Subject: "Easter in Greenwood." Text: "And the field of Hebron, which wa In Machpelah, which was before Mamre, the field, and the cave which was therein, and all the trees that were in the field, that were in all

the borders round about, were made sure unit Abraham,"—Genesis xxiii., 17, 18. Here is the first cemetery ever laid out. Machpelah was its name. It was an arbo terrors, proposes here, as far as possible, to cover up the ravages. He had no doubt previously noticed this region, and now that bam is negotiating for a family plot for her

Ephron owned this real estate, and after, in mock sympathy for Abraham, refusing to take anything for it, now sticks on a big price—ion shakels of silver. The cemetery lot is paid for, and the transfer made in the in those early times. Then in a cavern of limestone rock Abraham put Sarah, and a few years after himself followed, and then Isaac and Rebekah, and then Jacob and Leab. Embowered, picturesque and mem-orable Machoslah! That "God's acre" dedicated by Alembam has been the mother of

the great cities are covered with obelisk and funeral vase and arched gatoways and columns and parterres in honor of the inhumated. The Appian way of Rome was bordered by sepalchral commemorations. For this purpose Plan has its arcales of marble purpos sculptured into excellent bas-relies and the features of dear faces that have vanished. Genoa has its terraces cut into tombs, and constantinopic covers with cyprus the silent habitations, and Paris has its Pere la Chaise, on whose heights rest Balzac and David and Nacole and States and even its hillerities are exhausting and even its hillerities are exhausting. So God stops our earthy life and Marshal Ney and Cavier and La Piace and Molicre and a mighty group of warriors and penters and painters and musicians. In all foreign nations utmost genius on all sides is foreign nations utmost genius on all sides is

Professor Proctor and the Drapers splendid men, as I well know, one of them my twacher, the other my classemate.

Among layentous Elias Howe, who through the sewing innehine dil more to alleviate the totals of womanhood than any man that ever lived, and Professor Morse, who gave as magnetic telegraphy, the former doing his work with the needle, the latter with the thundernach. Among physicians and surgeons Joseph C. Hutchinson and Marion Sius and Dr. Valentine Mott, with the following epitaph, which he ordered cut in and replendant forms of our friends on the who is the resurrection and the life. Amen and Amen." This is our American Machine-12b, as several to us as the Machpelan tr Causa, of which Jacob uttered that prioral poem in one verse: "There they buried Abraham and Samb, his wife; more they buried Jacob and Rebekah, his wife, and there I have and Rebekah, his wife, and

there I barried Leath."

At this Easter service I ask and answer what may seem a novel question, but it will be found, before I get through, a practical ask I resurrement day do for the connected, will come. If it should be winter, those who some up will be more fusions than the should be more fusions than the supernal learnification. At certain seasons it is cuestioner in all lands to strew flowers over the core. I remark, it will be their supernal was come up will be more gorgeous than the search that it is to strow flowers over the nours of the departed. It may have been ungrested by the fact that Christ's tomb was in a sarden. And when I say garden I do not men'n a gorden of these latitudes. The late breats of spring and the early frosts of all unit are so near each other that there are some a search of the search of t to our is of the departed. It may have been suggested by the fact that Christ's tomb was in a garden. And when I say garden I do not mean a garden of these latitudes. The late beests of speing and the early frosts of

You find all the royal family of flow es d onemone, tulip and water lily, gerantu in, mignonotte and sweet m take of frozen climes, and the tamar s of the tropies, wainut and willow, by an awthorn, ash and o'der, pine and sy amor-f such floral and botanical beauties are to If such floral and bottomical beauties are to wild growths of the field, think of what gar len must be in Palestine! And in such parden Joons Christ slept after, on the oldler's spears, His last drop of blood be outpulated. And then see how appropria

"Well, then," you say, "bow can you make out that the requirection day will be controlled." Will it not leave Mary' or 'Our Charley ce, and in our memories are to us now

ones, and in our memories are to us now more beautiful than any calla lily, and it forms that are to us more graceful than an willow by the waters. Can you think of anything more beautiful than the reappear area of those from whom we have been paried? I do not care which way the tradition in the blast of the judgment nurriemed or it the plot with the that day shall turn under the list race leaf and the last china aster, I do to the to be been said and the last china aster, I do to the broken said shall come the bodies. chi of the broken sod shall come the bod

The lies of the resurrection gets easier to understand as I hear the phonograph unrol some voice that talked into its year ago, jus before our friend's decease. You touch the ear, and them tone forth the very tones of the person that breather into it once, but is now departed. If a con-can do that, cannot Almighty God, without bull trains, return the voice, why not the lips, and the tongue, and the threat that fashioned the voice? And if the loss, and the tongue, and the throat, why not the rain that suggested the words? And if the rain, why not the nerves, of which the brile beadquarters? And if he can retur ngenfore? And if the inuscine, why not

the bones, that are less wonderful? And if the voice, and the brain, and the mission, and the bones, why not the cultre body? If your ban do the phonograph, God can do the

contraction.

Will it be the same body that in the 'ast day shall be reasonated? Yes, but inflativity improved. Our bodies change every seven ears, and yet in one sense it is the a ne ody. On my wrist and the second finer of my right hand there is a sear. I make that at twelve years of age, when, discuss at the activity research in our and burned them out. Since then my body has changed at least a half dozen times, but those series prove it is the same body.

We awar loss our Hently. If God our and dozen some rebuild a man five, so

and does sometimes rebuild a man five, - a on times in this world, is it mysterious in in the world, is if mesterious in the first properties in the world, is if mesterious in the first properties in the world, is if mesterious into the first properties in the world in once more and there is a niverse. Hall, anthems that shall always told: Hall, companionships, never again to part! That is what resurrection they will do for all the cemeteries and graveraries from the Machanian in Hebroa to the Machanian years they appear, and by rubbing the hind log against the wing make that rditte at the first part of the Machanian in Hebroa to the Machanian years they appear, and by rubbing the hind log against the wing make that rditte at the first part of the Machanian in Hebroa to the Machanian years they appear, and by rubbing the hind log against the wing make that rditte at the first part of the Machanian in Hebroa to the Machanian years they appear, and by rubbing the hind log against the wing make that rditte at the first part of the makes half and the last first.

which all the husbandmen and vine drosse remble as the insectile host takes up the murch of devastation. Resurrection ever-eventeen years—a wonderful fact! Another consideration makes the idea resurrection easier. God made Adam. He was not fashioned after any model. There was not fashioned after any model. There had never been a human organism, and so there was nothing to copy. At the first attempt God made a perfect man. He made him out of the dust of the earth. If out of ordinary dust of the earth and without a model God could make a perfect man, surely out of the extraordinary dust of mortal body and with millions of models God can make each one of us a perfect being in the resur-rection. Surely the last undertaking would not be greater than the first. See the gospel deplica. Ordinary dust minus a model quals a perfect man. Extraordinary dust and plus a model equals a resurrection body.

Mysteries about it? Oh, yes. That is one reason why I believe it. It would not be much of a God who could do things only at far as I can understand. Mysteries? Oh, yes. But no more about the resurrection of our body than about its present existence, I will explain to you the last mystery of the resurrection and make it as plain to you as that two and two make four if you will tell me how your mind, which is entirely inde-pendent of your body, can act upon your oly so that at your will your eyes open, or our foot walks, or your hand is extended. of find nothing in the Bible statement con-erning the resurrection that staggers me or a moment. All doubts clear from my sind. I say that the cemeteries, however cautiful now, will be more beautiful when he so lies of our level ones come up in the

serning of the resurrection. They will come in improved condition. They will come up rested. The most of them lay down at the last very tire!. How often you have heard them say, "I am so ired!" The fact is, it is a tired world. If I sted by Alemburn has been the mother of mumerable mortuary observances. The ecropolis of every divilized land has vied sith its metropolis.

The annual catalogue of the Pennsylvania State College is being widely distributed throughout the State to perclosely followed by Civil and Mining Engineering. Chemistry, Physics and Agriculture are also well represented. There are forty-one in the corps of instructors. Courses in Mining Engineering and in Higher Mathematics have been added during the year. A number of graduate students are working in electrical and mechanical lines. The very full directions for preparing for entrance show that a good standard is purative powers of Hood's Sarsaparilla and maintained and guarantees a work cheerfully state that it has done wonders for me creditable to the culmination of the creditable to the culmination of the public school system of the State. Examinations for entrance are announced for various parts of the State about August 27th.

Twenty-five Hoop Skirts Accounted For "Since the crinoline craze is on again I notice that some inquisitive person recently wanted to know of the Republic where all the old-fashioned hoop skirts so popular with our mothers have gone," said George Parks. "I can answer the question as to some of them at any rate. River, and the way they got there formed one of the most laughable incidents I ever witnessed.

lines had recently been emancipated, when one day a hand of about twentyof Van Buren to trade. After spending all their money they went from store to store, every one crowding in, and would stand around for half an hour until they were given some tride, when they would leave. It was in January, and at one place a clerk had given each of the bucks a palm-leaf fan, which they carried in their hands, and with which they fanne! the uselves vigorously. At another place the proprietor was puzzed to know how to get rid of his unwelcome visitors, for a long time, but fluslly hit upon a happy expedient. Stored away in the garret was a stock of crinolines. He got them out and presented each of the noble red men with one, explaining that they were to take them home as presents to their squaws; and to show them how they were worn a clerk buckled one around him. This was satisfactory, and with a grunt of pleasure they filed out; but, mbued with the idea that what was good for squaw was good for buck also, hey retired to an alley, from which they presently emerged and marched down the street in file, every mother's son of them having his hoop skirt fastened to als walst and carrying his fan. The dght was ludicrous enough to have nade a horse laugh, and as they marched edately along a perfect roar of laughter

greeted them. "Pretty soon, however, the bucks discovered that they were made sport of, and they tore off their new dresses, and, carrying them to the river bank, threw them in and cast the palm leaves after

After reading the following letters can any one longer doubt that a trustworthy remedy for that terribly fainl malady, consumption, has at last been found! If these letters had been written by your best known and most esteemed neighbors they could be no more worthy of your confidence than they now are, coming, as they do, from well known, intelligent and trustworthy citizens, who, in their several neighborhoods, enjoy the fullest confidence and respect of all who know them.

know them.

K. C. Mellin, Esq., of Kempsville, Princess Anne Co., Va., whose portrait heads this article, writes: "When I commenced taking Dr. Pierce's Golden Medical Discovery I

article, writes: "When I commenced taking Dr. Pierce's Golden Medical Discovery I was very low with a cough and at times spit up much blood. I was not able to do the least work, but most of the time was in bed. I was all run-down, very weak, my head was dizzy and I was extremely despondent. The first bettle I took did not seem to do me much good, but I had faith in it and continued using it until I had taken fifteen bottles and now I do not look nor feel like the same man I was one year ago. People are astonished and say, 'well, last year this time I would not have thought that you would be living now." I can thankfully say I am entirely cured of a disease which, but for your wonderful 'Discovery' would have resulted in my death."

Even when the predisposition to consumption is inherited, it may be cured, as verified by the following from a most truthful and much respected Canadian lady, Mrs. Thomas Vansicklin, of Brighton, Ont. She writes: "I have long felt it my duty to acknowledge to you what Dr. Pierce's Golden Medical Discovery and his 'Pleasant Pellets' have done for me. They almost raised me from the grave. I had three brothers and one sister die of consumption and I was speedily following after them. I had severe cough, pain, copious expectoration and other alarming symptoms and my friends all thought I had but a few months to live. At that time I was persuaded to try the 'Golden Medical Discovery' and the first bottle acted like magic. Of course, I continued on with the medicine and as a result I gained rapidly in strength. My friends were aston-

ished. When I commenced the use of your medicines, six years ago, I weighed but 120 pounds and was sinking rapidly. I now weigh 185, and my health continues perfect." Mrs. Thos. Vanscekling

"Golden Medical Discovery" cures consumption (which is scrofula of the lungs), by its wonderful blood-purifying, invigorating and nutritive properties. For weak lungs, spitting of blood, shortness of breath, masal catarrh, bronchitis, severe coughs, asthma, and kindred affections, it is a sovereign remedy. While it promptly cures the severest coughs, it strengthens the system and purifles the blood.

"Golden Medical Discovery" does not make fat people more corpulent, but for thin, pale, puny children, as well as for adults reduced in flesh, from any cause, it is the greatest flesh-builder known to medical science. Masty cod liver oil and its "emulsions," are not to be compared with it in efficacy. It rapidly builds up the system, and increases the solid flesh and weight of those reduced below the usual standard of health by "wasting diseases."

To brace up the entire system after the grip, pneumonia, fevers, and other prostrating acute diseases; to build up needed flesh and strength, and to restore health and vigor when you feel "run-down" and "used-up" the best thing in the world is Dr. Pierce's Golden Medical Discovery. It promotes all the bodily functions, rouses every organ into healthful action, purifies and enriches the blood, and through it cleanses, repairs, and invigorates the entire system.

A Treatise on Consumption, giving numerous testimonials with phototype, or half-tone, portraits of those cured, numerous references, also containing successful Home Treatment for chronic nasal catarrh, bronchitis, asthma, and kindred diseases, will be mailed by the World's Dispensary Medical Association of Buffalo, N. Y., on receipt of six cents in stamps, to pay postage. Or The People's Common Sense Medical Adviser, 1,000 pages, 300 illustrations, mailed for \$1.50.

ST. JACOBS OIL CURES MAGICALLY SPRAINS

I awaited my baby this morning,

To come from his early breakfast

With his books slung over his shoulder,

Of kissing her twice, "Good-by! Good by?

When I saw him bound over it a threshold

Had snatched him away from my arms!

As I wait for him every day,

So loving and blithe and gay.

And his little cap in his han !,"

To look in her eyes, and stand

A moment beside her, smile,

Ere he trudges away to school.

I could not believe my eyes

So eager to join his comrades

A moment he could not miss,

Forgotten my good-by kiss!

It seemed as some cruel monster

No longer its soothing charms?

The mother must take her place

In his heart, in a far-off corner,

Shrined dimly within his mem'ry.

Wind in and out 'mong his heartstrings

Comrades, and sports, and sweetheart,

Alas for my boy, he's my "baby" no more-

Chronic Cases of Many Years Cured Easily.

Cremating Garbage.

The consumption of garbage by remation has been begun in quite a number of places in this country, and the one which is an object lesson to our other cities in Massachusetts and New England is the double-fire system now in use in Lowell and in other parts of the country. The crematory is a brick structure, forty feet long, ten feet wide and twelve feet high, with a stack seventy-five teet in height. The top of the furnace is reached by a platform, and the garbage is collected in carts and imped down the slopes into the feed les in the top of the furnace. After the furnace has been charged two fires are lighted. The flames pass from the first fire to the garbage piled on the grates and the gases and smoke attentiing the combustion ther pass to the second fire, where they are consumed. All the products of the burning of the garbage must pass through one of these fires. We have not room for detail no how this system is managed, but the results are such that it works successfully wherever it has been tried, and its also tion in many of our large cities is appar ently only a question of time. - Beston
