A COSTLY EARTHQUAKE.

After a while, an eternity in length,

"You know of course, sir," pursued M. le Qual, diverging a moment from the line of his story, "how frequent earthquakes are in that part of South America, especially in summer, when they occur almost daily. At the day I speak of, every since early morning, the ground had been shivering inwardly, while from time to time a low, deep rumble could be heard, like the mutter of distant thundar.

**Like every one else, however, who lived in Caracas, I had grown accustomed to and in a measure indifferent to these constant seism'e disturbances, but now, even in the absorbing interest of the subject that filled my thoughts, I could not help noticing how greatly of late these quaking tremors had increased.

"In fact, I had hardly finished my lover's plea, when a huge porcelain vase at the foot of the steps was jostled from its pedestal and shivered to atoms and at the same instant I was thrown violently to the floor of the balcony. With a haste that great peril only inspires, I was on my feet again and turning to seek N.na to seize her in my arms and if possible to bear her to beside me, and looking about me, dazed though I was, I could no longer see fallen
