COST OF INDIAN WARS.

surprising Facts and Figures on the Cost of Fighting Poor Lo.

A few figures, which will very interesting to people who have paid attention to Indian affairs during the past few years, were given by a Commissioner connected with the Indian Bureau at Washington while he was visiting this city the other

He has had charge of the Indian census under one administration and has also taken a prominent part in the negotiations for the purchase of lands from the Sloux. He has lived among the Indians and was an ardent friend of the late Sitting Bull and other noted chiefs.

Some one in a party at an uptown hotel spoke of the trouble in the Northwest and asked the Commissioner for his opinion as to the cause of the outbreak

He laid the blame on the Government and the incompetent men who have represented it in dealing with the aborigines. Those who were not incompetent, he said, were worse, and generally retired with a fortune in two or three years after receiving their appointments. During the past few years, however, there has been little or no chance to acquire wealth rapidly, and the only cause, the Commissioner said, was because the Indians were destitute of wealth and have none to lose for the white men to acquire. The rations promised by the Government were scanty, and the ssue was often delayed for weeks at a

Those uncomfortable people who pride themselves upon saying just what they think on all occasions are unpopular, and deserve to be. Their boasted frankness is generally ill-concealed malice, and their unsolicited opinions are merelyinsolent. We have no right to say what we think unless kindly and lovingly; no right to unload our jealousies, envies, bad humors and miserable spites upon the hearts of our neighbors. If we must be bad-tempered we should at least keep our venom locked up in our own breasts, and not let it out to wound others. Truths need not be unpleasant in order to be true.
