic yards of stuff, half of which was diamondiferous. The yield of diamonds up to 1885 exceeded 17,500,000 arats valued at £20,000,000, or about three and one half tons of precious by. stones. The capital of the Kimberley mine when amalgamated stood nominally at about £2,000,000, and as the £10 shares were then selling at £50 the capital was nearly £9,000,000. Having these two mines, the Consoldated company had virtually the conrol of the diamond production, but there were two other factors with which it was important to deal. These were the Dutoitspan and the Bultfonein diamond mines. These represented a capital of another 25,000,000, with an average annual production of nearly that between 1861 and 1866 the export A Waterloo veteran who resides near £4,000,000 in value. All the productive diamond mines n Grigualand West are under the com-

dete control of one consolidated combany. This company has a nominal apital of £3,900,000 in £5 shares, which are to-day standing at nearly prime producer. She may be fortu-fif.
