

Governor Pattison's extra session political dodge has ruled him out as a Presidential candidate.

The New York Presbytery has dismissed the charges presented against Professor C. N. Briggs for heresy.

Judge Finley of Philadelphia has ruled that poll tax receipts paid by political commitment do not entitle a man to vote.

Last Monday Governor Pattison issued a proclamation calling on the people of Pennsylvania to encourage and contribute for the collection arrangement and display of the products of the state at the World's Columbian Exposition in the city of Chicago, in the state of Illinois, to be opened to the public on the 1st day of May, 1893.

Two boys in England were tied up and given eight strokes of the lash, by the propter authority for trying to wreck a passenger train. There is too much sentiment in America in the treatment of criminals. If right living people had a fractional part of barbarity of the criminal classes, bad people would not be so numerous. They don't like to take their own medicine.

Ups and Downs of Life.

New York Press November 8.—An old and poorly dressed man was found shivering in a doorway on Fulton street early yesterday morning. He was locked up in the DeKalb avenue station on a charge of intoxication. He was sent to jail for ten days. The unfortunate man was ex-Judge Edwards, formerly a well known lawyer. Some years ago he lived in style on Bedford avenue. He was then a member of the law firm of Curtis & Walters with a large practice and was a prominent member of Plymouth Church.

Election Expenses.

In York State they have a law that every candidate who is voted for at any public election held within that State shall, within ten days after such election, file, as hereinafter provided, an itemized statement, showing in detail all the moneys contributed or expended by him, directly or indirectly by himself or through any other person in aid of his election. Such statement shall give the names of the various persons who received such moneys, the specific nature of each item, and the purpose for which it was expended or contributed. There shall be attached to such statement an affidavit, etc.

For a Troublesome Cough.

Rev. W. R. of Philadelphia writes to the home Magazine: I notice a receipt for a troublesome cough in the September number. A valuable one largely used in this city is the following: Five cents worth of each of the following: Steep of Squills, Castor Oil, Syrup of Wild Cherry and Paregoric. Put together in a bottle and shake well. Dose:—A teaspoonful four times daily or as often as the cough is troublesome.

Over Hasty Feeding.

"It is a grave mistake," said a doctor "to eat too quickly." Those animals intended by nature to feed hurriedly have been provided with gizzards, or with the power of rumination. No matter how good a man's teeth may be, if he bolts his food his stomach must suffer terribly thereby. When a person swallows an imperfectly masticated piece of food, the result is that the food instead of fulfilling the purposes of nutrition, acts, on the other hand as a source of irritation to the stomach. Thus either the physical condition runs down or additional food is required to maintain the general standard of health. Americans are called 'pie eaters.' Do you know why? Because pie is something that may be eaten on the run, while the great American enterprises may thus go unimpeded by the loss of time. Overhasty feeding is the bane of American life. We are all of us becoming dyspeptics.—New York Journal.

Strict Religions.

A duke who had married his third wife was one day surprised as he entered the drawing room dressed for some state ceremonial by his spouse throwing her arms about his neck and kissing him. "Madam," said he, in the chilliest of tones, "my first wife was a Howard, my second wife was a Pembroke, and, madam neither of them dared to attempt such liberties."

A story is told in the "Memoirs of Adam Black," the publisher of Edinburgh, about a minister who resented his wife's kissing him, not because of his offended dignity, but on account of the day on which the expression was made. The Rev. J. Colquhoun, of Lehigh, was a man of extreme solemnity of demeanor. On one sacrament Sunday morning, his wife being desirous to have him nicely rigged out for the occasion, had his coat well brushed, shutting off almost all communication with the devastated places. In consequence full details of the awful his shirt white as snow, and his hands hanging handsomely upon his breast; and she was surveyed with a gaze that was so delivered her

Teachers' Institute.

The Teacher Institute will be convened on Monday, November 23rd. On Monday evening the address of welcome, the response, and lecture will be by home talent. Tuesday and Wednesday evening lectures will be by noted lecturers. The entertainment on Thursday evening will be by the Swedish Quartet Concert Company. All the seats in the room excepting seats on the gallery will be sold as reserve seats. Gallery seats will be sold at half price. The lecture on Friday evening will be by a favorite lecturer. Program in full next week.

GENERAL NEWS ITEMS.

A Scotch minister was startled by the original views of a not very skillful plowman whom he had just hired. He noticed that the furrows were far from straight, and said: "John, yer drills are no near straight as; that is no like Tammy's work."—"Tammy's being the person who had previously plowed the glebe."—"Tammy didna ken his work," observed the man coolly, as he turned the team about. "Ye see, when the drills is crookit the sun gets on a side, an so ye get early tatties."—"Youth's Companion."

"If an Arab woman who has lost her husband decides to marry again she visits the grave of her husband and prays him not to be offended. As however, she feels that he will be offended she takes with her a donkey laden with flour. The prayer ends, she proceeds to pour the water on the grave to keep the first husband cool under the circumstances about to take place, and, having well saturated him, departs." London, November 6.—A dispatch from Japan gives the latest official estimate of the killed and injured by the recent earthquake along the Island of Honshu. According to these figures 6,500 people were killed and 50,000 injured. The amount of damage done can be imagined from the fact that the official estimate places the number of houses destroyed at 75,000 to which is to be added 12,000 other houses considerably damaged.

Increase of Crime in the Country.

From the Chicago Tribune. In seeking for the causes of the increase of the percentage of crime in this country Mr. Coffin finds, first that the deportation of criminals from Europe is largely responsible, the census showing that of 43,127 penitentiary convicts whose names and names are known, the foreign born element of the population furnished 14,725, the colored population 14,687, and the native white population which probably outnumbered them both only 13,715; second the promiscuity of prisoners in the county jails which makes their schools of crime; third, the inattention paid to the proper separation of prisoners in penitentiaries; fourth, the insufficiency of legislation to completely check the inflow of children of paupers and criminals; fifth, the preponderance of criminals among the descendants of slaves; and sixth, the condition of persons outside of prisons with their temptations to make money by illegitimate methods. To these causes Mr. Coffin might well have added the laxness of criminal law, the tricks of criminal lawyers, the corruption of juries and the inadequacy and uncertainty of punishment.

OUR CLUBBING OFFER.

Ever desirous to please our large family of readers, we have made arrangements whereby we can furnish them with an extra amount of reading matter for the evenings which are now lengthening. Agricultural and stock raising under the present hard times will require more study of the methods of those who have made these pursuits successful. Knowing the readers of the JUNIATA SENTINEL & REPUBLICAN would be pleased to receive as a present a first class farm and stock paper we made arrangements with the publishers of "The Breeder's Guide and Practical Farmer," of Huntingdon, Indiana, whereby we are enabled to give free to each of our subscribers one year's subscription to that excellent farm and stock paper.

We do not ask you one cent for this extra paper, we wish to make a present to all those subscribers who will appreciate. That is to all those subscribers who pay all arrearsages and one year in advance for the JUNIATA SENTINEL & REPUBLICAN. We are not content with giving subscribers the best paper in Juniata county, but we want to give them in addition one of the best semi-monthly and arm paper published in America.

The subscription price of the JUNIATA SENTINEL & REPUBLICAN is \$1.50 per year, and "The Guide and Farmer," is 50 cents per year. We will give you both for \$1.50.

"The Guide and Farmer," is a semi-monthly journal devoted to the interests of farmers and stock raisers and is replete with practical information so highly appreciated by all our farmer readers. You will want more reading matter this winter than usual, and you cannot get so much reading matter for this small amount of money anywhere. Tell your neighbor about it, and ask him to come in with you and get two papers for the price of one.

OR IF YOU PREFER, We will get for you the Philadelphia Weekly Press an unsurpassed weekly journal of general news and literature for \$1.50 in advance. Commence now, talk it up. It is not every day that you are presented with such an opportunity to secure valuable literature and full account of all important country events and enterprises.

Prosperity and Trouble.

"Prosperity is always a blessing," said the dreamer. "It breeds quarrels," said the philosopher. "How do you make that out?" "Watch." The philosopher caught half a dozen boys about a fruit stand. One of their number, possessed of money, had purchased a pear. The others wished for it—in vain. The philosopher laid down half a dollar and paid the dealer to give the urchins fruit up to that limit. At first there was a little cheer of approval. One boy took all his share in plums. Another wanted an assortment but there were no donsons. Another selected a fine peach, but a third also wanted that. He gave it up and tried to take two apples. Another boy wanted one of the apples. A fourth gamin snatched both apple and pear and started to run. Two others followed, caught and pummeled him. While they were so engaged their own goods were confiscated for general use.

GENERAL NEWS ITEMS.

The peeler had to run them away with a club to keep them from overturning his stand. A dozen fresh and likewise stepping mightily high. Set them up and over they go. Why what can be wrong. At once it flashed into her mind that she had thrown out a lot of spiced pears that had fermented. The turkeys found them and partook of the tempting fruit to their utter disgrace.—Altoona Tribune.

Drunkennes or the Liqueur Habit positively Cured by Administering Dr. Haines' Golden Specific.

It is manufactured as a powder which can be given in a glass of beer, a cup of coffee or tea, or in food, without the knowledge of the patient. It is absolutely harmless and will affect a permanent and speedy cure, whether the patient is a moderate drinker or an alcoholic wreck. It has been given in thousands of cases, and in every instance a perfect cure has followed. IT NEVER FAILS. The system once impregnated with the Specific, it becomes an utter impossibility for the liquor appetite to exist. Cures guaranteed. 45 page book of particulars free. Address: GOLDEN SPECIFIC CO., 185 Race St., Cincinnati, O. June 24, '91-ly.

A Favorable Verdict after Twenty Years Trial.

The original and only genuine Compound Oxygen Treatment of Drs. Starkey & Phalen, is a scientific adjustment of the elements of Oxygen and Nitrogen (nitrogenized), and is composed in so condensed and made portable that it is sent to all the world. It has been in use for more than twenty years, thousands of patients have been treated and recommend it—very significant fact. It does not act as most drugs do by creating another ailment, often requiring a second and more serious concoction of the first, but Compound Oxygen is a revitalizer, renewing, strengthening, invigorating the whole system. These statements are confirmed by numerous testimonials, published in our book of 200 pages, only with the express permission of the respective curative agents. Dresses are given and you can refer to them for further information. The great success of our treatment has been proved in the case of a very interesting person; some calling their preparation Compound Oxygen, often appropriating our testimonials and the names of our patients to their own worthless concoction. But any substance made elsewhere or by others, and called Compound Oxygen is injurious.

"Compound Oxygen—Its Mode of Action and Results," is the title of a new book of 200 pages, published by Drs. Starkey & Phalen, which gives to all inquirers full information as to this reliable curative agent, and a record of surprising cures in a wide range of chronic cases—many of them after being abandoned to die by other physicians. Will be mailed free to any address on application. Drs. Starkey & Phalen, 1629 Arch St., Philadelphia, Pa., 120 Satter St., San Francisco, Cal.

When Currier Downing of Ripley, Me., left home 75 years ago he planted an acorn in the cedar yard. When he returned the other day he found that his acorn had produced an oak tree nine feet in circumference, with branches extending forty feet.

There are records of elephants that have lived 200 years, and an age of 150 years is not regarded as so very old for an elephant. It takes about a quarter of a century to get the elephant to full maturity.

John Aartman, of Warsaw, Ill., drove over a bluff 100 feet high into the Mississippi River the other day. Mr. Hartman was unhurt, and his doctor says he would surely have been killed if he had been sober.

New York Sun: A canary with a swollen hind toe was brought to a bird fancier recently, and he pronounced the trouble poisoning from a mosquito bite. He said the thing was not uncommon.

After a separation of thirty six years, Frank E. Lawrence, of South Chester, has discovered the whereabouts of his father, in St. Joseph, Mo. As slaves his father and mother were separated.

The sun never sets on the soil of the United States. When it is six o'clock at Attou Island, Alaska, it is 9:36 o'clock A. M. the next day on the Eastern coast of Maine.

Next year's corn crop is likely to be a famous one. This prediction is based on the fact that shoes with the sharp pointed Piccadilly toe are again the fashion.—Ex.

The purchase of 8,000 Texas cattle in seventeen train loads cost David Rankin, the cattle king of Tarkio, Mo., \$272,000, besides the freight of \$30,000.

Chemists say it takes less than half the amount of sugar to sweeten preserves, if the sugar is put in after the cooking has commenced.

A Christian Endeavor Society event of Thanksgiving day at Plymouth will be a "rail-dripping contest," between ladies.

Lincoln was the first President to issue a Thanksgiving proclamation

The following in quotations are verses from Job 38th and 40th chapters. "Hath the rain a father or who hath begotten the drops of dew?" It is evident from the foregoing that God thousands of years ago knew that man would produce rain making instruments and hence inspired the writer of Job to produce the above verse. It is evident that both God and man affect the laws of nature to produce rain. Again God is likely father of the laws that must needs be disturbed to bring artificial rain but does not always control the means used to disturb them. This proves that He is not the author of every rain, but that man by means used is at times father of rain.

"Canst thou lift up thy voice to the clouds that abundance of water may cover thee?" Does this verse refer to artificial processes yet undeveloped, but somewhat similar to those used in the western part of the United States that are producing rain in districts where it seldom rains.

"Hast thou an arm like God, Canst thou thunder with a voice like him?" Does not this verse refer to mathematical calculation in astronomy. By strong glasses and the figures of astronomers cannot it be proven that each star of Pleiades is bound the one to the other. Concerning Orion cannot the mathematics and glasses of the astronomers loose her bands.

"Canst thou bring forth Mazzeroth in his season, or canst thou guide Arcturus with his sons?" Cannot Astronomers calculate the season Mazzeroth comes forth to the day and cannot they trace the route of Arcturus and his sons before they have passed over it. Does not this verse refer to what astronomers are able to accomplish. And does not the verse preceding refer to the same.

"Canst thou send lightnings that they may go and say unto you 'here we are.'" It is known that you can send electricity which possibly is lightning referred to in the above verse that it may go and say unto you "here we are." For instance erect a circle of ten miles of telephone wire. Place a speaking out phone in a room and a receiving phone alongside of it. Speak out through the former, "Here we are," and it will pass at lightning speed over the circle and through the latter phone saying to you, "Here we are." Does this verse refer to the modern telephone or an undeveloped invention.

"Who can number the clouds in wisdom or who can call the bottles of Heaven?" Science as yet has not developed instruments to prevent rain or moisture. This verse may refer to an invention not yet invented. If it does time will produce it and rain will then be prevented by artificial process as well as brought.

"Out of whose womb came the lea? and the hairy frost of Heaven, who hath gendered it?" Does not the first sentence of this verse refer to the modern ice making machine as well as the laws of nature that produce ice. Does not the last section of the verse refer to artificial processes, explosives that produce frost. It is evident that both God and man affect the laws of nature to produce ice and by other methods of fact nature to produce frost even the hoary frost of heaven.

"Canst thou send lightnings that they may go and say unto you 'here we are.'" This verse may refer to an invention not yet invented. If it does time will produce it and rain will then be prevented by artificial process as well as brought.

"Out of whose womb came the lea? and the hairy frost of Heaven, who hath gendered it?" Does not the first sentence of this verse refer to the modern ice making machine as well as the laws of nature that produce ice. Does not the last section of the verse refer to artificial processes, explosives that produce frost. It is evident that both God and man affect the laws of nature to produce ice and by other methods of fact nature to produce frost even the hoary frost of heaven.

"Canst thou send lightnings that they may go and say unto you 'here we are.'" It is known that you can send electricity which possibly is lightning referred to in the above verse that it may go and say unto you "here we are." For instance erect a circle of ten miles of telephone wire. Place a speaking out phone in a room and a receiving phone alongside of it. Speak out through the former, "Here we are," and it will pass at lightning speed over the circle and through the latter phone saying to you, "Here we are." Does this verse refer to the modern telephone or an undeveloped invention.

"Who can number the clouds in wisdom or who can call the bottles of Heaven?" Science as yet has not developed instruments to prevent rain or moisture. This verse may refer to an invention not yet invented. If it does time will produce it and rain will then be prevented by artificial process as well as brought.
