

THE PUNCTUAL TIDES.

By DOXA REED GOODALE. The punctual tides, with all their roar, wash on the seacoast's pebbly floor...

THE SINGING MOUSE.

By ANNY AMY. Dear little boys and girls: Friend Tello, has invited me to join the Sunny Hour...

TOPICS FOR CYCLISTS.

The April number of the Journal of Nervous and Mental Diseases there appeared an article written by Dr. Graeme M. Hammond of New York...

THE PUNY PAST.

It is a wonder that the hens do not feel the importance of this season of the year! Their chicks should have in it a new note, for never are so many people interested in eggs as just at the Easter season.

EGGS IN THE PAST.

In mythology we find many queer beliefs about eggs. The Persians believed in two deities, Light and Shade. Light produced twenty-four good spirits...

ORNAMENTING SCHOOL GROUNDS.

There are so many of our school houses and their surroundings which seem to be neglected spots. It seems so cruel to leave these poor animals up in a small cage where they can only pace back and forth a few feet.

THE PUNY PAST.

It is a wonder that the hens do not feel the importance of this season of the year! Their chicks should have in it a new note, for never are so many people interested in eggs as just at the Easter season.

Terrors of the Awful Pause.

We usually talk about the weather when there isn't anything else to talk about. This fact may tend to rob the subject of its importance, yet it should not. In fact it ought to be greatly in its favor, as it is ever ready and efficient in breaking the 'awful pause.' Have you ever been overtaken by the awful pause? Fortunately, indeed, if you have not, and entitled to heartiest sympathy if you have. It is truly awful, especially if courtesy demands that you should break it. It settles upon the best regulated companies like a nightmare, and seems to paralyze the tongue and put thought to flight. No one can think of anything to say, or fears to attempt to say it. Then, if ever, a fool is welcome, because he doesn't think before he speaks.—Pittsburgh Commercial-Gazette.

This Seems Silly.

Certain ladies charged with the duty of obtaining data for a study of young humanity now send to new mothers little blank books provided with questions as to when the baby first exhibited the sense of hearing, when he first took notice of light, what were his earliest signs of distress, and many more such. The questions are designed to furnish hints for an investigation extending over the first four years of the child's life. In time the books will be collected and sent to Germany as aids to persons who are one day to announce the results of an elaborate study of mental development during infancy and early childhood.

Small-Pox in Wall Paper.

"Many years ago a person was sick of small-pox in a country town in the country town of Groton, and after the patient recovered the dwelling was fumigated and repapered. Ira Chester and family now dwell in the house. The paper was removed a week or so ago, and the result was that the disease was dormant in the walls of the room." The above clipping from the Connecticut Enquirer tells the claims of sanitarians, that all disease germs find a hiding place in wall paper, with its vegetable paste to hold it on the wall, and its animal glue to hold its colors; that, to say the least, are not the best materials with which to cover so much space around us as the walls in which we live and sleep, and that paper and glue are great absorbents of moisture, which every person throws off daily, and that such decaying material as glue and paste gives off deleterious gases in such small quantities that we do not discover them, though those who study it can smell it in most rooms papered, and especially where a number of layers of paper have been pasted upon each other.

Hood's Cures

Mrs. F. O. Stone, of Geneva, Ohio.

Consumption—Hopeless Case

Restored to Perfect Health by Hood's Sarsaparilla. "I do not seek notoriety, but for the comfort and health of the human family I write unhesitatingly of the benefits derived from Hood's Sarsaparilla. I have been afflicted with Consumption for many years, and have tried every remedy known to me, but without success. I was in a very poor health for four years, having a terrible pain in my chest, and my weight was reduced to such an extent that I was unable to get up without the aid of my arms. I kept getting worse and another doctor told me for

The Loon as a Fisherman.

It has been said that one of the strong strokes of nature was when she made the loon—a bird which represents the wilderness and solitary spots of the wildest and most solitary lakes. It dives with such marvelous quickness that the shot of a gunner gets there just in time "to cut across a circle of descending tail feathers and a couple of little jets of water flung upward by the web feet of the loon."
