arms.

The shutter was dashed off its singes, flung out into the yard, and the two ghastly hands were again seen strained through the bars. Again there rang out in the gathering night the pitious cry, "Glory! Glory! Glory!" "By God! you hound," yelled Eliah, and he raised his whip to bring it down on the white wrists.

"I cannot bear it. I will not endure it!" cried Mehalah, and she arrested the blow. She caught the whip and wrenched it out of the hand of Rebow before he could recover from his surprise, and flung it into the dyke that incircled the yard.

"You are civil," encered Elijah. "What are you in this house? A serrant? Then speak and act as one." A hard expression settled on Mehalah's brow.

"Do what you will with that brother of yours. I am indifferent to him and whis fate. Everything in the world all one to me now. If you had let ne think for the poor creature and feed him, and attend to him, I might have become reconciled to being here; I could at least have comforted my soul with the thought that I was ministerng to the welfare of one unhappy wretch and lightening his lot. But 20w," she shrugged her shoulders. "Now everything is all one to me. I an laugh," she did so, harshly. .There is nothing in the world that I are for now, except my mother, and do not know that I care very much for her now. I feel as if I had no heart, or that mine were frozen in my bosom."

"You do not care now for your nother !" exclaimed Rebow. "Then save her here to my tender mercy, and so out into the world and seek your fortune. Go on the tramp like your (ypsy ancestry."

'Leave my mother to your mercy !" schoed Mehala. "To the mercy of you, who could cut your poor crazed prother over the fingers with a great To you, who have stung porsewhip! and stabbed at my self-respect till it is stupefied; who have treated me, whom you profess to love, as I would not reat a marsh briar. Never. Though ny heart may be stunned or dead, yet t have sufficient instinct to stand by and protect her who brought me into he world and nursed me, when I was lelpless. As for you, I do not hate ron any more than I love you. You are nothing to me but a coarse, ill-contitioned dog.

She walked moodily away and regained her room. She went to the vindow, the window that looked toward the Ray, and drawing the curains behind her, remained there, her head sunk, but her eyes never waverng from the point where her home and been when she was happy, her seart free, and her self-respect unnangled. So passed hour after hour. There was a full moon, but the sky was covered with clouds white as curd, scudding before a north-west wind. The moon was dulled but hardly obscured every now and then, and next noment glared out in naked brilliancy. Everything in the house was hushed Elijah had gone to bed. Mehalah had seard his heavy tread on the stair, and he bang of the dcor as he shut it; it had roused her, she turned her head, ind her face grew harder in the cold noonlight.

Then she looked back towards the Ray. There yonder on the marsh was comething very white like paper, flaping and flashing in the moonlight. What could it be? It moved a little

is face, and Mehalah could not dis tinguish the features. He ran across the yard, and then leaped the dyke and went off at long bounds, like a kangaroo, over toward the sea wall.

Mehalah drew back. What should she do? Should she rouse Elilah, and tell him that his brother had wrenched off the grating of his window and worked his way out, and was now at large in the glare of the moon on the freedom? No, she would not. Let the poor creature taste of liberty, mbale the fresh, pure sir, caper and race about under no canopy but but that of God's making. making. She would not curtail his

at the moon, his matted hair was over

freedom by an hour. He would suffer severely for his evasion on the morrow, when Elijah would call out is men, and they would hunt the poor wretch down like a wild beast. She

could see Bebow stand over him with his great dog-whip, and strike him without mercy, She rouse Rebow? she reconsign the wild maniac to his lark dungeon, with its dank floor and stifling atmosphere? The gull was forgotten now; its little strivings overlooked in anxiety for the mightier trivings of the human sufferer. Yet all these three were bound together by common tie! Each was straining for the influite, and for escape from thraldom: one with a broken wing, one with a broken brain, one with broken heart. There was the wounded bird flapping and edging its way outward to the salt sea. There was the dazed brain driving the wretched man n mad gambols along the wall to the open water. There was the bruised

oul of the miserable girl yearning for omething, she knew not what, wide, leep, eternal, unlimited, as the all-empracing ocean. In that the bird, the manhe maid sought freedom, rest, recovry. She could not go to bed and leavhe poor maniac thus wandering unwatched, She would go out and fol-

low him, and see that no harm came o him She took off her shoes, shut the winlow. Her mother was sleeping soundly She undid the door and descended the

stairs. They creaked beneath her steps out Rebow, who had slept through the noise made by his brother in effecting ais escape, was not awakened. As she passed the bakehouse she lit

on the bird. In a spasm of sympathy he bent and took it nade a frantic effort to escape, and attered its wild, harsh screams;

out she folded her hands over the wings and held the bird to her bosom and went on. The blood from the uand, and dried on it like glue. fertile province absolutely depends We refer to the Bahr Joussuf today. -the canal of Joseph-built, according to tradition, by the son of Jacob, and which constitutes not the least of the many blessings he conferred on marshes, leaping and rejoicing in his Egypt during the years of his prosperous rule. This canal took its rise from the Nile at Asiat, and ran nearly parallel with it for nearly two hundred and fifty miles, creeping along under the western cliffs of the Nile valley, with many a bend and winding until at length it gained an eminence. as compared with the river bed which cnabled it to turn westward through a narrow pass and enter a district which was otherwise shut off from the fer-

tilizing floods on which all vegetation in Egypt depends. The northern end stood seventeen perennial stream, which watered a province named the Fayoum, endowing it with fertility and supporting a large population. In the time of the annual flood a great part of the canal was under water, and then the river's current would rush in a more direct course into the pass, carrying with it the rich silt which takes the place of manure and keeps the soil in a state of

constant productiveness. All this, with the exception of the tradition that Joseph built it, can be verified today, and it is not mere supposition or rumor. Until eight years ago it was firmly belleved that the design has always been limited to an irrigation scheme, larger no doubt, than that now in operation, as shown by the traces of abandoned canals and by the slow aggregation of waste water which had accumulated in the Birket el Querun, but still essentially the same

character. Many accounts have been written by Greek and Roman historians, such as Herodotus, Strabo, Mutianus, and Pliny, and repeated in monkish legends or portrayed in the maps of the middle

ages, which agreed with the folk lore of the district. These tales explained that the canal dug by the ancient Israelites served to carry the surplus waters of the Nile into an extensive up. It lake lying south, and so large that it not only modified the climate, tempering the arid winds of the desert and converting them into the balmy airs which nourished the vines and the olives into broken bone and torn flesh wet her a fullness and fragrance unknown in any part of the country, but also added
