REV. DR. TALMAGE THE BROOKLYN DIVINE'S SUN-

DAY SERMON.

Subject: "Festivity."

TEXT: "Gome, for all things are pready."-Luke riv., 17.

It was one of the most exciting times Ruglish history when Queen Elizabeth visited Lord Leicester at Kenfiworth Castle. The moment of her arrival was considered so immoment of her arrival was considered solm-portant that all the clocks of the castle ware stopped, so that the hands might point to that one moment as being the most signifi-cant of all. She was greated to the gate with floating islands and torches, and the thunder of cannon, and fireworks that set the nich ablaze, and a great burst of music that lifted the whole scene into perfect enchantment. Then she was introduced in a dining half the luxuries of which astonished the world. Fou hundred servants waited upon the guests. The entertainment cost #5000 each day. Lord Lekester made that great supper in Kenfl-

Cardinal Wolsey entertained the French embassadors at Hampton Court. The hest cools in all the land prepared for the han-quet. Purveyors went out and traveled all the kingdom over to find spells for the table. The time came. The guests were kept dur-ing the day hunting in the Eing's park so that their appetites might be keen, not ten in the evening, to the sound of the trumpeters, they were introduced into a hall hung with alk and cloth of gold, and there were tables a-glifter with imperial plate and laden with the rarest of meats and ablush with the costlict wines, and when the second course cosinet wines, and want the second course of the freast cause it was found that the arti-cles of food had been fashioned into the shape of men, birls and beasts, and groups dancing, and journing parties riding against such other with lances. Lords and princes such other with lances. Lords and princes and embassicators, out of enga filled to the brim, drank the health first of the King of England and next of the King of France. Cardinal Wolsey prepared that great supper in Hampton Court. But I have to tell you of a grander enter-tainment. My Lord, the King is the ban-queter. Angels are the suppearers. All the redeemed are the guests. The halls of sternal love, freecoest with light and paved with log and curtained with undaful pearity are the

and curtained with unifading beauty, are the banqueting place. The harmonies of eler-nity are the music. The chalices of heaven are the places, and I am one of the servants end the particle, and the hands filled with invi-tations, scattering them everywhere, and, ch, that for yourselves you might break the seal of the invitation and read the words written in red ink of blood by the tremulous hand of a dying Christ, "Come now, for all things are ready

There have been grand entertainments there was a taking off-the wine gave out, which was a training on-tide wine gave out, or the servants were relatillous, or the light failed. But I have gone all around about this subject and i loaved at the redemption which thrist has provided, and I comes here to tell you it is excepted, and I swing open the door of the fresh, telling you that "all things are none reader." things are new ready

In the first place, 1 have to announce that the Lord Jean Christ Homeof is ready. Car-dinal Wolsey using him the least after the first source. Homeone in boot ed and spurrel, and the guests arow and choreet him. But these Christ comes in at the very beginning of th feast-aye, He has been waiting 1824 year Obrist c for His guests. He has been waiting 1824 years for His guests. He has been standing on His mangled feet, He has had His sore hand or His ponetured side, or He has been pressin His lacerated benches, walking, walting, J is wonderful that H + has not been impatien and that He has not sold. "Shut the doo and let the laggard stay out," but He has been waiting.

Come, simer, have, oh, hasta way, While yet a pardouing God is found.

The great French orator, when the dead King lay before him, looked up and oried, "God only is great!" and the triumph of his eloquence has been told by the his-torians. But I have not heard that one soul was saved by the oratorical flourish. Worldly was saved by the oratorical nonrad. Working critics may think that the early preaching of Thomas Chainers was a masterpiece. Bat Thomas Chainers says he never began to preach until he came out of the slekroom, white and emgelsers and told men the

The Armstrong Company, of Engand, has shown some very interestng experiments with the latest ordwhite and employments and told men the simple story of Jesus. In the great day of eternity it will be found that the most souls have been brought to Christ not by the Bossuets and Massiliona and Bourdaiones, but by humble men, who, in the strength of God and believing in the eternal spirit, in-vited men to Jesus nance. A six-inch gun was fired four times in twenty seconds, an eight-inch gun three times in thirty seconds. A orpedo was driven satisfactorily with cordite as a powder. There was a earch light which would keep its vited men to Jesus.

fited men to Jesus. There were wise salves, there were excel-ent continents, I suppose, in the time of Christ for blind and inflamed eyes. But beam upon an object no matter how violently the vessel rolled. A teninch thirty-ton gun, when it was fired, opened the breech screw by the Jesus turned His backupon them and put the tip of His finger to His tongue, and with the spittle that adhered to the finger He anoint-ed the eyes of the blind man, and daylight poured into his blinded soul. So it is now that the spirit of God takes that humble recoil and wound up a spring, which when released, would close the breech again. A 47-100 field howitzer anchored rayer meeting talk, which seems to be the ry saliva of Christian influence, and anoints to eyes of the blind and pours the sunlight itself after the first discharge by driving a spade-shaped plate into the

ground, after which its recoil was mer of pardon and peace upon the soul. Oh, my friend, I wish we could feel it more and more that if any good is done it is by the power of God's omnipotent spirit. I do not inow what hymn may bring you to Jesus. I do not know what works of the Seripture lesson I by a jacket which surrounds it. A quick-firing field gun, which anchors itself in a similar manner, fired five rounds of scrapnel in fifty-three secof know what works of the sampture lesson 1 ead may save your coul. Perhaps the splrit of God may hurl the very text into your least, "Come, for all things are now ready." Again, the church is ready, O man, if I ould take the curtain off these Christian onds. A fifteen-pounder mountain howitzer could be taken to pieces so that no part of it would weigh more than 200 pounds. It was screwed tocould take the curtain off these Christian hearts, I could show you agreat many anti-tics for your redemption. > America's Equatorial Regions-Principal Uses of Vega-table Ivory.

Do you know of what material the

never recognize it in the raw, for in four cases out of five it is a material vulgarily known as vegetable ivory. To the ade it is the ivory nut. Down on the pier of the Pacific Mail Steamship Company will be seen long rows of sacks made of jute, which bear the appearance externally of being filled with notatoes. These are stacked at the head of the pier in the open air. There is no danger o them being carried away, for they are as heavy as lead and not extremely valu-able, as they are. Potatoes would not remain in that exposed position untouched single night. The ivory nut, however valuable only when it comes from the ands of the manufacturer in the button or the ornamental state.

The ivory nut is grown in the equarial regions of South America. The rincipal point of shipment is Colon, of ie Isthmus of Panama. Like the panana, the ivory nut is perenuial in its native clime, and may be found in all stages from the bud to the ripened nut at all seasons of the year. The nut grow in great bunches of about fifty cased in a shell, as are chestuats in th arr, though the shell outwardly re mbles in roughness the surface of neapple. The entire cluster of nuts in is shell is as big as a man's head. This cell comes off easily after the nuts are ipe. Gotham Street-Car Incident, An amusing incident occurred the ther day on a Fourth avenue car going up the Bowery. On the front of (the platform was a very mischie rous looking youth and a very dilapi-lated trunk. The conductor, after collecting the boy's fare, demanded a fare for the trunk also, which the boy

promptly refused to pay. "If you don't pay for that trunk, and right away, too, I'll throw it off the car," said the conductor. "I can't help what you do," the boy eplied, "I shan't pay you a cent for

After a wordy dispute, in which the boy persisted in his refusal to pay or the trnuk, the conductor gave it a cick which lifted it into the street. The car had gone about half a block when a sleepy-looking German with a ery rubicund face, suddenly sprung rom his seat and gazed wistfully back it the trunk, which was fast becomtoes, cabbage, and most kinds of vegeng indistinct in the distance. Again, the Holy Spirit is ready. Why is h that so many sermons drop dead-that Chris-tlan songs do not get their wing under the people-that so often prayer goes no higher than a hunter's "hollo?"
