A MISTAKE THROUGHOUT.

and pale, own fair land;

a goodly tribe, as night well describe medical

Mr. Matthas Coddleman was a broker in the city, and like many other car he had just left, with a hard, col1 brokers, he was passessed of a small house and garden in one of the outlying or him. suburban towns, to which he was wont retire when his day's work was over. He was, in short, a plain, every-day and good looks.

Mr. Matthias Coddleman certainly tended to his business, and was, moreover, the superintendent of a Sunday school in the town where he lived. He moving at a good rate of speed. was nevertheless possessed of a romance, stout, and, moreover, was much flurweighing, I should think, nearly two hundred pounds; for Mr. Matthias was s married man.

This is how it came about. Some two years before the time at which I write, he had taken his summer outing at one of the popular seaside resorts, and there had met for the first time the future Mrs. Coddleman. Etta Savles, as she was then, was a plump and presty maiden, under the charge of an d aunt, her father being dead, and

her mother and only sister in Europe, Ema's aunt had but one failing, and that was the the Patagonian savages. On learning of the deeply religious nature of Mr. Matthias, this estimable gentlewoman pounced upon him forthwith and so much was she interested in discussing with him plans for the conversion of these heathers, that she enceived the conversion of Etta, as affe ted by I we and Mr. Coddleman,

As Mrs. Savles was a great invalid and had gone to Europe for her health, it seemed useless to wait for her return. So after much letter-writing and discussion, it was decided that the young couple should be married, and they

vere the very next spring. They had now been man and wife for more than a year, and thus far nothing carred to mar their tranquillity Indeed, there was no reason why there for Mrs. Matthias believed her hus and to be perfection, and Mr. Matthe compliment, His iler, for she had but two fallings; one a swept by him, out of the room and up falling of eye-sight, and the other a stairs, and this was the extent of their most hordinately jealous disposi lon. conversation that night. Of the dret of these failings her husof the dist of these fallings band was aware; of the second be knew that her sister had not yet arrived, but

The day of the tenth of July, 1875, Europe and the arrival of the green-eyed monster, lealousy, in his household, before the time of which I write, Mrs. Sayles had died abroad, and her daughter was now returning break, and summoning in live with her married sister. The day in question opened auspiciously enough, for though sultry, it was very beauti-

TALKING BIRDS.

How many talking birds have we of a bright yellow color. Well, as I said before, I prefer his talking powers in preference to the well-known grey parrot. You may doubtless have noticed a certair hollowness about the voice of the parrot, which, to my mind, is not so perceptible in the my nah. Of coarse it always is so more or less with all birds, as that well-used instrument in the human body, the tongue, does not come into play with "Well, I'll be durned, Tildy. I've asted beef steaks and pig steaks, but 'll swar I never see sweep steaks fore."—Truth.

Instrument in the human body, the tongue, does not come into play with birds at all, so naturalists say. The voice and formation of words no doubt comes straight from the larynx, so the tongue takes no part in uttering sounds. The vocal organs of birds bird. Japiter, his father, took the are attracted to the termination of eagle; Minerya his state to the state of the perpetual point. tongue takes no part in uttering sounds. The vocal organs of birds are attracted to the termination of the traches, or wind-pipe. There are four pairs, or muscles, atta-hed to the windpipe in singing ta-hed to the windpipe in singing and talking birds, whereas in the counting for the entire absence of voice in that bird. There is a mem. were blue, and its voice surpassed the The driver thought he scented an stork there are none, showing and acbranous tongue at the opening of the nightingale in melody.

You may have heard of ignorant people splitting the tongue of singing birds under the impression that it will give value to their notes; but I need scarce-ly say that it is a very cruel and useless practice, from which more often than Bunker-1 see that Ducklow, who not a bird dies. Carefully watch any fives out of the city now, has made talking birds, and you will then see that the voice comes from the throat," al-Hill-Yes, I understood that he though the Rev. J. G. Wood, in his was making money from it, and I Frathered Friends, says the construction of the bill and tongue and other corresponding organs of the parrot, is very ourious, as it is that construction, together with its implanted imitative instinct, which enables it to give utterance to articulate sounds. The resonance of human sounds is produced by the hollow construction of the beak, and nothing whatever to do with it, so at present we trust to their knowledge as I think they have settled the Mrs. Var Winkle—Is your husband the thick fleshy tongue gives its not better?

net them, but don't study them. I am some folks with the advantages we have now in natural iterature. My esteemed friend Mr. Wolf, the well-known animal painter, tells me it is not so in Germany. He says people there are much nore enlightened regarding ornithological study, and even at the smallest ecttage door you will see little boys teaching their bullfinches to pipe. 1 often have a delightful evening with Mr. Wolf, and many are the pleasant stories he has to tell. He possessed one little jackdaw who could imitate any sound that was repeated a few times within his hearing. For instance, when he got up from his essel to see to

his fire in his stove, he had a habit of tapping his pipe upon it, to clear it before charging it again, when the echo of the sound was sure to come from some corner of the studio, where Master Jack would sit watching his Of course, jackkaw-like, he got into all sorts of mischief; but when taught young they will learn a great deal, although they are not the best talkers of the crow tribe.

It has often struck me as odd that the power of speech should be confined to a few small birds, when Sally, the ape that used to charm us at the Zoological Society's Gardens, had been taught to count as far as ten by picking a de-fred number of straws from the bed she sat on, and could distinguish the difference between a little piece of apple and a big piece. When old to take the smaller, she could do so without a moment's hesitation. Why, that is clearly understanding. Yet not a word could she utter or be taught, although she appeared to learn anything else readily enough.

Now the little jackdaw, with all his impudent cleverness, has no such great reasoning power. The late Rev. J. G. Wood gives an instance of this in his Anecdotes of Birds. A jackdaw he was watching was carrying a long stick to his nest in the hollow of an oak tree. | Well, he held by his bill in the middle. but could not get it through, and he had not the sense to take it at one end and try again, but, after a number of ineffectual efforts, gave it up, quite exhausted and went for another, perhaps with the same result, except by accident he might have been successful. So we must accept things as they are, as it is intended no doubt for the best. that I have known-the two mynahs,

I have given a few sketches of birds one of which is unfortunately dead; but the one still living can be seen why, they have scarcely any, as the in a buggy to give the animal an any day, and he will afford a great deal of amusement to all those who would like to hear him. He will prob-with. But of course for all such mat-button with his foot, and the elecan' all the other nurses cuts me dead. ably address you by "Who are you?" What do you want?" "How are you?" "Good morning, Polly!" "Be quiet!"
"All right!" etc. His words are quite distinct, and attered quite humorously. And then, perhaps, if you should be unfortunate enough to have a cough, be of interest to many of my readhe will mimic you. I recollect an old gentleman once came into the house while I was there sketching, and I was ling sitting on the back of his mistress's very much amused to see his face when he heard somebody addressing him, as in the tea-table talk going on, and he thought—"Hallo! Who are you?"
He thought I was speaking to him, as conversation when it flags a little, as 1 I was apparently the only person in the haveoften seen him do at my friend's house. So I pointed out to him from whence the voice came, and he approached the cage and began to laugh thing about, although of course he is a at the comic birds, and they mimicked well known talker, and many are the him; so for a moment or two it was a quaint stories told about him. He is laughing match. And he told me he represented as laying down the law to
