It is a popular thing nowadays to riticise women's dress. We have, owever, no sympathy with the imolication that women are worse than men in this respect. Men wear all hey can without interfering with their ocomotion, but man is such an awkvard creature he cannot find any place on his body to hang a great many ineries. He could not get around in Wall street with eight or ten flounces, and a big-handled parasol, and a moun ain of black hair. Men wear less than vomen, not because they are moral out because they cannot stand it. As t is, many of our young men are sadded to a superlative degree, and lave corns and bunions on every sepa ate toe from wearing shoes too tight with collars so high that I wonder why much good linen is wasted. -Ladies iome Journal.

Taking butter from milk was known in the earliest times. It was left for our time to make a milk of codliver oil.

Milk, the emulsion of butter, is an easier food than butter. Scott's Emulsion of cod-liver oil is an easier food than cod-liver oil. It is rest for digestion. It stimulates. helps, restores, digestion; and, at the same time, supplies the body a kind of nourishment it can get in no other way.

as dyspepsia (weakness of digestion). No other manifests itself by so many different symptoms, and is consequently mistaken for some other disorder. No other has more serious results if neglected, and yet no other is more easily cured than so-called indigestion. It occurs with bables and teething children and with grown persons particu-larly in consequence of a cold on the stomach, (catarrh) caused by wet feet, improper diet or ntemperance in eating or drinking. The use of icy beverages is particularly dangerous in this respect. It manifests itself at first by loss of appetite, aversion to certain kinds of food, a esire to vomit, coated tongue, parched line and sharp pains just above and between the eyes. If the trouble continues for any length of time, the patients grow thin and weak, and and in consequence become peevish and morose. If the disease is confined to the stomach it is usually accompanied by constipation. If it extends into the intestines, as is often the case with children, diarrhosa sets in, which is extremely weakening. If the disease is neglected in the beginning the pain over the eyes increases to such an extent with grown persons that the symptoms resemble those of inflammathat the symptoms resemble those of inflammathatics. that the symptoms resemble those of Inflammation of the bowels or of the brain. More or less
violent atticks of fever almost always accompany a weak digestion, and frequently the
cause of the disease is sought anywhere else
than in the stomach, which has become rebellious in consequence of a cold or an improper diet.
And yet all forms of dyspepsia can be easily
reached with the aid of the St. Bernard Vegetable Pills, which are prepared from the herbs
of the Swiss Alps. The pills contain an extract
of these herbs, which act as a femic and at the
same time healing and strengthening. It agrees
with the most delicate constitution, and renews the power of digestion in the stomach and
consequently the appetite in a wonderful manner. The St. Bernard Vegetable Pills can be
obtained of any first-class druggist. If your
druggists haven t them, send 25c. to "St. Bernard," Box 2416, New York City, and you will
receive same postpaid by return mail.
