ness and solitude of the night, is well calculated to strike a chill into the breast of man. Now the plaint ceases, but in an Instant it breaks forth with renewed vigor, yelping, howling, crying, strangling, and dying away like the wall of a lost soul sinking into hades.

Wherever easy prey, dead or alive, is to be obtained, there the coyote will be found. In the days when herds of luffalo existed, the sneaking coyote prowled at their heels in great numbers, eagerly watching for a wounded or dying animal. In strong bands they would fall upon the unfortunate creature which lagged in the rear and tear its quivering flesh before life had fully departed. Untiring, lean, gorging to repletion when the opportunity offers and again starving to the verge of death, these

scavengers of the plains may become dangerous when driven to extremities by famine or rendered unusually courageous by large numbers. Ordinarily the coyote is shy and has a wholesome fear of man. It is only upon rare occasions that the lone traveler is attacked. The scent of the coyote is remarkably keen, and the animals travel very rapidly t any place where they expect a feast
