SENTIMENT is glorified prejudice.

Royal Baking Powder.

THE GOVERNMENT TESTS ESTABLISH ITS ABSOLUTE SUPERIORITY.

(Data from the latest Official U. S. Government Report on Baking Powders, Department of Agriculture, Bulletin 13. page 599.)

Royal is placed first of the cream of tartar powders, actual strength, 160.6 cubic inches of leavening gas per ounce of powder.

Every other powder tested exhibited a much lower strength than the Royal, the average being 33 per cent. less.

Every other powder likewise showed the presence of alum or sulphuric acid.

The claim that this report shows any other powder of superior strength or purity has been denounced as a falsehood by the Government officers who made the tests.

Avoid all baking powders sold with a gift or prize, or at a lower price than the Royal, as they invariably contain alum, lime or sulphuric acid, and render the food unwholesome.
