Editorial Difference of Opinion on as Important Subject.

What is the force that ousts disease: and which is the most convenient ap-paratus for applying it? How far is the regular physician useful to us because believe in him, and how far are his pills and powders and tonics only the material representatives of his personal

influence on our bealth? The regular doctors cure; the homoe-pathic doctors cure; the Hahnemannites cure; and so do the faith cures and the mind cures, and the so-called Christian scientists, and the four-dollar-and-a haif advertising itinerants, and the patent medicine men. They all hit, and they all miss, and the great difference—one great difference—in the re-sult is that when the regular doctors lese a patient no one grumbles, and when the irregular doctor lose one the community stands on end and howls. -Rochester Union and Advertiser.

Nature cures, but nature can be aided, hindered or defeated in the curative process, And the Commercial's contention is that it is the part of rational beings to seek and trust the advice of men of good character who have studied the human system and learned, as far as modern science lights the way, how far they can aid nature and how they can best avoid obstruct-ing her.—Buffaio Commercial,

It is not our purpose to consider the evils that result from employing the unscrupulous, the ignorant, char'atans and quacks to prescribe for the maladies that afflict the human family. We simply declare that the physician who knows something is better than the physician who knows nothing, or very ittle indeed about the structure and the conditions of the human system. Of course "be does not know it all."-Rochester Morning Herald.

I have used Warner's Safe Cure and but for its timely use would have been I verily believe, in my grave from what the doctors termed Bright's Disease.— D. F. Shriner, senior Editor Scioto Gazette Chillicothe, Ohio, in a letter

High Speed on Railroads.

There are many things connected with high speeds on railways which tax the ingenuity of locomotive engineers to the utmost. The lines have to be made strong enough to withstand the heavy blows of the locomotive, for the other portions of the running plant are light in comparison. A railway train running at sixty miles an hour may be compared to a huge projectile, and subject to the same laws. The momentum is the product of the weight of the train multiplied by the square of the velocity in feet per second; and if we allow a train of one hundred and twenty tons, travelling at a speed of sixty miles an hour, then the work required to bring it to a standstill would be fourteen thousand four hundred foot tons exerted through one minute, or nearly a thousand-horse power, which gives some idea of its destructive force if, unhappily, it should come into action; and yet this terrific power is so entirely under command that the strength of a child turning the small handle of the vacuum brake can bring the train to a stand in a few

A New Cigar Horror. Among the latest imitations which have been successfully introduced into alf whole milk after its rennet and exclaimed that Allah had given a the tobacco trade are cigars, the wrappers of which are made out of a specially perfumed paper. A drummer for a large tobacco factory of New York State is introducing an imitation cigar wrapper which was so deceiving in its character that experts could scarcely distinguish it from the genu-

This preparation was made from rye straw, and one portion of the process was to steep the material in a strong solution made from tobacco stems The grain of the straw together with the manner in which the material was dressed would lead any person to suppose that it was a sample of the leaf used in making wrappers for cigars of a more than ordinary quality. The fivor of tobacco was also present, owing to the paper having been immersed in the solution made from the genuine article.

Ancient Tombs Discovered at Naples, A subterranean chamber has been discovered under a house on the hillside at Naples. Along the center runs a mosaic pavement, and on each side there is a double row of sepulchres hewn in the rock, the fronts of which are stuccoed and painted and decorated with terra cotta and marble reliefs. Within the tombs were pefect skeletons, vases, and other objects, the antique lamps being in such good condition that when the new find was inspected by a party of German archæologists, the workmen made use of them to light up the vaults. The many well preserved inscriptions are chiefly in Greek, with some Latin, and prove that the epoch of these tombs was about 1000 B. C. Other tembs in a second chamber have not yet been excavated. Similar catacombs have heretofore been found in this locality .-

Pall Mall Gazette

A Fast Locomotive. On the Big Four road, between Cincinnati and Indianapolis, is an engine which advances the maximum speedlimit enormously. It is one of five engines built according to the patent of an inventor named Strong, and is being tested by the Big Four people. It is claimed for it that it is capable of hanling a heavy passenger train at the rate of from seventy-five to ninety miles per hour, and the tests made, while not severe, have tended to sustain the claim. The engine itself contains many novel features in construction. It has cylinders in which the escape of steam, after it has been used, is so arranged as to be a vast improvement over the common. The boiler is very long and there are two fire boxes. An ingenious contrivance consumes the gases and smoke, so that economy n the use of fuel is one of the advantages claimed. The fireman has a cab himself at the rear of the boiler, while the engineer occupies a separate ab perched on the top of the boiler. a little to the rear of the center. The engine weighs sixty-five tons and rests upon eighteen wheels. Its drivers are sixty-eight inches in diameter.

Why does this man stare so? He s simply listening to the marvelous cures effected by Dr. Pierce's Golden Medical Discovery.

The following case illustrates:

February 14th, 1890.

WORLD'S DISPENSARY MEDICAL ASSOCIATION. Buffalo, N. Y.:

Gentlemen—A remarkable case has occurred in our territory. J. N. Berry, a man about thirty years of age, was going down rapidly. He tried physician after physician, patent medicines, home receipts—in fact, everything. He went to a noted sanitarium and returned no better. We all thought he was dying with consumption, and only a few weeks of life were left for him.

He commenced "Golden Medical Discovery," and at the same time commenced to mend. He has used about two dozen bottles, and is still using it. He has gained in weight, color and strength, and is able to do light work. It is just such a case as we should have listened to rather suspiciously, but when we see it we must believe it.

It has trebled our sales of "Golden Medical Discovery."

Catarrh in the Head

Is a complaint which affects nearly everybody, more or less. It originates in a cold, or succession of colds, combined with impure blood. Disagreeable flow from the nose, tickling in the threat, offensive breath, pain over and between the eyes, ringing and bursting noises in the ears, are the more common symptoms. Catarrh is cured by Hood's Sarsaparilla, which strikes directly at its cause by removing all impurities from the blood, building up the diseased tissues and giving healthy tone to the whole system.

Dangerous tendencies characterize that very common entarrh in the head. The foul ungs is very liable to lead to bronchitis or conumption. As catarrh originates in impurities in the blood, local applications can do but little cured by Hood's Sarsaparilla, which strikes directly at its cause by removing all impurities from the blood, building up the diseased tissues and giving healthy tone to the whole system. and giving healthy tone to the whole system.
